News of the  
Most Sensational  
Development in  
Seed History*

CHARLES SINN, President

## GRO-COATED FARM SEEDS

GRO-COATED Farm Seeds represent the most sensational development in Seed History and are sold exclusively by our organization. Our registered trademark protects you from accepting substitutes. Our GRO-COATING process has been developed through two years of laboratory and field tests in order to assure you Better Stands, Larger Plants and Bigger Yields. See pages 2 and 3 for the full story of GRO-COATED Farm Seeds. This new development is greatly superior to simple seed treatments which we offered before and pioneered to your benefit. All catalog prices are for GRO-COATED processed seed except where otherwise mentioned.

Our catalog contains accurate descriptions of all crops and qualities. We carry the most complete stocks of field and grass seeds in the country . . . all field better varieties. Every letter and order will have our prompt, courteous, personal attention. We guarantee to save you money and serve you fairly and squarely at all times. Prompt shipment and safe arrival assured always. It will be our pleasure to serve you.

# GRO-COATED

TRADEMARK

## BETTER STANDS GUARANTEED OR YOUR

### GUARANTEE

We guarantee that Gro-Coated seeds will produce better stands than non-Gro-Coated seed of equal quality sown under the same conditions. In some years there will be a greater difference than in others. If you are not completely satisfied with the results and the extra assurance of better stands you get from Gro-Coated seeds, we will refund to you the extra charge paid for Gro-Coating. We Gro-Coat seeds as an extra service to you and furnish it on the average at cost.

### EXTRA ASSURANCE OF STANDS

Gro-Coated seeds are chemically protected by not one, but by a special formula of various disinfectants. These kill diseases on the seed and when the seed is sown it also tends to disinfect the soil immediately around the seed. During cold, wet periods, the disease organisms are more active. They try to attack the seed while it is germinating. You may have the highest germinating seed obtainable and yet, if these disease organisms get at the heart while it is sprouting, that seed will die. Even after the sprout is formed they will try to attack the tender shoot that is working upward through the soil and they will cause a condition known as "damping-off." Such plants will never live. Gro-Coated seeds do not suffer like non-Gro-Coated seeds because the disease organisms have been killed or weakened. That is why you get so much larger percentage of plants from Gro-Coated seeds.

#### Gro-Coated Best Yet

I think your Gro-Coated seed is the best thing yet, I had a lot of Alfalfa and Clover in my Oats straw this year, and I attribute the faster growth to the Gro-Coated seed.

Clyde Beaulieu, Holcombe, Wisc.

#### Gro-Coated Seed Is Stronger

The crop from Gro-Coated seed grew more vigorously and didn't die in hot weather, I think the treated seed is stronger seed.

Ethel Carr, Greenfield, Iowa.

#### First Good Seeding

This is the first time I have ever had a good seeding in a heavy crop of Wheat. It made 42 bu. per acre. I believe the Gro-Coating of the seed caused the crop to come through. C. Woodward, Tecumseh, Mich.

#### No Rain But Good Stand

We sowed Gro-Coated Alfalfa seed. It came and produced a very good stand. Alfalfa seed sowed under similar conditions before made no stand.

M. D. Slaymaker, Warsaw, Ind.

#### Gro-Coated Seed More Vigorous

Gro-Coated seed not only gets you a better stand, but grows faster and looks more vigorous and thrifty.

J. O. Bartels, Blythedale, Mo.

#### Gro-Coated Best Ever Had

Gro-Coated Red Clover and Grass Mixture seed produced an excellent stand. The best I ever had. I sure want it again if I can get it.

Bailey Farms, Marietta, New York.

#### Gro-Coated Amazes Neighbors

My neighbors wanted to know what I did to get such a good stand and why my Alfalfa looked so much thrifter than theirs. I told them that it was Gro-Coated.

Paul Will, Murphysboro, Ills.

#### Gro-Coated Clover—First Stand in 4 Yrs.

This was the first stand of Clover I got 4 years in a row. Lots of people here never got a stand of Clover this year, but mine grew vigorously. I will insist upon Gro-Coated seed in the future.

Arthur B. Graham, Pawnee City, Nebr.

#### Gro-Coated Seed From Now On

Last spring I sowed Gro-Coated seed and certainly have a wonderful stand. It has grown very rapidly. From now on I will sow nothing but Gro-Coated seed.

Fred Thompson, DeGraff, Ohio.

#### Gro-Coated Is Insurance

Your Gro-Coated cost very little. We think it is insurance in a farmer's seeding. Our Gro-Coated Alfalfa grew much faster than non-Gro-Coated seed. The plants have more pep and vigor.

S.C. & C.L. White, Bigelow, Mo.

### WHY SEEDLINGS FAIL

There are a number of reasons why you may fail to get a stand of grass or clover. Too loose a seed bed, too deep a covering, unfavorable weather, lack of time, or inoculation, poor diseased soils, etc., are some of the causes for failures.

However, all of these conditions may be favorable; you may have the very finest of seed and yet it may fail to grow. As explained above, disease organisms can cause the seed to die while they are in the process of sprouting. The pictures here shown of eight different crops illustrate just what "Gro-Coating" does. Equal amounts of seed were sown in each row, part "Gro-Coated" and part not "Gro-Coated." These lots were then put in a chiller and left there for a few days so as to duplicate as nearly as possible unfavorable weather in the spring. Then they were brought out in warmer weather. The pictures speak for themselves and the figures as to the increase in the amount of stands are accurate. See page 37 December Country Gentleman magazine and February Capper's Farmer.

### PROTECT SMALL SEEDS

Practically every Experiment Station in the United States from areas where corn is grown are 100% for treating seed corn with disinfectants.

Corn is really a form of grass. If it is necessary to protect a large seeded variety of grass like corn, which is carefully planted and cultivated, it is all the more necessary to do it on these small seeded grasses like Clovers and Alfalfa, Timothy, Brome, etc. These Grasses are attacked by many of the same organisms that attack Corn. We put on so many Grass and Clover seeds per square foot with our normal rates of seeding that half of them may die and still have a good stand, but the disease may get so bad as to kill most all of them and then you have little or nothing. Heretofore the seed disinfectants available were injurious to the seed. The disinfectants that we use on Gro-Coated seed are very effective in killing the disease organism yet they may be applied without injuring the germination in any way. Once you use "Gro-Coated" seed, you will demand it in the future.

RETURNS PER  
ACRE ARE  
**LARGE**

It must be clear to every thinking farmer that he can expect a much larger yield when he has many more plants per acre. When you can get, from half to two and a half times more plants per acre you are going to get a big increase in yield. Furthermore, these plants that you get from "Gro-Coated" seed are generally more vigorous and larger than plants produced from non-"Gro-Coated" seed. You therefore, have extra assurance of getting more plants and better plants and you might easily double your yield over non-"Gro-Coated" seed by insisting that every pound of your seed is "Gro-Coated."

# FARM SEEDS

## GRO-COATING COSTS YOU NOTHING!

### MORE VIGOROUS GROWTH

Hundreds of farmers have written us about how their Gro-Coated seeds produced plants that grew more vigorously. We have space to give you only a few of these farmer reports. They are typical of the many that have come to us. This heavier growth may be attributed to two things. First, the disinfected seed has not been attacked by disease. It is, therefore, stronger and healthier. It gets off to a quick start. Those are the kind of plants that make the best growth. Plants are a good deal like animals. Your Grasses and Clovers and Alfalfas that start right off and grow vigorously are the plants that will make the largest yields.

Gro-Coated seeds are protected not only by the special formula of chemical disinfectants, but we have added a growth stimulator to it. This is designed to further stimulate the germination and the growth of the plants after they are started. Gro-Coated seeds does not mean a fertilizer has been applied or that it has been inoculated. You should inoculate legume seeds just before sowing.

### LADINO

Not Gro-Coated • GRO-COATED  
51% Increase in Stand

### FESCUE

Not Gro-Coated • GRO-COATED  
25% More Plants

### ALFALFA

Not Gro-Coated • GRO-COATED  
2 1/2 Times as Many Plants

### TIMOTHY

Not Gro-Coated • GRO-COATED  
2 1/2 Times as Many Plants

### GRO-COATING IS DIFFERENT

We can scarcely over emphasize the desirability of getting the genuine "Gro-Coated" seed. A very special combination is used in making up this formula. In addition to that the rate of application is very carefully controlled. An additional step in "Gro-Coated" seed is the method of application. A fourth addition to the formula assures that the proper amount of the disinfectant will adhere to the seed surface. This tends to increase its protective power all the more.

It has been necessary to devise special equipment for Gro-Coating certain seeds. Now you can get those hard to treat seeds also Gro-Coated. Seed like Brome Grass and Orchard Grass which are perhaps benefited more than others by this special process. There are only a few selected wholesalers, and two mail order houses that are authorized to sell "Gro-Coated" seed. Do not accept substitutes or be satisfied with single treatment disinfectants. It will pay you to demand Gro-Coated and get the finest.

### TREMENDOUS INCREASE IN STAND

The Photographs that we show you here are only a small part of the evidence of the superiority of "Gro-Coated" seed. There have been other tests made throughout different parts of the nation. The yields of Vetch have been practically doubled. Lespedeza over 25% better, the same for Alsike Clover. Red Clover 20%, Blue Grass 160%, Brome Grass 115%, Sudan Grass stands almost tripled where cold weather followed seeding. Two and a half times as many Alfalfa plants of the same amount of seed, 40% more from Trefoil. It is possible that you could be fairly safe in sowing less "Gro-Coated" seed per acre, but you may run into very unfavorable years. It is better to sow the normal rate of seed per acre and to figure on the "Gro-Coating" as an extra measure of insurance of getting a good stand under unfavorable conditions. There are some years you could plant untreated Corn and get just as good results as you might with treated seed, but no one cares to take the risk.

**COST PER  
ACRE IS  
LOW**

with the minimum "Gro-Coated" charge added, you can save money on Berry's seeds. By sowing "Gro-Coated" seeds, you have the best possible assurance of satisfactory results.

The average cost per acre will run around 20c to 25c. When you consider the tremendous difference in the results that are being obtained from "Gro-Coated" seed, you will find the cost of this extra assurance of better stands and more vigorous plants to be very low indeed. You can buy Berry seeds not "Gro-Coated" and you will find them as fine as any non-"Gro-Coated" seeds you can buy. You will find them priced below the average in cost. Even

#### Gro-Coated Far Ahead

I got a wonderful stand of Alfalfa and Red Clover from Gro-Coated seed. My stand and growth is far ahead of my neighbors who used non-Gro-Coated seed.

Frank Sullivan, Salem, Ind.

#### Gro-Coated Clover Nicest Ever

I had a much better stand of your Gro-Coated seed, yet used 10% less seed. I had the nicest stand of Clover I have ever had, and will buy only Gro-Coated seed from now on.

P. T. Helfrith, Bucyrus, Ohio.

#### Sweet Clover Stand for First Time

On one of our farms we have never been able to grow Sweet Clover. Last spring we sowed Gro-Coated seed and had a fine stand. We only sowed 6 lbs. per acre.

John N. Stricker, Charleston, Mo.

#### Gro-Coated Alfalfa Best

In April I planted 6 acres of Gro-Coated Alfalfa seed. I have already taken off 3 crops and the 4th crop is about 10 inches high. It beats anything I ever saw.

J. C. Rice, McCook, Nebr.

#### Gro-Coated Alfalfa Thick and Fast

The Gro-Coated Alfalfa is as thick as it could stick on the ground and grew very fast. I think Gro-Coating is wonderful and it sure pays to get it on your seeds.

Carl Pelger, Beardstown, Ills.

#### Will Use Gro-Coated Only

I compared the results from Gro-Coated seed with non-Gro-Coated. The crop from Gro-Coated seed grew ranker and taller. I will use nothing else regardless of cost.

Tom Huyck, Edmore, Mich.

#### Gro-Coated Surpasses All

The Gro-Coated seed I purchased last spring surpassed anything I have ever tried both in stand and growth. I sowed some this fall, and now have a green carpet all over the field.

H. L. Van Sickles, Farmington, Mo.

#### Gro-Coated Alfalfa Better

I sowed Gro-Coated Alfalfa seed this spring and got an excellent stand. I consider it grew better than non-Gro-Coated seed. The Alfalfa is making a very thick growth.

Wilbur Bell, Cedar Rapids, Iowa.

#### Only Gro-Coated Seed From Now On

I sowed Gro-Coated Alfalfa seed at a lighter rate than usual and have a very nice stand. From now on my orders will be for Gro-Coated seed.

Frank J. Fischer, Wacoma, Minn.

#### Gro-Coated Far Superior

I sowed all kinds of Gro-Coated seeds last spring. Also sowed some non-Gro-Coated seed, but your Gro-Coated seed was far superior. We got better stands, quicker growth and heavier foliage.

Mrs. A. E. Cerveny, Prairie Grove, Ark.

# Certified NEMAHA SEED OATS

## A Highly Disease Resistant Oat

The Nemaha is a comparatively new oat. It was developed through the combined efforts of Iowa, Nebraska and Kansas State Experiment Stations, along with the U. S. Dept. of Agriculture. Nemaha Oats is a selection from the crossing of Victoria-Richland X Morota-Bond.

Plant breeders, who set out to develop a new variety, must bear several important things in mind. For example, in the case of oats, they must make a selection which is highly disease resistant, yet they cannot sacrifice yields. This requires much painstaking work, usually over a long period of time. Varieties are chosen which are resistant to disease. Others are selected because of their high yielding ability, strong straw, etc. These varieties are then crossed. From this cross, different plants are selected which appear to have "captured" all the desired good qualities. These plants are carefully watched over a period of time. When one has "proven" itself, it is then increased for seed and released as a new variety. This is the careful planning which has gone into the developing of the Nemaha Oat. You'll be delighted with the beautiful quality of this grain. The grain is naturally big and meaty, and in our Blue Seal Processed grade (see page 6), you get the finest that money can buy.

## Outstanding Characteristics

The Nemaha Oat is resistant to Helminthosporium (Victoria) blight and to the common races of smut, crown rust and stem rust. It is an exceptionally heavy yielder of plump, high-testing grain. The straw is heavy and strongly resists lodging. Nemahas are about as tall as Clintons and about 2 to 5 days earlier in maturity. Generally the grain is light red in color but sometimes runs to a pinkish-ivory or yellow cast. The hulls are thin which means greater feeding value. There is plenty of straw. They stand up well, even when deep ripe.

## Get Your Nemaha Seed from Berry's

Farmers who have been buying their seed oats from Berry's, know that they can expect better quality stock. Better from the standpoint of superior grading. All thin oats removed, we ship you big plump seed. We carefully watch germination. You can be assured of strong, vigorous seed. Our seed oats are all graded by the "Blue Seal Process" and treated with the New Ceresan "M."

Take all these factors in consideration—then send your order to Berry's for careful handling. New varieties are always short in supply. To avoid disappointment, order now. **See Item #169 on Pink Price List.**

# Adams SOYBEANS

## An Outstanding New Soybean

The Adams Soybean got its start at the Iowa State Agricultural Experiment Station. It is a selection which resulted from a cross between the Illini and Dunfield soybeans. The same careful breeding was necessary that is explained above on Nemaha Oats. The other day, an old customer of ours, wrote us stating: "I can always count on you people to keep me posted on the new crop varieties." We take special pride in that statement. Yes, we employ a full-time research staff whose principal duties are to select new crops which are superior to older varieties. Our aim is to supply our customers with only the best seed available.

## Superior Characteristics

The Adams soybean is superior in a number of ways over other beans. Most Farmers are familiar with Lincolns. In comparison to that variety, the Adams is (1) superior in yield; (2) it ripens about a day earlier; (3) the height is the same but stands up better; (4) has more oil content; (5) is higher in protein. The Lincoln is still a good soybean and has done a wonderful job. But, when a new variety shows up with such outstanding characteristics, then it certainly is worthy of consideration. It is adaptable anywhere the Lincoln variety is recommended.

## A Tested Variety

Exhaustive tests were run on the Adams soybean before it was released for seed distribution. It consistently out-performed many well known varieties over a 4 year period. Therefore, when you plant Adams beans, you have the assurance of knowing it is a top variety. The Adams soybeans stand up very well which makes combining easy. Tests show high oil and protein content.

## Identification

The Adams soybean has white flowers. When mature, it has light

colored pods which are usually 3 seeded. The seed is pale yellow to whitish yellow.

## Seed Availability

Our Adams Soybeans are genuine certified stock. Good strong germination—high in purity. There will be a big demand for this outstanding bean. Seed stocks are not large. An early order will assure you of getting the amount you need. Show your neighbors how a really top variety performs. **See Item #180 on Pink Price List.**

Dear Sirs:

The Gro-Coated Hubam Sweet Clover grew to a height of 4 feet 3 inches when cut early in September and is making a new growth. Had wonderful germination.

Appleton, N. Y.

D. J. Mandelare

Gentlemen:

I have cut 11 acres of Honest John Alfalfa so far this year. I've cut about 20 tons from 2 cuttings and still have a third cutting to make later.

Bloomfield, Iowa

Palmer Hargrove

# Golden Beauty

BRAND

## Berry's Special EXTRA HEAVY CLINTON OATS

**Guaranteed to Outyield any  
other Clinton Seed Stock  
CLINTONS AT THEIR BEST**

We have done a lot of experimenting with seed Oats. Through this experimenting, we have developed a special grading process. Insofar as we know no one else has ever used this method in exactly the same manner or degree that we have used. This method removes at least 30% of the Oats from the average seed harvested. This goes far beyond the requirements for cleaning certified seed. This special handling shows up in the crop to a very noticeable degree.

### RESULTS OBTAINED

We sowed our Golden Beauty brand of Clintons next to certified Clintons and they looked like a different variety of Oats. The soil was the same, but the Golden Beauty brand stood about 6 inches higher in the field. Many farmers sowed those Oats and we have yet to hear from one who was not enthusiastic. Some of our most prominent farmers in this area who grow different varieties have told us our Golden Beauty brand Clintons were the best they had on their farm. Yield increases of 10 to 15 bu. per acre were reported.

In the official Story County Iowa yield contest, these Oats were first and about 15 bu. ahead of the second best which were Cherokee. Certified Clintons were third. Many farmers spoke to us early, to be sure of getting some more of this seed for next year. Very few dealers are set up to process Oats as we do our Golden Beauty brand. Those who have seen it grow figure they are money ahead by feeding their own crops and using this specially graded seed.

### CHARACTERISTICS OF CLINTON

A number of different Hybrids have been developed in the past few years. For a consistent performance over the largest territory, we consider the Clintons still in the first rank. Produced up to 123.8 bu. per acre. Fine, meaty, thin hulled grains. Strong straw that stands up even after grain is dead ripe. Widely adapted to different soils and growing conditions. Highly disease resistant. Resist smut, most traces of rust and perhaps most important of all, resistant to blight. That is what has caused such tremendous damage to many of the older varieties in the past few years. You can't afford to take chances. The extra profit in these Oats is a big thing.

### MORE BUSHELS PER ACRE GUARANTEED

In preparing our Golden Beauty brand of Clinton Oats all of the small weak immature kernels are eliminated. You get the strongest largest grain. They are the kind that make vigorous big healthy plants. It is true that a pound of this extra stock does not contain as many grains as the small seeded kind. Therefore you should sow at a fairly good rate of around 2½ bu. per acre. We have seen what these Oats can do, and back up our belief in their superiority with this guarantee. "Sow Berry's Golden Beauty Brand Clintons next to any other Clintons. Keep a record of yields at harvest time. If our Golden Beauty do not outyield the other, we will refund you the difference between what you paid us for our Oats and the cost of our ordinary non-certified Clintons." Therefore this brand will cost you no more than our ordinary Clintons unless they yield more per acre. You take no chance whatsoever on your extra investment. You have every assurance of getting much larger profit.

### GOOD GERMINATING SEED SCARCE

A lot of the Oats that were harvested last summer are not too strong in germination. Don't take any chance on sowing seed that does not test high and strong in germination. Our seed oats are largely of our own contract growing. Every lot gets a very accurate test, so we know they will grow well. The extra money that you spend for better seed, will come back to you several times over in the way of increased yields. Compared to some seed that will be sown this spring, it will mean the difference between success and failure. It will pay you to demand Berry's Golden Beauty brand. See Item No. 174 on Price List.

## OTHER CERTIFIED CLINTON SELECTIONS

### CERTIFIED CLINTON RE-SELECT

The Clinton Re-Select Oats is a variety or strain that has been selected from the original Clinton production because it showed improvement over the old. It is recognized as a distinctly different variety and is certified under this new name, Clinton Re-Select. Other States also have made such selections and called them by different names, such as Clinton 11 and Clinton 59 which are also described on this page. They are very similar to the Clinton Re-Select, but in our opinion the Iowa Re-select is the best of the three.

#### OUTSTANDING ADVANTAGES

This variety ripens more evenly than the ordinary Clintons. It has straw that stands up even after the grain is dead ripe. The grain has thin hulls giving higher feeding value. This variety is adapted to Illinois, Ohio, Indiana, Minnesota and to all of the spring oat areas.

#### STATE CERTIFIED SEED

Our Iowa-Re-select are all State certified seed. But please keep this in mind that Berry's certified seed is superior in grade to regular certified seed on the market. To meet certification standards, seed must have high varietal purity, free of noxious weed seeds and of good strong germination. However, it is not necessary to take out all of the small grains or to make a really heavy test weight that we do. You are sure to be well pleased with this outstanding Oat. See Item No. 177 on Our Price List. The seed is Blue Seal Processed (see page 6) and treated with Ceresan M.

Dear Sir:

I can truthfully say that I don't believe I could possibly get better service or seed anywhere else. I would recommend Berry seed to anyone.

Very truly yours,

Clarence W. Graham

Devon, Kans.

### CERTIFIED CLINTON 59

Different States have been working on the Clinton Oats to make some refinement especially in the way of more even maturity. They have endeavored to produce a better Oat plant selection, rather than through the special grading such as we use in our Golden Beauty brand of Clintons described at the top of the page. There is no question that this selection has brought with it improvement. The Clinton 59 is a selection that was made by the State of Indiana. The Clinton Re-Select described to the left was developed by the State of Iowa. The stock which we have is genuine certified Clinton 59 and is top quality, heavily graded, blue tag seed. See Item No. 175 on Price List.

### CERTIFIED CLINTON NO. 11

This is another re-selection of the Clintons. This one was made by the State of Illinois. These different selections tend to give more uniformity than is obtainable in the ordinary Clintons. The Clinton Oats as you probably know have been considered outstanding in many sections, although they did have a drawback which was one of uneven maturity. That is what the selections tend to correct. We do recommend them highly. The 59 and 11 are shipped from Chicago or Sparland, Ill., and are not treated in advance. See Item No. 176 on Price List.

Dear Sir:

I have bought all my grass from Berry's for the past 10 or 12 years. Have always been well satisfied. There is no question about saving money. I always receive my seed in due time, and in perfect shape.

Very truly yours,

Henry W. Engelen

Carroll, Ia.

# Our Production and Grading Improves Quality

## BLUE SEAL PROCESSED OATS ARE FAR SUPERIOR

This is not a simple screening mill cleaning. We start with that, but go many steps further. The Oats are graded for size. Then grains of equal size are separated according to weight. Each step removes more oats and in so doing makes better seed stock. They then go through a buffer and finally a chemical treatment, to provide a protection against diseases.

It is astonishing what a great difference this makes in the performance of a variety. The plants are heavier, taller, more disease resistant and yields are way above ordinary seed of the same variety that does not go through the Blue Seal Process. Try some side by side. We give this process to all our oats including most State Certified seed. You will find our seed priced very reasonably and the extra yields will more than pay back your investment.

Most of Berry's oats are chemically treated in advance. They come ready to sow. All of our seed oats, excepting Certified Clinton 59 and 11 are treated in advance with Ceresan M. This helps to kill disease organisms in the soil which may kill or weaken oat plants. In unfavorable seasons these organisms may be very damaging. All states advise seed treatment. The two varieties mentioned are shipped from another plant where facilities for advance treatment are not available. Remember about treatment in comparing prices and also that you get Blue Seal Processed Oats.

## ANDREW

The Andrew Oat was developed by the Minnesota Experiment Station and is a cross of Bond X Rainbow. When we speak of crosses used in Oats, do not confuse this with crosses such as those made in corn. In corn, we have inbred varieties and cross them. Such seed cannot be replanted the second year. On the other hand these Oats work entirely differently. You can sow the seed year after year. It does not run out. It will remain the same so long as you exercise care in getting good heavy seed stock.

The Andrew Oat is classified as an early variety under Iowa conditions, showing an average straw height of 36" with a very heavy test weight per bushel. The grain is of yellow color. There are practically no awns on the grain. It has a medium stiff straw. On account of its earliness it has been very popular in Iowa, Kansas and Illinois. The average yield for Iowa is 85.7 bushels per acre. While it is susceptible to races 8 and 10 of stem rust, its heavy yields and good test weight have made it quite a favorite in a number of areas. Our supplies of the Andrews are non-certified, but they have been put through the Blue Seal process which assures you of getting a very high grade. The price also includes the treatment. Whenever you buy your seed oats from Berry's, you are assured of getting that variety at its best. See Item 173 on Price List.

## CHEROKEE ★

### One of the Very Best Early Oats Resistant to Crown Rust Races 8 and 45

This variety has the same parentage as the Clintons, however, it is a different selection and has somewhat different characteristics. The regular Clinton is resistant to most Crown rust with the exception of 8 and 45. Race 45 is showing up in some sections and here the Cherokee should show up distinctly superior.

The Cherokee is also earlier in maturity and ranges from 4 to 5 days to as much as a week earlier. The kernels are very plump and compact. The grain has an ivory color with sometimes a pinkish tinge. It has the nicest grain quality of any we've seen. We mean, the crop as it is harvested on the farm is heavier. Because of its earliness it is a great favorite in sections of the south where they like an early maturing Oat. Kansas especially likes Cherokee. It is frequently true that even farther north Oat yields are sometimes reduced rather drastically because of hot weather coming in before the grain is fully matured. Then the grain does not fill and yields are very disappointing. Therefore we consider the Cherokee Oats one of the best all around Oats that can be grown year in and year out, throughout the spring grain section. We consider it good even in States to the north of us. Another surprising factor is the feeding value of these Oats. In a test made at the University of Nebraska Experiment Station, in co-operation with the Federal Plant at Ithaca, the Cherokee showed 15.1% protein and 9.2 B1. This was materially higher than the Clinton being a full half percent higher in protein and .07% higher in the B1.

We are giving these Cherokee Oats a very heavy grading, as explained in Blue Seal Process above. It is truly a wonderful product. You will be indeed proud of the seed that you will receive from us when you buy these Cherokee Oats. Big, plump, heavy meaty kernels, thoroughly re-cleaned.

See Item 170 on our Price List for Quotations.

## COLO

### A White Oat of Distinctive Character Resistant to All Common Races of Rust, Including 45

The parentage of the Colo is quite different from that of most of the Hybrid Oats that are now on the market. It is a cross of Hancock X (Morota X Bond). This cross was made with the specific purpose of combining the stiff straw resistance of the Hancock with the high yield and rust and smut resistance of Morota X Bond selections. This, like the Cherokee, is also resistant to all common races of Crown Rust including Race 45 and similar races which may attack Clinton and other Bond offsprings. In addition to that it is also highly resistant to the common races of both smuts. This disease resistance is a factor that will be extremely important in years when some of these other diseases strike.

In maturity, the Colo is a little later than the Clintons. It may be as much as 3 days later, although that would depend somewhat upon soil and weather conditions. Also it has a little taller straw than the Clintons. This is a decided advantage in many sections. The Colo Oat is also a very strong strawed oat, and in lodging resistance, it seems to be equal if not superior to the Clintons. It has an open type head and is a very good yielding Oat.

The question is sometimes asked do Oats "run out." The answer is definitely no. It is true, however, that new diseases or new strains of diseases may come in, which were not present when the variety was first introduced. That is when in some areas the regular Clinton may not seem to do quite as well as they did before, although that is mostly due to the weather. With the greater disease resistance of the Colo you have better assurance of additional resistance. Another important factor is proper grading. Our Blue Seal Process explains this (above). We make a specialty of Oats here at Berry's and take great pride in the quality of seed that we produce and sell to our customers. That is the kind of seed that will give you the best possible assurance of fine stands and big yields.

See Item 179 on Price List for Quotations.

Twenty Years of Satisfactory Dealings  
Eaton, Ohio

Dear Sirs:

I have bought Berry Seeds for almost 20 years and have been more than satisfied. You have fine values and they are always at reasonable prices.

Sincerely yours,

Myron S. Burch.

Finds Seed Exactly as Advertised

Fulton, Ill.

Dear Sirs:

I have used your seed for a number of years and have always found it very satisfactory. We have always been able to depend on the seed being exactly as you have advertised it.

Very truly yours,

Robert W. Lockhart.

You've Never Grown a Hybrid Like...

# Berry's NEW "25" SERIES

COMBINING ALL THE OUTSTANDING  
FEATURES THAT GO INTO MAKING  
A FINE HYBRID

The miracle of progress towards better Hybrids never stops in the Berry Organization. On pages 8 and 9 of this book there are Hybrids that we have had for a number of years. There are two of the old varieties. The others are improvements over the old and they are good. They are outstanding. We expect to produce them for many years to come, for reports indicate they are far ahead of most varieties on the market.

## THE "25" SERIES ARE A FURTHER ADVANCEMENT

Two years ago we offered these new varieties for the first time in a limited way. They were distributed over a wide area so as to get a big range of soil and seasonal changes. In Iowa, very strong winds caused a lot of damage resulting in a tremendous amount of ear droppage. You should have seen how these new varieties stood this severe test. Not only did they hold their ears better, but they produced the best yields of high quality corn we have seen so far.

You should by all means, grow some of this 25 Series. If you can get corn that is better than the best you have been growing, I know you want it. The best way to prove that is to actually grow it side by side. We are staking our reputation as Hybrid seed corn producers on the fact that over an average of 3 years or more these varieties will prove the most satisfactory and best money-making corn you can grow.

## "825"

**A 115 to 120-Day Variety** This is a Hybrid that can really take punishment and still produce a wonderful crop. The strong, sturdy stalk is a little shorter than the average in this maturity class. That's what lots of farmers are looking for. They stand up exceptionally well. It has a very strong ear shank so that the ears hang on unusually good. That's a big advantage where there is a lot of corn-borer damage or when strong winds hit the field when the crop is mature. More important is its heavy yield, the depth of grain and the fine feeding quality of the corn. It has about the same maturity as our 813.

Customers reports are coming in from many sections praising the performance of Berry's 825. Farmers tell us that neighbors stop them to ask what kind of corn they have because it looked so much better than any other. In this day and age, you really have to have something very much better to cause such comment.

You do not have to have the best land, however, for 825. It will do well, even on the lighter soils. We consider it adapted to a wider range of soils and climatic conditions than any other Hybrid in its maturity class. For the sake of your own profits learn from actual experience on your farm just how fine and wonderful this 825 can be. Grow it next to the best, for we are confident it will out-perform them all.

**Med. Large Flat**  
**\$10.30 Bu.**

**MED. SMALL FLAT...\$9.30**  
**MED. LARGE ROUND...\$8.00**

## "625"

**110-Day Variety** This variety gives excellent results under a wider range of soils and climatic conditions than any other Hybrid we know about. It is a little earlier than 825, but still is adapted as a top-yielding corn in the 120-day area. This corn can be grown from southern to north central Iowa and similar areas across the nation. In Missouri and other areas, farmers wanting a corn for early maturity or later planting will like 625.

### Stands Wind and Weather Damage

Farmers living in Iowa can well recall the strong winds that occurred 2 years ago just as corn was maturing. The result was disastrous. Entire fields in many instances were leveled. Ear droppage was terrific. But, this was the year that Berry's 625 was introduced.

Farmers who planted this number were amazed how it could withstand these strong winds. They had a good harvest. The proof was there before their eyes. They knew they had a superior Hybrid. These farmers re-ordered next year's supply immediately. Their neighbors did too.

Furthermore, the corn can be grown with good results on almost any type of soil. It's a fine corn for a picker. It will stand a lot of dry weather. The grains have good depth. The shelling percentage is excellent.

**Med. Large Flat**  
**\$10.30 Bu.**

**MED. SMALL FLAT...\$9.30**  
**MED. LARGE ROUND...\$8.00**

## "425"

### 90 to 95-Day Type

#### This Is the Earliest of Our "25" Series

It is adapted to northern Iowa, southern Minnesota, and Wisconsin, eastern South Dakota, northern Illinois, and all areas having similar climatic conditions. It makes a great main crop variety in this area and a fine corn for late planting or early feeding corn in sections farther south. It is about 5 days earlier than our 405.

This is the earliest variety we have and we do not know of anything in its class to surpass it. The plants are very strong and sturdy. They have a broad leaf and make a vigorous growth. This sturdy vigor helps the crop overcome unfavorable conditions. For example we had a field growing in an area that was very seriously hit by drought. We did not expect much of a yield. It made twice as much as we had anticipated.

Berry's 425 also has a strong ear shank which prevents ear droppage. That is becoming more and more important because corn borer infestation is becoming widespread. One of the most damaging effects of corn borer is ear droppage, and a strong shanked ear can be expected to have much less loss. This also is an advantage in seasons of high winds at maturity time.

**Med. Large Flat**  
**\$10.80 Bu.**

**ASSURANCE OF**  
**VIGOROUS**  
**STANDS**

Dear Sir:

We have been using Berry's Seed on our farm exclusively and find no other seed like it. Your 813 is doing exceptionally well in spite of bad weather. Sincerely, Mitchell A. Dupoux.

Westville, Ill.

Gentlemen:

I find your seed exactly as represented and at a savings which means a lot at seed buying time. Your No. 813 Hybrid Corn was the best I ever raised.

Yours very truly, Winston E. Fellers.

Tulsa, Okla.

# CORN

FOR

# Top Yields

ON

# Different SOILS

All Our Corn Is "GRO-COATED"

## BERRY'S 800

A Top Quality Hybrid

One of the best in 120 day class

This great Hybrid can be grown wherever U. S. 13 is adapted. We consider it superior to that well known number in several respects. It is a little earlier which is a definite advantage in some years. It also makes the variety adapted to a wider area. It also holds its ears better. That is becoming a more important factor now that most corn is picked mechanically and that corn borer damage is more widespread.

This corn has an unusually high shelling percentage. The ears are perhaps not quite as long as U. S. 13 but when you shell out a wagon load of equal size, you will have a lot more corn out of Berry's 800. And it's mighty fine feeding corn, too. You want the highest number of pounds of shelled corn in your bins. That's when it counts most. There is a large acreage of this variety growing in this country. We have yet to find a farmer who has not been highly pleased. When grown next to the best it proves its real superiority.

The Berry's 813 described in the opposite column is similar to this, excepting that we use an additional cross on the male side when we produce it in our fields. Either one of these is a Hybrid that up to now are among the finest available. Our new 825 (page 7) has some extra features, but is still in limited supply. For maximum results on a wide range of soils you will find our 800 a splendid investment.

The Hybrid grown with Extra Inbreds

## BERRY'S 813

Has recorded yields of 159.1 bu. per acre

This sensational yield was obtained on regular farm land without any fertilizer and planted at a normal rate. It was grown on the farm of Harry Stout near Clarinda. You may hear about big yields, but most of them are secured on "souped-up" or heavily fertilized land and planted 50% heavier than normal. This 813 is a truly exceptional performer. We have other reports of witnessed "yields" of 190.36 bu. per acre by Andrew K. Hordon of Decorah, Iowa; 146.57 bu. U. S. Cewcomber, Auburn, Ind.; 146.57 bu. from Green City, Iowa; 131.64 from Lakewood, Ill. That indicated the wide adaptability of Berry's 813.

In producing this corn in our seed fields we use our regular 800 formula and add a certain percentage of another line on the male side. This provides some later pollination so it prolongs the pollinating period of the corn you grow. This is an extra insurance feature that is a vital factor in years when hot weather burns the pollen of the regular lines. Customers say they consider there is extra Hybrid vigor in this 813. We know that it gives you better assurance of well filled ears. The yields it makes under various conditions is proof that it does have something "extra."

Berry's 813 is a 120 day Hybrid. It is a single eared, deep grained, strong stalked Hybrid. Has less ear droppage than U. S. 13. It is a vigorous grower. It is resistant to chinch bugs and disease. It is tolerant to corn borer. Byron Rogler of Atlantic, Iowa, said it was far superior to other varieties he grew in retaining its ears when borer damage caused heavy losses. 813 is a fine feeding corn. Be sure to grow some. Plant it next to the best for by test we are sure it will outyield the rest.

## BERRY'S 405

A VERY HEAVY PRODUCING  
EARLY MATURING HYBRID

This is a Hybrid widely adapted from Northern Iowa where early maturity is required down to Southern Oklahoma where they want a corn to get out of the way of hot weather. This gives you an idea as to its wide adaptability. One of the most prominent farm operators in Northern Iowa at Spencer wrote us, "You have the show field in this part of the state, you don't have to take a back seat from anybody on this Hybrid." Down at Tipton, Oklahoma, a banker had some of his customers try out some of Berry's 405 and he writes, "I am thoroughly convinced—you have made a believer out of me. People came from miles around to see this corn."

405 makes a nice leafy growth, has kernels of good depth, and the ear size is very satisfactory for a corn of this maturity. The big feature about 405 of course is its tremendous yields. That is where the extra profit bushels

95 to 105 Day type

come in. 405 grows vigorously in the spring. Corn that gets off to a good start, generally is a jump ahead of the average. This 405 has outyielded later maturing varieties and some by a big margin. Because it has a tall, leafy stalk, it can be used to advantage for ensilage or shredding. We consider it second to none in its maturity class. It does well on a wide range of soil. It is not quite as early as our new 425, but it is somewhat earlier than the 615 and 625. We are providing our trade with varieties of different maturity dates so that you can obtain from us whatever types you need for practically every section and every kind of soil. This corn is all carefully graded for accurate planting. You will find 405 an outstanding Hybrid.

## BERRY'S U. S. 13

Figures deep grain 120 day Hybrid

Practically all farmers from Colorado to the Atlantic Coast know U. S. 13. It is grown in North Central, Southern Iowa, Northern Missouri, Kansas and all across the Nation. The thing we want to emphasize is that all U. S. 13 Corn is not equally good in production. Seed stocks from one producer may out-yield that from another by as much as 15 bu. to the acre. Berry's give you U. S. 13 at its best, and such seed is worth double the price that we are asking when you judge from the standpoint of results. Better seeds will boost your yields.

Everything Very Satisfactory

Gentlemen:

Plainfield, Ind.

The seeds we have bought from you have been satisfactory in every way. I especially like the fine handling which you give to my order.

Sincerely, Carl E. Meisel.

## BERRY'S 939

105 to 110 days Maturity

This is one of the older Hybrids but still the choice of many farmers, especially those having thinner land. It is adapted to a very wide area. It is grown in Iowa from the Northern to the Southern border. It is similar to our 615 in maturity. Has a medium rough kernel. The corn is deep yellow with a reddish tinge, on the sides of the grain. A Michigan customer reports that it yielded 149 bu. to the acre. Colorado reports 132.1 bu., Illinois 107.8. It is good in Pennsylvania and similar areas. Berry's own 939 gives you this variety at its best.

Recommends Quality, Value, Service

Dear Sir:  
I have used your seeds exclusively for the past few years, and have always found them to be as advertised. I would not hesitate to recommend Berry's to any of my farmer friends as far as quality, values and service is concerned.

Yours truly,  
Milo L. Gould.

# BERRY'S SEED CORN GIVES BEST ASSURANCE OF EXTRA PROFITS

## BERRY'S 613

**A Beautiful Big Yields  
For Richer Soils  
112-115 day type**

This is just a little later than our 625 and a little earlier than our 800 or 813. On land of good fertility it is a sensational performer. Grows a strong stalk with dark green foliage. Starts fast in the spring and is a vigorous grower throughout the entire season. A field of Berry's 613 certainly attracts the eye. The husks will dry while the stalks are still green. It gives you full ear development. The ears are large and have deep grains. Bears one ear to the stalk. Has a rich yellow color. This variety should do well as far north as central Iowa, and as far south as central Missouri and in areas of similar climatic conditions. It can go even further south as an early maturing variety and north for ensilage. We do not recommend it for thin land. On good land we believe it will outyield all others of similar maturity excepting our 625, which has the advantage also of being a little earlier. Good for machine and hand picking.

We would like to see you grow some of this corn. In comparison with any other Hybrid of similar maturity its performance in the field will prove its value.

### "Gro-Coating"

is your assurance of

- ★ Better Stands
- ★ Larger Yields
- ★ Extra Profits

There is a tremendous advantage in planting "Gro-Coated" farm seed. You have to see this seed growing on your own farm to appreciate its value. Farmers have written us from every state saying that they could not believe such a large difference existed. Many made test-plot seedings for comparison. The results were astounding. Gro-Coated seed actually produced a larger number of plants and they were more vigorous, thrifty and stronger. "Gro-Coated" seed can very well mean the difference between a good healthy stand and weak plants and low yields. Our seed is "Gro-Coated."

Pages 2 and 3 of this catalog give a good description of "Gro-Coating." We suggest that you read this information again. It is extremely important. Tell your neighbors about it. They'll thank you for introducing them to this tremendous step forward in farming science.

## BERRY'S 615-B

**A Big 105 to 110 Day Corn  
Adapted to Thin and Rich Soils**

This is a splendid, heavy yielding Hybrid for one so early in maturity. It is earlier than 625 and just a little later than 405. It is more widely adapted than any other variety in this class. Early maturity adapts it to a wide range of climates. Farmers in northern and north central Iowa, and from Nebraska on east to Illinois, Indiana, Ohio, Pennsylvania, West Virginia, etc., will find this an excellent main crop variety. Farmers to the south of this area consider it one of the finest corns they can plant to get some early feeding corn, or where necessity compels late planting. Also in some areas its early maturity helps it escape hot, dry weather. We had one field near Clarinda that made dry corn of a yield of 110 bushel to the acre. It is somewhat similar to 939 but it makes a larger, better formed ear, holds its ears better and has superior husking qualities, as well as stronger stalks. For an all around purpose corn you will find this hard to equal. The 625 is superior in some respects, but also is just a little later. The ability of our 615 to grow under so many different conditions of soils and climate make it a dependable variety on which most any farmer can thoroughly rely.

**Medium large flat**  
**\$9.80 Bu.**  
Med. small flat \$8.80  
Med. largesound \$7.50

# A HYBRID PLANTING THAT OFTEN OUTYIELDS EVERY OTHER BERRY'S HYBRID BLENDS

## The Reason for Making Blends

Most Hybrid corn varieties have a shorter pollinating period than the old open pollinated corn. The old open pollinated corn was a mixture of many varieties. In making Hybrid Corn, inbreeding eliminated these varieties so that the inbred was a single pure line of corn. In making a Hybrid, four of these inbreds are combined. However, the pollinating period of such a Hybrid is shorter. In event that hot weather hits when it is pollinating, a lot of the pollen will be killed which will result in poorly filled ears. The silk on the ears will remain receptive to pollen for quite a long period of time. Therefore, by prolonging the pollinating period we get greater assurance of well filled ears. Even though hot weather should kill the pollen off of one strain there is always the other one to still come along with pollen a few days later to fertilize the ears. Thus by using two or three varieties of Hybrids that mature about the same time, and yet have slightly different pollinating dates, we prolong the pollinating period.

## Low Seed Cost—Big Yields

Berry's Hi-Yield Blends are made from the varieties that are listed in this catalog. We make our prices low as an added inducement to get you started in trying these Blends. The cost is less than half that many companies are asking for seed corn and we have priced it drastically below our regular prices. We believe

**Round  
Kernels**  
**\$4.25  
BU.**

Not Available  
in Large Round

**Thick  
Flat**  
**\$4.75  
BU.**

Comes in One  
Size Only

**Small  
Flat**  
**\$5.25  
BU.**

## Guaranteed Quality—Two Grades of Flats

We make up our Blends in three grades; the Thick Flat grade, this is made up of Kernels that are too thick to make the Regular Flat grade but too long to be classified as Round. This type of corn makes a very strong vigorous plant. Then we have a Small Flat grade which is more like the Regular Flat only shorter. It will produce as fine a corn as any and a bushel will plant more acres than any other grade. All of these are graded to plant accurately.

## Round Grade

This is made up of the regular round kernels. Seed of this kind often produces more vigorous plants and therefore better yields. It is graded for accurate planting and you can make big savings.

## Two Blends

**110-Day.** This is what we call our Medium maturing Blend. It may vary from 100 to 110 days. The later 120 day Blend is about ten days later in maturing. Will mature in 110 to 120 days. Both are excellent. Please specify which Blend you want and whether Round, Thick, Flat or Small Flat. Prices are shown herewith.

## High Quality Good Germinating Seed

Dear Sir:  
I have bought Berry's Seeds for several years, and find them to be of high quality and good germination. They have been very satisfactory.

Sincerely, Alfred Erbe.

Altoona, Kan.

## Splendid Yields—Well Satisfied

Dear Sir:  
I am writing just a few lines to let you know how satisfied I was with your seed. I had a splendid yield this year.

Yours truly, Vernon S. Eley.

Harrod, Ohio.

**SPRING GRAINS** that are Popular **MONEY MAKERS**

# SPELTZ

*A Great  
Drought  
Resister*

## PRACTICALLY RUST AND SMUT PROOF

This picture shows what this remarkable grain looks like. It is really a type of wheat. It is very nutritious. The shucks cling to the two grains each carries. Grain is a little softer than most wheat. Makes wonderful ground feed. It yields well and is a very profitable crop under dry conditions. The grain is highly resistant against most races of rust and practically immune to smut.

Speltz is one of the oldest grains known to mankind. Apparently it was grown in prehistoric times. German-Russian immigrants introduced it into the United States. The Speltz we have is for spring seeding. It is grown from Canada to Texas. Iowa, Minnesota, Wisconsin, Michigan and states to the east are growing it as well as Western states where drought conditions are most apt to prevail.

Speltz is valuable as a nurse crop as it has very strong straw. It matures early. Sow 2½ bu. per acre as early in the spring as possible. Cut before dead ripe. Thresh about like Oats. See Item No. 202 on our Pink Price List.

**"GRO-COATED" FARM  
SEEDS PRODUCE  
BETTER STANDS**

# Spring BARLEY

## WISCONSIN 38 THE BARBLESS BARLEY

This is one of the finest varieties you can grow. That is why it is so popular. Produces big yields. Fifty bushel per acre of rich body building food are obtained. That is 2400 lbs. or equal to 75 bushel of oats. Pound for pound we prefer barley for feed. It is extra good for hogs. Builds nerves, muscle and sinew. It puts on fat.

Barley is rated by many farmers as the most profitable of spring grain crops. This Wisconsin 38 is grown over a wider area than any other variety we know about. It has awns or beards. However, there are no barbs on them. They are as smooth as straw. That makes it nice to handle and the straw has greater value. The straw of this variety is quite strong. It makes an excellent nurse crop for grass and clover seedings. It is a Malting Barley.

All our Barley varieties listed here are for spring sowing. Put it in as early as possible using 2 bushels per acre. It should mature in central Iowa about July 15th. Grow better barley; make bigger profits by sowing better seed. Order it now. Supplies of good seed barley are short this year. That is why we ask you to buy early. See Item No. 191 on Price List. If you mislay our Pink Price List write us. We'll send another promptly.

## NEW SENSATIONAL

# MOORE

The sensational new spring barley. High yielding, stiff straw and a disease resistant variety of Hybrid origin. It has three parents. It will not run out. You can keep on replanting it year after year. It is a white, six row, smooth awned, spring barley. It has outstanding malting qualities. The hulls are thinner and stick tighter than the Wisconsin Barbles. The awns which are rough at the top break off very easily during thrashing. The straw of Moore is thicker. It stands up better than the average variety. A 5 year test at Madison, Wisconsin, shows that it has outyielded the Wisconsin Barbles by 6%, Oderbrucker by 12% and other tests show that it is 39% over Oderbrucker and 28% over Kindred. Yielded 57.2 bushels in Wisconsin.

This Barley is recommended for soils of medium to better than average. On thin land the Wisconsin 38 would be better. Moore Barley is adapted to a wide area, Iowa ranks it first in malting varieties as does Minnesota. Wisconsin, as explained above, said it yielded more than 38 and lost less. In North Dakota it led all malting varieties in a two year test. Illinois says it is one of the most promising varieties. Michigan says it is resistant to mildew and scab. New York says that Moore Barley gives excellent results. It is resistant to stem rust, spot blotch, root rot and mildew. It is disease resistant and has wonderful malting qualities. It is one of the most outstanding Barleys that you can plant. See Item 192 on Price List for Quotations on Certified Seed.

## MONTCALM

yields that are obtained. Montcalm is an accepted malting variety of Barley. This Barley seems adapted over a wide area, even in Central and Southern Iowa it outyielded those great varieties like the Wisconsin 38, Odessa, Mars, Kindred, and Peatland. It also showed a two pound heavier test weight per bushel. That in itself indicated the great value placed upon it by farmers who saw it growing. It is just as fine today. In these days of lower prices, increased production per acre is the only way to get more profits. It takes better seed to help you get these greater yields. Our heavy cleaned Montcalm Barley will help you get that job done. You will find such seed a wise and sound investment at our present low prices. SEE ITEM 190 ON LIST FOR QUOTATIONS.

This is also one of the newer Barleys and in some areas it may even out perform the new Moore Barley. This is a six row, smooth awned, spring Barley. The straw grows erect, it is fairly tall, the grain is of medium maturity. It ripens about two days ahead of the Wisconsin 38 and has about the same length straw. It has greater resistance to disease than most of the older varieties. It is this disease resistance in these new varieties that apparently is responsible for the increase in

## For Best Results, Plant Only "GRO-COATED" Seed

Good Seeds and Nursery Stock

Canon City, Colo.

Gentlemen:

I wish to state that Berry's Seeds are very good, not to mention your prompt shipping service. Also, your nursery stock is the best I ever used.

Very truly yours, Frank Dilley.

Two Generations Endorse Berry Seeds

Dear Sir:

I have planted Berry's Seeds for several years, and I have always been very pleased with the results. My father used your seeds when he was farming, and I know from experience that they are good.

Your customer, Walter K. Ewbank.

# MIDA

## The SPRING WHEAT

WE RECOMMEND ABOVE ALL OTHERS  
FOR YIELD AND QUALITY

There is a big demand for Wheat  
Get in on extra profits by growing Spring Wheat  
**"Selected Northern Grown Seed"**

We have chosen this variety because year in, year out we believe it is the best of all. You may find some variety for which this or that is claimed. Some years under some conditions they may measure up. We believe you want a variety that will most consistently give the best performance. One that is most certain to give you big yields of high quality wheat. In our opinion this is it.

This heavy yielding high quality spring wheat is a great favorite in the spring wheat area. It has practically crowded out the Thatcher because that variety is so susceptible to leaf rust. Rust in some years almost completely ruins wheat crops. The Rival also ranked high in popularity for some time but most growers are switching to Mida because it has a somewhat stiffer straw and is less subject to loss from shattering.

### A Very High Quality Wheat

In many tests Mida has shown a higher average yield than Pilot, Rival, Thatcher and Renown. Also it is definitely superior to the old Marquis and has outyielded the Newthatch. Mida is a bearded wheat with high resistance to both leaf and stem rust and to stinking smut. The kernel is large, dark red in color and the grain has a high test weight. It has very satisfactory milling and baking qualities.

The story back of the development of Mida wheat by the North Dakota station involves tracing many varieties and crosses. The important fact is that it has made available to you a spring wheat that is definitely superior in practically all important characteristics. It is a wheat that will help you make more money.

The seed we have is northern grown which is the most desirable. The seed is heavy weight, re-cleaned, high germinating. Such seed is always the most economical. Sow 1 1/2 bu. per acre. Early spring seeding is advisable. Our Wheat is not treated. See Item No. 199 on Price List—Write Us if Price List is Mislaid

## BUCKWHEAT

You can often turn acres that might be wasted into big profit makers with Buckwheat. Land that has been flooded can often give you a good return. Acres not otherwise used can be sown to it. It is a quick-growing grain crop. Matures in 10 to 12 weeks. Excellent catch crop. Sometimes sown after small grain so as to get two crops from the land. Good cover crop for orchards. Makes land mellow. Good for bee pasture.

One of the best crops for very poor soils. Responds to increased fertility. Does not like lime and should not be sown on very wet land. Can be grown most anywhere north of the cotton belt. Prefers cool weather, especially at blooming time, but is sensitive to frost. Prepare a good seed bed. Sow 3 to 4 pecks per acre. Yields up to 50 bu. per acre depending on conditions. See Item No. 203 on Price List. Postpaid 1 lb., 30c; 5 lbs., \$1.00.

## FIELD PEAS

We are often asked, "What can I sow early in the spring that will make me a big hay crop this year." The answer is Field Peas. They make wonderful feed too when cut and fed green. They can be sown as early in the spring as the ground can be worked. Disc or harrow in a bushel of Peas with two bushel of oats. Peas are vine-like, the oats help hold the crop erect. The crop will come on fast. Cut the crop for hay when the oats are in the dough stage. The production is very heavy and feeding value very high. The crop is very fattening. Increases milk production. Excellent for hogs. Solves the problem of early green feed or hay as no other early crop can do. Fine to plow under for soil enrichment. Inoculate your seed. See page 27. Seed supplies limited. See Item No. 189 on Price List.

Note—Do not confuse these with cowpeas which want warm weather. Field Peas want cool weather.

## WILT RESISTANT

# FLAX

## FOR BIG SEED PROFITS

The great need for linseed oil is keeping the demand for flax seed very high. Prices should remain at high levels for some time. With yields of 12 to 18 bushel per acre you can see flax can be a highly profitable crop.

Flax is easy to grow if you sow it on relatively clean land. When sown early in the spring on a firm seed bed it is easy to get a stand. Requires 3/4 to 1 bu. of seed per acre. Flax is a wonderful nurse crop for grass and clover seedlings because it does not shade the ground too much. By growing the crop on soybean land or following a corn crop you will have land quite free from weeds. Can be grown in most of the spring grain area where rainfall is 25 or more inches per year.

### Flax Is Widely Adapted

Flax is now being grown over a much wider area than a few years back. New

#### Blue Ribbon from Berry's Seeds

Dear Sirs: Clear Lake, Wis.  
I got a blue ribbon at our fair on the Clinton Oats I got from you. They sure are swell and the best Oats I ever raised.

Yours truly,  
Ole P. Korsbon.

Wilt Resistant Varieties make it profitable where the older kinds were failures. There are a number of good varieties.

Dakota. We have handled a number of different varieties of flax in the past. The Dakota has shown itself to be so outstanding that we are offering it exclusively.

It is a relatively new variety. It has outyielded all other varieties in a series of Iowa tests and rates very high in Minnesota. In official tests it was the top yielder of all varieties in practically every instance. In six tests of nine varieties it was only excelled once and then by only 3/10 of a bu. It outyielded some by six bushels per acre.

The seed is brown, medium sized and produces a very high grade of oil. It is early to mid-early in maturity. You will find it a thrifty grower and widely adapted. The plants are highly resistant to rust and wilt. Farmers who have grown Dakota want no other kind. This seed is not treated or Gro-Coated. See Item 200 on price list.

#### Always Boosts for Berry Seeds

Dear Sir: Moorehead, Ia.  
For the past 25 years I have purchased all my field seed from you. I have always been perfectly satisfied. Your seeds are all anyone could ask for. That means perfect quality. I'll always boost for Berry's Seeds, both field and garden.  
A satisfied customer, Lewis W. Shepard.

# SWEET SUDAN GRASS

**DELICIOUS, NUTRITIOUS AND ENORMOUSLY PRODUCTIVE**

**It's New! It's Different! It's Better!**

Since this new Sweet Sudan Grass has come on the market it has gained very rapidly in public favor. In making Sweet Sudan the Common or Regular was crossed with Leoti which is a heavy yielding sweet, juicy sorghum. This crop had high resistance against disease and also shattering of seed. Sudan was finer stemmed and stools more freely. It makes wonderful hay but is not sweet. In making the cross the best of these two crops was put into one. It grows very much like ordinary Sudan. It stools even more freely and grows taller. The leaves are a little broader. It is a sensational yielder, and in reports that we have it has outyielded the Regular or Common Sudan by 30%.

**"GRO-COATING"**  
is low cost  
assurance of  
better stands

## A Very Palatable Fast Growing Crop for Pasture and Hay

You Plant this after the seed bed is warm as described below under How to Handle Sudan Grass. You can get two or three cuttings of hay in a year. It remains palatable over a long time and you do not have to cut it at any certain stage. Even if you let it stand for seed it makes good feed. It has a delicious flavor and because of its sweeter content, a higher feeding value. Notice the photograph at immediate left. The cow eats the Sweet Sudan down to the ground while it nibbles the tops of the Regular. Sweet Sudan is a little later in maturity than Regular Sudan. It maintains its high feeding value in pasture up until frost. It is a great heat and drouth resister. It gives you sweet, palatable juicy food when many grasses are becoming dormant because of heat. Pasture it after it gets around 10" high.

## Sudan Grass Seed Scarcer This Year

Due to unfavorable weather conditions the production of both Sweet and Regular Sudan Grass has been very sharply reduced. As a result you may be looking for higher prices. Sow around 20# to the acre and we strongly recommend that you use Gro-Coated Sudan because that withstands unfavorable weather conditions at planting time so much better. Our prices include Gro-Coating. Small lots postpaid: 1 lb. 40c; 5 lbs. \$1.60; 10 lbs. \$2.85. See item 231 on price list.

Photo on right shows how cattle will eat Sweet Sudan very close while nibbling on regular Sudan.

### Best Crop I ever Raised

I have the best crop I ever raised of Alfalfa. Clipped the crop after oat harvest. The 1st of September, it was knee high again. Used 3 pounds less seed per acre. I will insist on Gro-Coated seed. A. Nevenschwander, Grabill, Ind.

### Likes Gro-Coated Seed

I will want my seeds treated in the future. They gave better stands and more vigorously growing plants. I will gladly pay the extra cost to get my seed so treated.

J. S. Jarboe, Pratt, Iowa

### 100% Better Stand

I sowed Gro-Coated seed last year. It was the best seeding I had in my life. It is twice as thick as it needed to be, and was 2 feet high when I cut the wheat. It made 100% better stand. I wouldn't sow any more seed unless it was treated. L. McWilliam, Deerfield, Minn.

# REGULAR SUDAN FOR QUICK DROUGHT RESISTANT GRASS

## A Fast Growing Crop That Is Widely Adapted

Sudan grass belongs to the Cane family, but it is finer stemmed and a free stooler. It grows from 4 to 7 feet high. It will yield 4 to 7 tons of cured hay per acre. It has good feeding value. Livestock is very fond of Sudan. The first hay crop can be cut about 60 days after seeding. Second and third crop 30 to 40 days apart. You can sow it around corn planting time or just a little after, which will indicate how quickly you could get a valuable feed crop. Sudan is one of the best drouth resisting grasses known. It stands a lot of heat. It supplies an abundance of fine pasture or hay during the dry months of summer when feed is often scarce. Since it yields so heavily you do not have to devote many acres to get a lot of feed from Sudan grass. It provides feed insurance, that is why every farm should have some of either the regular or Sweet Sudan.

## Buy Your Seed Early This Year

The seed we have for our early trade is of the very finest quality. Our prices, as this catalog goes to press, are low, and we hope to keep them there. But we do recommend that you buy early to be assured of getting this high quality seed at these prices. We guarantee you a saving on the Sudan Grass seed that you may purchase from us. The true basis of value is the quality that you receive. We know that you will be delighted with the character of stock that we have for you. Sudan Grass is quite easily hurt by cold weather after seeding. Our Gro-Coated seed gives you much greater assurance of satisfactory stands.

**"GRO-COATING"**  
gives you more  
plants per square  
foot. See Pages  
2 & 3.

## How to Handle Sudan Grass

Do not sow until corn planting time or after. Prepare a good seed bed like that for Corn. Drill in close rows or broadcast. Cover the seed about an inch deep. Sow 20 to 25 lbs. per acre. Begin pasturing it when it is about 10 inches high. It can be pastured until frost. Many consider it best not to pasture Sudan after frost as there is some danger of prussic acid developing in young dark green growth that may start after periods of extreme drouth or after frost. Generally cut for hay when in bloom, but can be cut earlier or later. See item 230 on price list.

Price in small lots Postpaid: 1 lb., 30c; 5 lbs., \$1.25; 10 lbs., \$2.10.

### Fine Seed—Money Saving Prices

Gentlemen: Annada, Mo.  
I have been using your fine quality seed for a number of years and have found it O.K. at a money saving price.  
Yours truly,  
Frank Busch

### Berry's Seeds Give Best Results

Dear Sir: Goodwins Ferry, Va.  
I find that I get better results from Berry's seeds than with any of the other companies I've done business with. They are everything they are recommended to be and more. Very good quality at a reasonable price.  
Sincerely, Eugene Doss

# GET THE WORLD'S LARGEST AND MOST INFLUENTIAL FARM MAGAZINE NOW!

Owners, renters, operators, managers of farm land, their families and merchants who do business with farm people should read this big, live magazine. FARM JOURNAL and FARMER'S WIFE is read by more than 2,850,000 families. Each issue has departments for men, women, boys and girls. Clean and wholesome, no liquor advertisements. The low subscription prices make it a real bargain for folks who have farm interests. America's favorite rural magazine for 74 years.

RECOMMENDED BY BERRY SEED COMPANY

# SOY BEANS

# MONEY MAKING VARIETIES

## High Quality Seed Stock

There is a big difference in these lots of Soybeans that are being used for seed. Some have cracked beans in it that you can see, others have cracked seed coats which you cannot see and yet should be vitally important from the standpoint of getting stands. You will find Berry's Soybeans to be a superior article. Our prices on Soybeans do not include Gro-Coating. Gro-Coating is a help to Soybeans, but comes a little expensive, although we believe it pays. It costs 1½¢ a pound extra for Gro-Coating and you can have that if you wish.

## Hawkeye Soybeans

This is a very outstanding variety for areas having conditions similar to Northern Illinois, Iowa, Indiana, Ohio, Southern Michigan, Wisconsin and Minnesota, Northeastern Nebraska, Southeastern South Dakota, etc. It has strong stalks, produces many three seeded pods, grows 4 inches taller than the Richland, oil content of the Bean is high, it will outyield other varieties of similar maturity by 4 to 5 bushels per acre under most conditions. The Beans are light yellow in color, larger than both Richland and Mukden. We strongly recommend this as the best selection for the climatic conditions mentioned. Even farther South, the farmers are liking these earlier maturing Beans because they can get them off the land quicker and yet they get very satisfactory yields from them. Over 40 bushels per acre have been produced by the Hawkeyes in official tests. **See Items Nos. 184 and 185 on our price list for quotations on this variety.**

## New Wabash

A variety that combines high yield, good standing ability, desirable height, high oil content and good quality of seed. It has about the same maturity as Patoka and Chief and excels them both in yield, oil content, seed quality and resistance to lodging. It is easy to combine. It pods well above the ground on soils of average or higher fertility.

The Wabash has been extensively tested and found especially well adapted to most of the northern half of Missouri, Northeastern Kansas and the southern half of Illinois and Indiana. Yields on an Indiana farm averaged over 35 bushels per acre, on a 5 year average it yielded 28.8 bu. Maturity about 130 days.

We consider ourselves fortunate in having secured a fair supply of State Certified seed for our trade. If you live where climatic conditions are similar to the area described above be sure to grow Wabash Soybeans this year. They are extra money makers. **See Item No. 186 on price list for quotations.**

## HORN SEED SOWER

Simplest of all seeders. Sows all smooth seed like Clovers, Timothy, Alfalfa, Lespedeza, etc. Seed flows from sack through a tube that you swing to and fro. Has gauge to regulate amount of seed to sow per acre. Price Postpaid \$1.50.

## HAIRY VETCH

### LIVES OVER ONE WINTER

This is also known as Winter Vetch because it is very hardy and will winter over in most any part of the U. S. The crop has as wide a range of use as Red Clover. Makes excellent hay. It furnishes pasture the first season when sown in the spring and makes a full hay crop the next year.

Winter Vetch is an excellent cover crop to use in orchards. It is a wonderful crop to plow under for green manure. The root system is very fibrous and it is a great nitrogen-gathering plant. You add a lot of humus as well as soil-building elements to the land. Winter or Hairy Vetch does especially well on sandy soils and is one of the most profitable crops to grow on such land. It can be grown successfully on any well-drained land. This Vetch is highly drought resistant and also quite resistant to Alkali. It will germinate well on soils too Alkaline for most legumes. You can sow in spring or fall. When fall sown, acts as a winter annual like wheat. Remains green late in the fall, starts early the next spring. Is often sown with winter grain to help support the crop which has somewhat weak stems for its heavy growth. Sow 20 lbs. per acre. Inoculate your seed. **See Item No. 68 on Price List.** Postpaid 1 lb., 45¢; 5 lbs., \$2.00; 10 lbs., \$3.75.

# VETCH

## SPRING VETCH

### AN ANNUAL VARIETY

This Spring or common Vetch is not as hardy as Winter Vetch and should be sown only in the spring excepting in areas where temperatures zero. The seeds are much larger and the plant makes a coarser growth than Winter Vetch. Although it does not stand extreme cold it does prefer a cool-growing season. It can be grown as far south as regular field peas can be grown. This does not mean Cowpeas but the true peas. In fact, you can use this crop like Canada Field Peas. A good practice is to sow with oats and cut the two together for hay while the oats are still green.

Sow the crop early in the spring. It will stand pretty cool weather and some freezing, same as peas. Sow 40 to 50 lbs. per acre with a couple of bushel of oats. Vetch grows 3 to 5 feet high. Grows fast and yields are heavy. Makes excellent feed that is high in protein. The crop also may be used as a green manure crop and plowed under while in bloom. Then, you of course, get no crop but you will add a lot of humus and nitrogen to your soil. It is necessary that Vetch seed be inoculated. The cost is reasonable. See page 27 for information. Package of Inoculation for 100 lbs. of Seed Costs only 50¢. **See Item No. 69 on Price List.** Postpaid 1 lb., 35¢; 5 lbs., \$1.50; 10 lbs., \$2.50.

### Always Good Seeds for a Long Time

Dear Sirs: Plattville, Wisc.  
We have used Berry's Seeds for a long time and have always had good results. We are very satisfied.  
Yours very truly,  
Ernest Stanton.

### Marvelous Mixture—a Great Crop. (See Page 21)

Dear Sir: Amsterdam, Mo.  
I bought 6 bu. of your "Marvelous Mixture" and the photo I have enclosed, will show a stand clear up to my armpits. It's a wonderful crop. Your seed has always been very satisfactory.  
Yours very truly, A. E. Semsch.

*A Heavy Producing Fast Growing Sweet Tasting Crop*

# ATLAS SORGO

## Early Drouth Resistant; Very Palatable and Nutritious

This is one of the most sensational Forage Crops ever developed. It is an enormous producer. Yielded up to 18.7 tons per acre, under conditions where corn yielded only half as much. In dry seasons it has out produced corn in grain yields 3 to 1. Nebraska and other States report it the heaviest forage producer. With favorable moisture conditions corn may outyield it in grain production, but we know of no other crop that can equal it as a forage producer. From Nebraska, through Iowa and on East, down South to the Gulf it is a wonderful fodder crop. The juice of Atlas Sorgo is very sweet. That makes Atlas Sorgo highly palatable to livestock, and it is a very nutritious feed. Cattle especially will leave most any kind of feed to get at Atlas Sorgo. They thrive on it. In extreme drouth years we have seen farmers bring their stock through the winter with nothing but Atlas Sorgo fed right out of the shock. It brought them through in excellent condition, fat and sleek in the spring, as though they had been fully corn fed. This crop also makes wonderful ensilage.

## Highly Drouth Resistant

The average crop like corn for example, if it is severely injured by drouth it will stop growing. Atlas Sorgo on the other hand will start up again. In sections where drouth completely dried up corn, Atlas Sorgo remained green. The crop also seems highly resistant against grasshopper damage. Where one corn field was almost completely wiped out by grasshoppers, Atlas Sorgo was practically untouched. This ability to stand up under unfavorable conditions makes it an extremely valuable crop. Grows 10 to 12 ft. tall. It has good strong stocks. It is very resistant against lodging. The seeds of Atlas Sorgo are white and very palatable. Plant 8-12 lbs. per acre at corn planting time or after. Rows 40 inches apart. Cut a little before frost. Shock to cure.

All of our Sorghums and Millet seeds are GRO-COATED. We find that these crops are greatly benefited by this treatment, especially in years when cold or wet weather follows planting. See Item 220 on Price List for quotations.

## NORKAN or Sometimes Early Atlas

This crop very closely resembles Atlas Sorgo in the way it grows and in the type of grain it produces. It is, however, quite a bit earlier in maturity (about 10 days to 2 weeks earlier). That means, of course, it can be successfully grown much farther north than Atlas. In areas south of Central Iowa the Atlas would produce more tonnage as it makes a taller growth. However, areas having shorter seasons or for planting later in the season this Norkan is a good selection. While it will not make as tall a growth, the grain yields generally equals Atlas.

This crop is a cross of Atlas Sorgo with Early Sumac Cane. It is sweet stalked and very palatable as a fodder crop. Plant like Atlas. (See also NORGHUM on next page.)

We have some beautiful seed for you. See Item 221 on Price List.

Small Lots, Postpaid, any variety described on this page: 1 lb., 30c; 5 lbs., \$1.00; 10 lbs., \$1.75.

Picture shows grain production of Atlas Sorgo. Makes wonderful feed stalks and all feed right from the shock.

## MILLETS

Be sure to drop us a card if you mislay our Pink Price List.

## German or Golden

This is that beautiful, heavy growing variety that makes such wonderful production. Its leafy growth is 4 to 5 feet tall. Yields up to 4 to 5 tons per acre and seed yields of 40 to 50 bushels. The feeding value is fine. It is one of the most popular varieties of millets and very widely grown.

This crop can be sown any time after corn planting until the latter part of July. Sow 40 to 50 lbs. per acre for hay production; 25 to 30 lbs. per acre for a seed crop. See Item 225 on Price List.

## White Wonder

This runs our Golden Millet a close second in popularity. Many think it is better. It has a dense foliage and broad leaves. A wonder for production. Matures early in spite of its big size. It has long heavy seed heads and is a good seed producer. Color of seed is white.

Millets make an excellent "catch crop" or to give an extra crop after an early maturing one has been taken from the land. Item No. 228.

## Siberian or Early Russian Type

Two to three weeks earlier than German, but does not yield as much. Hay is of very fine quality. Grows 2 to 4 feet. Sow 35 to 50 lbs. per acre. See Item 226 on Price List.

## Proso or Hog Millet

Also Known as Broom Corn Millet and Russian Wheat

This Millet is grown almost exclusively for seed. A very prolific producer. Seeds are larger than other millets. Makes fine feed. It is used in some countries for human food. Equal to Barley in feeding value. Makes extra fine poultry feed.

Proso is a heavy seed producer, yielding up to 60 to 70 bushel per acre. It matures in sixty to seventy days. Makes a good cash crop. Needs warm weather and soil for quick germination. Sow 40 to 50 lbs. per acre. Drill in close rows or broadcast. See Item No. 227 on Price List. All Millet prices are Gro-Coated. Not Gro-Coated, deduct 1 1/2c per lb.

## BERRY'S ANNUAL PORK PRODUCER

A rapid growing mixture of legumes, forage and grass crops. Can be used a few weeks after seeding. Very productive. High in protein. Builds big body frames, reduces grain consumption. Makes hogs of marketable size in quicker time. Contains Vetch, Rape, Rye, Barley, Oats, Wheat, etc. Sow 50 to 60 lbs. per acre early in spring. See Item No. 234 on Price List. This seed does not come Gro-Coated.

Showing the growth of Billion Dollar Grass

All forage crops on this page (except Pork Producer) are priced Gro-Coated. Deduct 1 1/2c per lb. if not Gro-Coated.

## Billion \$ Grass

This is a tall growing variety of Millet that has high yielding ability. With favorable moisture conditions it yields up to 26,000 to as high as 50,000 pounds of green feed per acre where produced. It also has the ability to produce a lot of seed. Seed yields of 1000 to as high as 2000 pounds per acre are reported. It does not stand heat and drouth as well as Sudan Grass or Atlas Sorgo. Yet we have had some wonderful productions even in dry years. This crop is especially grown in Iowa and states to the north and east, including the New England states. Farther south we would consider Sudan grass, Sorgo or Norkan better. Billion Dollar grass is a fast growing crop. It can make a hay crop in 6 to 8 weeks after seeding. Do not sow too early, generally around corn planting time or after, even into June or July. We recommend sowing 20 lbs. of seed per acre. It will grow up to 6 to 8 ft. high on soil of good fertility. It makes good feed for cattle and sheep. It is widely used for pasture. It does not become poisonous because of drouth or frost. By ordering early we can take care of your orders. For Price See No. 232 on Price List. Any item on this page, postpaid, 1 lb., 30c; 5 lbs., \$1.00; 10 lbs., \$1.75.

## Berry's Seeds Best in Purity and Cost

Dear Sir: Mt. Horeb, Wisc.  
I have a 115 acre farm and have been farming for myself 30 years. During that time I have bought from many different seed companies but the biggest difficulties were purity and high cost. But, during the past few years I have bought all of my seed from Berry's. Your seed cannot be beat for purity and reasonable cost.  
Yours, Orvin Barton.

## Quality High—Prices Low

Kyles Ford, Tenn.

Dear Sirs:  
I find your seed to be of the same high quality that you recommend. I get good yields. Also, the prices are low and I like your different grades of various seeds.  
Sincerely yours, C. Jack Johnson.

## OTHER MONEY MAKING CROPS FOR GRAIN, HAY AND PASTURE

# CANE

**MAKES TREMENDOUS YIELDS**

This forage Cane is very rich in sugar and fat. It is a very palatable crop. Its yields are enormous as it produces 10 to 15 tons of excellent green feed on rich land. It also is a remarkable drought resister. If you want it for hay make the seeding at a heavier rate of 75 to 100 pounds to the acre. For a fodder crop you can drill it in rows as far apart as corn rows, using around 10 pounds to the acre, or double up the rows and use 20. For hay the heavier your rate of seeding, the finer the growth.

**Early Amber** type, the kind most generally grown, a great value because of its splendid growing power. **Item 216 on Price List.**

**Early Orange** type, heavier stalks, more abundant leaves, heads more compact. Heavier yielder but a little coarser. Cane seed is more plentiful this year. **See Item No. 215 on Price List.**

## CANE FOR SORGHUM PURPOSES

We use great care in getting our sorghum seed. We cannot guarantee the crop but we do consider it equal, if not superior to any on the market.

This was secured for molasses purposes from Cane that had been used in making sorghum. It makes molasses of excellent quality, both as to color and flavor. It is juicy and is the choice of most sorghum makers in this section who call it Kentucky Red Top.

**See Item 214 on Price List.**

Postpaid, 1 lb. 30c; 5 lbs., \$1.25; 10 lbs., \$2.00.

"Showing the Superiority of Gro-Coated Seed Under Unfavorable Weather Conditions"

## ENORMOUS YIELDING HIGH PROTEIN PASTURE

# DWARF ESSEX RAPE

### A Crop that Will Help You Reduce Pork Production Cost

This is a very rapid growing crop. It is one of the greatest of quick growing forage and pasture crops for the cornbelt. It can be pastured within 6 to 8 weeks after seeding. You can sow it any time from early spring until next summer. Rape is equal to Alfalfa in feeding value for hogs and sheep, and it also is good for calves, cattle and horses. With Rape pasture you can cut down the amount of grain that is required, and you will get your hogs ready for market quicker. In tests at the Iowa Experiment Station Rape pasture cut down more on grain consumption and tankage than when they were fed on Alfalfa and it carried more head per acre.

Rape, under favorable conditions, will yield 40 tons or 80,000 lbs. of green matter per acre. On a dry basis it analyzes high as 37% protein. It is also high in calcium and phosphorus. It is superior to Alfalfa and Clover as a corn balancer. Provides pasture from early spring until the ground freezes in the fall.

Rape is a crop that grows and makes a heavy leafy growth. The leaves look somewhat like cabbage leaves, but it does not form heads. One of the finest things about it is that it grows so fast. If you are looking for a quick pasture, especially for hogs and sheep, you will find it hard to excel Dwarf Essex Rape.

Be sure to grow some. Sow it alone in the spring or with Oats and pasture when the Oats are removed. Some sow about the same time they sow Oats, others broadcast when the Oats are up a bit, and let the rains cover it.

Only requires about 5 or 6 lbs. of the seed per acre. It grows on many soils. It does best on fertile, well drained loams. It is not so well adapted to sandy or stiff clay soil. Our seed is guaranteed genuine Dwarf Essex Rape.

We secure supplies from areas offering the best in quality and value for our customers. Our seed is priced to include Gro-Coating. We consider that is very helpful and costs less than 10c per acre. Deduct 1½c per pound from Price List for seed not Gro-Coated.

**See Item 233 on Price List.**

Postpaid, 1 lb., 35c; 5 lbs., \$1.40; 10 lbs., \$2.60.

### Always Gets a Stand and Saves Money

Gentlemen: North Tazewell, Va.  
I have been buying your seed for years and I always save money. Your seeds are just what you say they are and I have never failed to get a stand. I always speak a good word for Berry's.

Yours respectfully,  
Joe N. Hunt.

Photo of  
Dwarf  
Essex Rape

### Sows More Acres Because of High Quality

Dear Sir: Freeport, Ill.  
I have been sending to you for my seed for the past several years and have been well pleased. This last spring I sent in an order but when the seed came it looked so good that I decided to sow more. It has been very satisfactory.

Yours truly, Henry Kortemeier.

# HEGARI

Photo of  
Hegari

This is a sweet sorghum, somewhat after the order of the Atlas Sorgho and the Norkan, described on the previous page. It does not grow as tall. The stalks are very sturdy. The crop is very nutritious, whether used as a fodder, for ensilage, grain or even as pasture. Hegari yielded up to 5000 pounds of grain per acre and up to 8 tons of ensilage. Livestock, especially cattle, are very fond of it because of its sweet taste. It combines the grain production of Kaffir and Milo with the high forage value of Cane. It matures earlier than Atlas. The growth is at least three foot shorter. **Item 217 on Price List.**

# MILO

## THE EARLY MATURING COMBINE TYPES RIPENS IN ABOUT 90-95 DAYS

These new low growing Milos have become the most popular of all the grain sorghums. They have been dwarfed insofar as stalk growth is concerned. For grain production, however, it has remained very high. You can harvest this grain with an ordinary grain combine. Therefore, if the crop has matured so that the seed is good and dry, you do not have to first cut it and shock it, you can combine it right out of the field. Feeding value runs quite close to that of corn. You will find this extremely drought resistant. It makes good feed for cattle and widely used for chicken feed. You get good insurance of a crop of grain by having some of this drought resistant grain on your farm. We ship best available on orders. **Item 222 on Price List. It's Gro-Coated.**

## NORGHUM

One of the newest, earliest and best combine type grain sorghums. Very strong stalks. Stands up well. Yields of grain have been consistently high. Average maturity around 90 days depending on location and conditions. This was by all odds, the outstanding combine sorghum in our Clarinda tests last summer. Outstanding in South Dakota. Excellent report from Nebraska. Last year this seed sold wholesale at \$25.00 per 100 lbs. We recommend it most highly for all Eastern and Southern as well as Western and Northern customers wanting a crop of this type. **See Item 219 on Price List for Gro-Coated seed.**

## KAFFIR CORN

The stalks of Kaffir Corn are less juicy than Cane, Hegari or Atlas. They are not sweet. They stand a lot of dry weather. Makes wonderful poultry feed. Produces up to 40 to 50 bushels per acre. For grain drill in rows 30 to 40 inches apart, 6 to 8 lbs. to the acre. **Item No. 223 on Price List for Gro-Coated seed.**

## EARLY KALO

This early Kalo is a very drought resistant grain sorghum, while one of the heaviest producers in its class. Becoming very popular in sections outside of the grain sorghum section because of its fine quality and wide adaptability. Grows 3½ to 4 ft. high. Matures in 95 to 100 days. Stalks are slender. **See Item 218 on Price List.**

# GRASSES For Hay and Pasture

## CRESTED WHEAT GRASS

See Item No. 140 on Price List

If you need a highly drought resistant grass use Crested Wheat Grass. It has made a very satisfactory growth in sections having as little as 10 to 18 inches of annual rainfall. It has yielded three tons per acre in more humid sections and seed production up to 900 pounds per acre is reported. This is a deep rooted long lived perennial grass. It is fine stemmed and leafy. The roots go down as much as eight feet and are very dense. It does not however, spread by underground root stock. Therefore it is easy to eradicate any time you do not want it. It does not have a tendency to become sodbound like some dry land grasses do or to deteriorate very readily in value.

**Comes on Early—Grows Late in the Fall**

Crested Wheat Grass starts growing unusually early because it likes cool weather. It is extremely winter hardy. No amount of freezing seems to hurt it. It will start growing in the spring one to two weeks before Brome Grass which also is an early starter. It also grows very late in the fall. During hot summer it will become dormant. However, it responds quickly to a little fall moisture. We do not know just how much heat it will stand but it has been grown in Colorado, Illinois and certainly is worthy of trials in the south and east.

### Other Valuable Characteristics

Crested Wheat stands close grazing and trampling remarkably well. One test was grazed continuously for five years from early spring until late fall without apparent injury. Because of its heavy root system it has proven to be a good one to use in fighting weeds. The grass is palatable and relished by all kinds of live stock.

We suggest sowing 10 pounds of seed to the acre, sown on a well prepared seed bed. If possible, roll it after seeding. Price Postpaid 1 lb., 50c; 5 lbs., \$1.80; 10 lbs., \$3.25.

### Wants Only Gro-Coated Seed

Last spring I got a very fine stand from a seeding of Gro-Coated seed. I certainly consider the plants are more vigorous. I would absolutely insist upon Gro-Coated seed in the future.

Max Miller, Loyal, Wisc.

## PERENNIAL RYE GRASS

See Item No. 129 on Price List

**Provides Pasture While Other Grasses Get Started**

The Perennial Rye Grass differs from the Domestic in that it lives over winter. The Domestic is an annual. It is not as long lived a perennial as some grasses like Orchard Grass, Blue Grass, etc. It starts growing earlier in the spring and grows rapidly, thus you have a grass to provide early feed and also to form sod while these other grasses are getting started. It is generally sown in the spring where winters are severe. In the more temperate regions fall seedings are very common. This grass has a wide range of adaptability to soils. It prefers land of medium to high

fertility. The plants grow to a height of 1½ to 2 feet. Be sure not to confuse this with ordinary Rye or wild Rye. It is something entirely different. The surface of the leaves is bright and glossy, it has an unusually attractive appearance which is especially noticeable early in the spring. It will stand a reasonable amount of wet conditions, although we do not consider it as good for wet land as Red Top, Meadow Fescue or Reed Canary Grass. This grass has its greatest value when used in a combination with other grasses. It is especially fine in pasture combinations and also used in lawn mixtures to provide an early growth.

You can use it alone 20 to 25 lbs. per acre, and in mixtures 8 to 10 pounds per acre are frequently used. The price postpaid in small lots 1 lb., 45c; 5 lbs., \$1.75; 10 lbs., \$3.25.

### More Plants—Faster Growth

Your Gro-Coated seed grew better than the non Gro-Coated seed. More of it grew and it grew better. I want it on all of my seed in the future.

Louis Todd, Rockford, Mich.

## DOMESTIC RYE GRASS

See Item No. 128 on Price List

**Quick Growth at Low Cost**

This grass is even a faster growing grass than the perennial Rye, but it should be considered an annual. It is a grass that helps to make a sod and a nice green growth early in the season. It produces a turf very quickly. This grass can be heavily productive with favorable soil and moisture conditions. It has recorded yields of 12 to 20 tons per acre in Europe. We cannot expect that here. The normal record of a single cutting being 1 to 2 tons per acre. While it is grown more extensively on the Pacific coast and grown there for seed production it is very widely used throughout the entire United States especially in combinations. When seeded alone, we suggest as much as 30 lbs. to the acre. In mixtures you can proportion it as you desire. Price in small lots, the same as the perennial Rye grass in the right hand column.

## RED TOP

See Item No. 127 on Price List

No other grass will grow under as great a variety of conditions as Red Top. It will grow on soils so poor in lime that most other grasses will fail. Next to Reed Canary grass and Meadow Foxtail it is best for wet land. It is also very drought resistant. You will find this fine to sow for quick pasture, to prevent soil erosion, or in waterways. Red Top is almost certain to make a stand. It is easy to get started. It seldom fails. Red Top is second only to Blue Grass as a pasture plant in the northeastern part of our country and will grow where Blue Grass often fails.

Red Top is adapted to the entire country. It thrives from Canada to the Gulf, New York to California. It is a vigorous grower and quickly forms a turf. When used with Timothy it generally increases the yield and matures about the same time. It is a perennial grass. Seedings last for many years. Supplies of Red Top seed are very short this year. Be sure to place your order early to get your requirements. Red Top is a very small seed and when sown alone 10 lbs. per acre is sufficient. When mixed 4 lbs. per acre is very good. You can use it as a top seeding on thin stands of hay or pasture land. Sow it in early spring or late summer.

Postpaid 1 lb., 75c; 5 lbs., \$3.25; 10 lbs., \$6.00.

Berry's Seed Fine for 15 Years

Dear Sirs:

The seeds I have bought from you for the past 15 years have done a good job for me. When I think of seeds I think of Berry's. I will be needing more seed for Spring sowing. Many thanks for the services you have rendered me.

Very truly yours,

Liberty, Ind.

B. F. Bean.

## MEADOW FESCUE

Also Known as English Bluegrass

See Item No. 143 on Price List

This is a grass that is very widely adapted. It is a crop that can be used both for hay and for pasture purposes. It yields around two tons of hay per acre on the average land. The grass grows to a height of 15 to 20 inches, depending a good deal upon the conditions. It is a very valuable grass to use in pastures, because it comes on early in the spring and keeps on the job until late in the fall. The value of the grass is greater early and later, rather than in midsummer. It is a fine grass, however, in the territory to which it is adapted.

Meadow Fescue will grow well from Kansas and Nebraska east to the Atlantic coast. It has been grown from Canada to the Gulf. This takes in most of the eastern part of the United States.

It may not do too well in the extreme south. This grass is not critical as to soils. It is very well adapted to wet lands. It is like Red Top and Reed Canary grass in that respect. It is a long lived grass. It will last longer than Timothy and stands more heat. You can sow it either alone or in a mixture with other grasses, or grasses and clovers. It adds variety to pasture and increases the value. If you sow it alone, use around 20 pounds of seed to the acre.

Small lots postpaid 1 lb., 60c; 5 lbs., \$2.25; 10 lbs., \$4.00.

Big Savings Even Though Far Away

Gentlemen:

My purchases from you have been very satisfactory indeed. The seed is high in germination, while the price, with freight added, is a big saving, not withstanding the long distance in shipment.

Very truly yours, T. W. Peace.

Madisonville, Tenn.

# IOWA GROWN TIMOTHY

THE GRASS THAT IS MOST CERTAIN TO MAKE A STAND

## Buy Timothy Seed at its Best

You can secure from us the finest of qualities in Timothy seed at money-saving prices. In addition you will get the seed Gro-Coated (unless you order otherwise.) This gives you a large, extra measure of assurance of stands at a cost of 15 to 20c an acre. Non Gro-Coated Timothy seed is 1½c per pound less. Timothy is one of the surest grasses to make a stand. It is adapted to a wide range of soil, and it has a great deal of value. A few years back there were some who discredited Timothy, but most of these opinions now are being reversed. It is recognized as one of the best grasses and is extremely popular in the eastern part of the corn belt. Iowa still remains the chief seed producing state and from here on east it is a very good grass. 10 to 12 pounds of seed sows an acre. We are not sure we will have enough seed for the season, so we do urge you to buy early. Also, read about our clover and grass combination in pages 18, 19 and 29.

## Some Important Points on Timothy

Years ago a number of tests were made on Timothy as compared with ten other grasses. Over an average of a 16 year period Timothy outyielded all other grasses. A yield of 5309 pounds to the acre, the next nearest grass 1000 pounds less and some yielding as low as 2464 pounds per acre. Timothy can be sown either in the spring or in the fall. Spring seedings use 10 pounds to the acre; for fall seedings five pounds is enough. Timothy combines admirably with Red Clover and Alsike Clover. When you combine Timothy with clover you get a bigger yield than sowing either of them separately. You will get the best quality of Timothy hay by cutting it when the plants are beginning to head. You will get the biggest yields if you cut it when the seed heads are straw colored, before they are ripe.

Like any other grass Timothy will respond to fertilizer applications and will greatly increase its yield on good land.

## Berry's Prices Save You Money on Timothy

On a comparative quality basis you will find Berry's prices consistently lower than the average. This is due in part to our policy of direct-to-you sales. That makes savings in every department.

We are at the door of the World's Largest Timothy seed producing section. We therefore, have direct personal buying connections. Transportation charges are lower. The cleaning machinery we have is designed to handle the crop efficiently. Supplies of Timothy seed are larger than last year. However, prices on all grass seeds are steadily becoming stronger. Two years ago Timothy seed prices more than doubled in a very short space of time. We do not expect such wild advances but we definitely do expect higher prices to prevail later in the season. We strongly urge you to order promptly.

## World Brand Grade—No. 79 on Price List

This is our Extra Fancy Quality. It is a grade that most critical customers have been demanding and using for many years. It will run around 99½ purity and high germination. The seed is bright, plump and there is no seed that could give you better assurance of satisfactory results. We guarantee satisfaction. Our direct-to-you price gives you a big saving.

## Dealer's Fancy Timothy—No. 78 on Price List

This Very Fancy Grade of seed is frequently sold as the best quality by others. It is also thoroughly cleaned, nice bright seed with good growing power. It gives really high quality at a still greater saving. Price, Small Lots, either grade, Postpaid: 1 lb., 35c; 5 lbs., \$1.25; 10 lbs., \$2.25. You can buy all of our grasses Gro-Coated. See pages 2 & 3.

## KENTUCKY BLUE GRASS

### Fine Quality—Reasonable Cost

Unfavorable weather cut the Blue Grass seed crop again this year. However, we can sell you extra nice seed at very attractive prices. And, its Gro-Coated to give extra assurance of better stands. We happened to be located in one of the few sections that had a good seed crop so that we can offer it to very good advantage. We can save you money on Kentucky Blue Grass Seed. This long lived perennial grass is outstanding for pasture and lawn purposes throughout a large part of our country. It is very nutritious and very palatable. It makes a fine sod and stands close grazing. It may become dormant during extended dry spells but starts up very readily with a little moisture. Sow Blue Grass alone or use it mixed with Ladino Clover, White Dutch Clover, some like Birdsfoot Trefoil. You will get best results from Kentucky Blue Grass by not over grazing it, when it is extremely dry. Using Timothy or Red Top make the seed go farther. Times practiced. It helps to make sure you have a well settled seed bed, cover it lightly but not deep. Roll after seeding. For spring seeding make sure you have a well settled seed bed, cover it lightly but not deep. Roll after seeding. For fall seeding, it is ok to use a nurse crop. Sow 20 pounds per acre if you sow straight Blue Grass. For lawns, to every 500 square feet is suggested. A commercial fertilizer will help you have more beautiful lawns. A little lime often makes a much more luxurious growth and a better color. See page 51 for Special Lawn Grass Mixtures.

Price Small Lots Postpaid: 1 lb., \$1.00; 5 lbs., \$4.25; 10 lbs., \$7.75. See Item No. 125 on Price List for Quotations.

For other lawn grasses and White Dutch Clover see page 51.

Good grass land will raise a lot of beef and pork. Use good seed and fertilize for best yields and highest feed value.

Read pages 2 & 3 on Gro-coating

## ORCHARD GRASS

### Fine for Shady Places Starts Growing Very Early in the Spring

This valuable grass is becoming better known and much more widely used. There is new emphasis on grass land farming and Orchard Grass will fit into many of these programs either by itself or in combination. It is grown in nearly every state in the Union, and north of the extreme southern states like Alabama and Georgia. Its ability to grow in the shade of trees gives it the name of Orchard Grass. It is not by any means confined to shady areas. It is one of the earliest grasses to start in the spring and grows very late in the season. It has about the same soil requirements as Timothy. It is more of a bunch grass and therefore many prefer it in combination with other grasses and clovers because it does not tend to crowd them out. It is very valuable in pasture mixtures. If cut for hay it will make the best quality when cut when it is in full bloom. Berry's handle only one grade of Orchard Grass and that is the very best quality of domestic seed. Orchard Grass is difficult to clean and there are many grades being sold from poor to good. Our Orchard Grass is onion free and will ship with a clean tag to find a price buyer on this item when ing purity, germination and weed seed content. Price in small quantities postpaid: 1 lb., 65c; 5 lbs., \$2.75; 10 lbs., \$5.25. See Item No. 142 on price list, it's Gro-Coated.

## Had Real Success with Berry's Seeds

Dear Sir: St. Paul, Va.  
I have been ordering my seeds from you for a number of years and like them better than any I have ever tried. I have had real success.  
Sincerely yours, Barney Meado

## Honest and Reliable in Every Way

Dear Friends: Windom, Kans.  
I have found your Company to be an honest and reliable one in every way. I'm well satisfied with your dealings.  
Yours truly, Arthur A. Anderson

**FOR HEAVIER YIELDS AND HIGHER FEEDING VALUES**

## RED CLOVER-TIMOTHY-LADINO

**Contains 50% Clovers, Balance Timothy**

**See Item 101 on Price List**

This is a mixture that is very popular with our customers who want principally Red Clover. It contains almost double the amount of Red Clover as found in the Timothy and Red Clover Super Mixture, described below. In addition you have the Ladino Clover. Ladino Clover, especially in mixtures, is a very desirable thing to have. It adds to the yield of hay. This fine leafy clover is a tremendous producer. There may be spots in the field where the Red Clover would not take that the Ladino would cover in a short time. Frequently after taking off a hay crop it is desirable to use the field for pasture. Some Ladino in it helps to increase the production of the pasture yield.

The Timothy in this mixture serves as a good support for the Clover. You have nicer Clover as a rule, when you keep it growing erect with some grass mixed in with it. Then also the roots of the Timothy help to hold the soil better. It makes a sort of an insulating blanket which helps to prevent winter killing in clovers. This year we are Gro-Coating all of our Mixtures because we believe that Gro-Coated seed gives you a big extra measure of assurance of getting stands. Remember this when you compare prices. It's 2c a pound less when you don't Gro-Coat, but that's only 15c to 20c an acre. Be sure to read about it in this catalog.

## ALFALFA-RED CLOVER-TIMOTHY

**60% Alfalfa and Clover, Balance Timothy**

**See Item 102 on Price List**

This is a mixture that has also been prepared in response to a great many requests. It is made up of approximately 30% Alfalfa, 30% Red Clover and 40% Timothy. Now you can use this seeding just the way it is and you will find it a dandy. It is, in some respects, similar to the Lot Beauty described on page 24. It contains a little less Alfalfa, but it has the Timothy which the Lot Beauty does not have. We like the addition of the Timothy because it helps to make a better sod. This is especially valuable where you have danger from soil washing. The fact that you have a better sod also cuts down the danger of winter killing on the Red Clover and the Alfalfa. It keeps the land from heaving and also acts as sort of a blanket. The Timothy really helps out the hay stand. If you decide to use the crop for pasture you may have grass in with it because the Timothy reduces the danger of bloat.

It might be that you would like to have more grass besides the Timothy. There are some who like to add Brome Grass to it, or if you want a wide variety of grasses you can use the Master Mixture as described on page 19. However, this will make a splendid seeding just the way it comes. When you seed this at 8 to 10 pounds to the acre you will have a very satisfactory seeding, 12 pounds we would consider a liberal seeding. Our low prices are possible because some of the lots of seed we buy are grown mixed and those can be purchased at reduced cost and we add alfalfa or clover as needed to make a uniform mixture, it's Gro-Coated.

## RED CLOVER-TIMOTHY

**Super Quality, Contains 35% Red Clover**

This is an old favorite combination that we do not believe will ever lose its popularity. The seed in it is all hardy, home grown Medium Red Clover and fine, hardy Iowa grown Timothy seed. Both of these crops are adapted for seeding throughout the entire northern half of the United States. There is plenty of Clover seed to give you a good stand. See the figures below. Now that the seed is Gro-Coated, you have better assurance than ever of getting excellent stands even under unfavorable conditions. Good Clover is hard to beat as a soil builder in the corn belt. It leaves the land in ideal condition for a corn crop. This mixture of Timothy and Red Clover makes a fine sod. When plowed under it adds a lot of humus and nitrogen to the soil. Humus is very important because it stimulates the growth of favorable bacteria and thus releases plant food that growing plants otherwise could not get. The Timothy helps the clover to grow erect and produces finer, better, taller stands. The Clover helps the Timothy by enriching its feeding value. These mixtures, together, yield more than when sown separately. At 8 to 10 lbs. per acre you will have a very satisfactory seeding that will give you 23 to 28 clover seeds per square foot. This is a splendid value. **See Item No. 98 on Price List.**

## ALSIKE-TIMOTHY

**Regular Grade Contains 20% Alsike**

**See Item 96 on Price List**

This is one of our lower cost seedings and a very good one. Timothy and Alsike makes an excellent combination. The two crops are adapted to the same types of soils and climatic conditions. They are very winter hardy and mature at the same time. Alsike is a smooth stemmed clover. Alsike hay is less dusty than that from Red Clover and pound for pound it is higher in feeding value. There are more than twice as many Alsike Clover seeds per pound as there are Red Clover, so when you sow a mixture containing 20% Alsike you have about as many clover seeds as a 45% Mixture of Red Clover. This seeding makes a very fine quality of hay and it also is widely used for pasture. Sow this at 8 pounds to the acre, you have about 30 clover seeds per square foot. The Timothy in the mixture helps to hold the clover erect and that is especially helpful in a combination for Alsike. This seeding will grow on land too acid for Red Clover and will stand somewhat more severe winter conditions. The Alsike is also a perennial Clover instead of a biennial. It is a real good seeding at a real low price.

## RED CLOVER-ALSIKE and TIMOTHY MIXTURE

**Regular Grade, Contains 30% Clovers**

This is another fine lot of hardy, home grown, re-cleaned seed. Has a goodly percentage of Clovers to produce heavy yields of fine seed. The biggest portion of the seeding is the Red Clover as the Alsike has somewhat smaller seeds. By having both Red and Alsike, you have better assurance of getting a stand. Often the Alsike will take hold in places where the Red Clover might not catch. Thus you can have a good Clover stand over the entire field. A seeding of 7 to 8 pounds to the acre will give you 30 clover seeds per square foot. That is plenty for a good stand of Clover. In addition you have the Timothy to hold up the Clover. More and more we are realizing that the addition of some grasses to a clover seeding is a great help, especially where there is trouble with erosion. A seeding like this Mixture is good for hay,

soil improvement as well as erosion control. All the seed is re-cleaned. You have real money saving opportunities in Berry's prepared mixtures. Our Lot Just Rite described on page 24 is a similar mixture but contains more clovers. See pages 19 and 21 for other fine mixed seedings. Berry's values in mixtures are nationally famous. If you want something different you can use one of our mixtures as a base and then add to it whatever you desire. We want to re-emphasize again the importance to you of getting Gro-Coated seed. Read pages 2 and 3 of this book and let us send you our circular on Gro-Coated stock. It costs only a few cents more per acre to have Gro-Coated seed and that few cents gives you a big extra measure of assurance of getting satisfactory stands. **See Item No. 97 on Price List.**

**Lowest Possible Prices on Finest Quality**

Newark, Mo.

Dear Sirs:

I have found that I can get the finest quality seed at the lowest possible prices from Berry's. I am always well satisfied.

Yours truly,

Harry Nelson.

**Can Sow Our Seed with Confidence**

Dear Sirs:

Lebanon, Ind.

I have a farm of only 120 acres and it is very essential that I have good crops of clovers each year for the cattle, sheep and hogs that I feed and raise. I have found in the last 8 or 9 years that I can sow your seeds with confidence.

Yours sincerely, Artie E. Stuart.

# SPECIAL MIXTURES FOR SPECIAL NEEDS

## BERRY'S MASTER MIXTURE

### A Combination of 7 Grasses and No Clovers

Grass farming is becoming more and more important. For the "long-pull," there are many farms that would return bigger profits and be better farms, if they were largely devoted to grasses.

#### Grasses Used in Master Mixture

This seeding contains a fairly large percentage of Brome Grass, which is a very palatable grass of high feeding value. Kentucky Blue Grass which is well known for its feeding qualities and its early and late growth. Orchard Grass which is one of the first to start in the spring, and one that combines well in any mixture. There is some Meadow Fescue in it and Red Top. These are grasses that will grow on most any type of soil, and will do well under wet conditions. There is also the Crested Wheat Grass which will withstand the extremes of drouth. There is some Timothy in it which is a wonderful all purpose grass, that is almost sure to make a stand.

When you have a grass mixture like this, livestock like it better. They appreciate a variety of feeds. All of the grasses are perennials, and will last a number of years from one seeding. Some of them start exceedingly early in the spring, others grow late. Some stand drouth better than others, some wet and drouth both. We have grasses here that are suitable to a wide range of soils and climate. You can use it for waterway seedings, terraces or on any regular pasture combination. It will also produce a good hay crop. There are no Clovers in this Mixture, but if you want Clovers you can add them in any percentage that you want. It is a straight grass mixture. It is a very popular seeding, and of course you can get it Gro-Coated, our price includes that. It is 2c a lb. less not Gro-Coated.

ITEM  
No. 107

PRICE  
LIST

## BERRY'S LOT "TIM"

### Combination of Red Top and Timothy

We are frequently able to pick up some lots of Red Top containing some Timothy seed at very attractive quotations. It is possible to secure some lots of seed that have good purity and germination at a sharp discount under the price of seed, separately. There are many of our customers who like to share in the savings that are made in the purchase of such lots, and we pass the savings on to you.

A seeding of this type is one of the surest to make a stand, for both Red Top and Timothy are very easy to get started. Both are adapted to a large range of soil, and will grow on land that is thin to soils in the highest state of fertility. Red Top is a grass that starts off rapidly and is considered a very fast growing grass in the perennial line. Should you happen to run into a wet year, you will find Red Top to do exceptionally well, and at the same time, it has proven itself to be drouth resistant. Timothy also flourishes over a large area and under many varying conditions. They mature seed crops at about the same time, so they are naturally adapted to growing together.

You can use this Lot Tim as a very economical seeding, just the way it comes. Or if you have other Grasses or Clovers which you would like to add to it, that works out very satisfactorily, and still helps you hold down seeding costs. This Mixture is approximately 50% Red Top, and 50% Timothy, and we try to make a very uniform mixture of it. Our supplies are not too large, so we would ask that you order early. Our price includes Gro-Coating. See pages 2 and 3. Not Gro-Coated you can deduct two cents per pound from any of these lots.

## Berry's THRIFTY MIXTURE

### Mixed Grasses and Clovers

This is a combination of grasses and clovers that has given our customers very satisfactory results. The seeding cost is low. It only requires 15 to 20 pounds to the acre. A seeding lasts several years. It produces a fine quality and a wide variety of feed. By using this combination you can get a longer pasture season. Some of the crops in it start early, others grow through hot weather and late into the fall. Some stand wet conditions, others can take a lot of drouth. Under almost any conditions it can give you a stand. It is highly productive and of excellent value. This mixture contains 4 grasses which make up 55% and 3 clovers totaling about 45%. The grasses in the mixture are Rye Grass, Meadow Fescue, Orchard Grass and Timothy. These are combined with Alfalfa, Sweet Clover and Korean Lespedeza. The Rye Grass gives you a fast growing grass that provides a quick growth. This also helps to establish a sod while the others are started. The Orchard Grass and Timothy follow a little later. They are adapted to a wide range of soils and make a splendid combination. The Clovers are generally ready to pasture by mid-summer. They supply nitrogen so that the grasses are improved in feeding value. The clovers provide high protein feed. All grasses are perennials. The Korean Clover is an annual, but it generally reseeds itself unless the season is too short. Sweet Clover is a two year crop and it, too, nearly always reseeds when used as a pasture. Thus the legumes afford you high protein feed. It will build up your land and increase the value of the grasses that grow with it. This mixture gives you a lot of feed value at a very reasonable cost. Our prices include Gro-Coating.

#### Husband and Wife Are Well Pleased

Dear Sir:  
I would like to say that I have bought seed from you for the past 15 years. It has been very satisfactory and I have always been pleased with the way you handled my orders. Also, my wife continues to buy her garden seed from you year after year.  
A satisfied customer,  
Harry Skov.

Dexter, Minn.

## Berry's GROW-QUICK MIXTURE

### Berry's Grow-Quick Mixture

Contains Rye Grass, Timothy, Korean Clover and Sweet Clover.

#### Approximately 50% Clover Balance Grasses

You can get a very low seeding cost by using our Grow-Quick Mixture. This is one of our biggest selling combinations. You can get good quality seed at a very reasonable cost. You can begin pasturing this mixture quite early. The Rye Grass in it is a fast grower and affords the earliest feed. As the summer progresses, the Sweet Clover and Korean come on and that tends to increase the carrying capacity while the Timothy, of course, comes along toward the fall. The Korean Clover will reseed for next year unless the season is too short. As the Sweet Clover and Timothy live over winter they can be used next year for plowing under for fertilizer, or continued for pasture, or cut for hay. Sow 15 to 20 lbs. per acre. That makes a low lost for any seeding containing 50% Legumes. If you are going to be short on pasture and want something you can start pasturing quite early, we recommend this as a good selection.

You can sow this combination about the same time you would sow small grain. We do not especially recommend a nurse crop. If you want to sow some oats with it that is ok. Pasture the oats along with the Rye Grass while the Timothy, Korean Clover and Sweet Clover are getting started. We would not advise, however, over a bushel of oats to the acre. Prices include Gro-Coating—see pages 2 and 3.

#### Has Found Us Reliable and Fair

Gentlemen:  
I have been buying all my field seeds from Berry's for several years. The seed has always been very satisfactory as to quality and price. Also, I have found you to be reliable and fair in all dealings.  
Very truly yours,  
E. C. Hathcoat.

Harrison, Ark.

# A NEW HIGH, SUGAR CONTENT GRASS

DELICIOUS AND NUTRITIOUS

## Meadow Foxtail

A long season, perennial grass

NOT TO BE CONFUSED WITH FOXTAIL MILLET

VERY PRODUCTIVE

### Highly Palatable

While a new grass in this country, it has long been used in Northern Europe. It produces a higher percentage of basil leaves, than most grasses, the flowering stems are erect and usually about 3 foot tall. Cattle and sheep will graze this grass in preference to other grasses. They will eat both stems and the leaves which contain more sugar than most other grasses. It is not a real sweet grass like Sorghum, but sweet enough to make it very palatable and relished by livestock.

### How and When to Sow

In most of the Northern and Northeastern States, spring seedings are preferable to fall seedings. In milder climates, fall seedings are good. 6 or 7 lbs. per acre will make a sufficient seeding if you have a good seed bed. It can be sown with a drill, covered lightly, at the most not over an inch, and rolling after seeding gives best results. Seed bed should be fine, but firm, and as clean as possible.

### Free Circular

We cannot tell you the complete story about this wonderful grass in this Catalog. Write for our free Circular telling more about it in detail.

### 7 GREAT FEATURES

Meadow Foxtail grass should be used on every farm, especially if there is any land inclined to be damp. Meadow Foxtail is a wonderful grass. Be sure to try it.

- 1 Unusually palatable forage grass.
- 2 Starts its growth early in the spring.
- 3 It has good winter hardiness.
- 4 Has a wide range of soil and climate adaptability.
- 5 Has long life.
- 6 Has a long growing season.
- 7 It grows in the shade and is heavily productive.

This is one of the earliest cultivated grasses to start growing in the spring. It can be grown anywhere in the northern half of the United States. It does well where summer temperatures may reach 100 and winter well below zero. It is a tremendously heavy producing grass as the accompanying photograph will show. A Minnesota field has stood for 25 years.

### Great for Wet Lands

Like Reed Canary Grass, it will stand long periods of over-flow. Good stands have been obtained on low wet lands that are quite alkali. It is much easier to start than Reed Canary grass, that is why many prefer it as a grass for such conditions.

### Good for Uplands

Although naturally a wet or moist land grass, it can give good returns on well drained soil of medium fertility, that are fairly well supplied with moisture for winter and early summer growth. It is good to use in waterways. The pasture season generally extends from shortly after the last heavy spring frost to early heavy freezes in the fall.

### Grows Well in the Shade

Like most grasses, Meadow Foxtail makes good growth in shady places. In this respect it is similar to Orchard Grass, but will stand much more wet soil. There are many places where this grass will prove itself one of the best money makers you can possibly use.

### Fine in Mixtures

You can use it with Ladino Clover, Red Top, Alsike, Fescue Grasses or alone. See item No. 146. Prices postpaid 2 lbs., \$3.00; 5 lbs., \$7.25; 10 lbs., \$14.00.

## ALTA FESCUE

This is a grass that is outstanding in more ways than one. (1) Very heavy production, (2) Its long growing season, (3) Its ability to stand drouth because it is very deep rooted, (4) It will thrive on quite acid soils, and is tolerant of moderate alkali concentration, (5) The tremendous capacity that it has as a pasture.

While most widely used for pasture, it also makes good hay on fertile bottom land. In Oregon for example, over a six year period, it yielded 4.11 tons per acre, compared to Reed Canary grass 2.71, Timothy 1.99, Orchard Grass 1.66. For a straight seeding of Alta Fescue, use 10 to 12 lbs. to the acre or 4 to 5 pounds per acre mixed with other crops such as Timothy, Drome Grass, Ladino, Alfalfa, Red Clover, etc., makes a great combination. Thousands of acres of poor soils can grow this crop to wonderful advantage. On the richer soils, the growth is tremendous. Price postpaid 2 lb. \$1.90; 5 lbs. \$4.25; 10 lbs. \$8.00. For larger quantities see item No. 147, on our pink price list.

GRO-  
COATED

## KENTUCKY 31 FESCUE

This is also a selection of the tall Fescue, it was made from a Kentucky strain. Many Agricultural authorities state they cannot tell the two apart. One of our own men who has a farm near Clarinda, sowed 5 acres to Kentucky 31 Fescue, the other with some Alfalfa and Red Clover. It is one of the "first" fields in this area and farmers drove from miles around to see it. Everyone who saw it, decided then and there they wanted some of it. This 5 acres was the poorest on his land, it is hill land and he sowed it in 1949 and began pasturing it in April. He had 35 head of hogs on it all summer. It grew so fast he had to cut it for hay, took off 150 bales of hay and as soon as the hay was baled, the hogs were back on and stayed on until early October. The 10th of October the growth was still so dense it was like walking on a thick carpet. The leaves were heavy, green and succulent, extended they range up to three feet long. They anticipated that it would remain green until Christmas here in southern Iowa, because it did that the year before. We know of no grass having as long a growing season, that will produce as much, give you as big a return per acre as this wonderful grass. See Item No. 145 on our price list. Small quantities postpaid, same price as Alta Fescue described to the left.

## ALTA "144" FESCUE

You will find Alta 144 Fescue good for heavy land too. Its root system can penetrate dense subsoil. It opens up the soil beneath the plow depth. The partial renewal of the root system each year helps to store a lot of humus in the ground.

You get in Alta 144 everything that regular Alta and Ky. 31 can give you plus a softer leaf, even higher palatability and beautiful color. Because of its texture and lush green color it is used as a lawn grass in some areas. It is truly a superior grass. The seed is still scarce but we urge you to be sure and try some. You'll thank us later for getting you started with Alta 144 Fescue.

Price postpaid: 2 lbs. \$2.00; 5 lbs. \$4.75; 10 lbs. \$9.00. Not prepaid, see Item No. 144 on pink price list.

This is a superb new strain of Alta Fescue. The leaves are darker green. They are softer and smoother. They remain palatable for a longer period. Livestock like its lush green growth. Even if it gets older it still retains this softer texture.

You can readily see why there is such a tremendous demand for this new grass. It has an extremely long growing season. Where winters are not too severe it will stay on the job the year around. It is even deeper rooted than regular Alta or Ky. 31. This allows the plant to use the deep soil moisture throughout the summer. It will thrive on most any soil excepting very light land. Like the other Fescues it will stand over-flow and quite wet conditions in general. At the same time it has its drought resistance.

Kettle River, Minn.

Dear Sir:

I got the best hay crop from the seed I bought from you two years ago that I have ever had on my farm.

Sincerely,

William A. Karki.

Gentlemen:

I have always found your seed to be of good quality and have had consistently fine results with it.

Very truly yours,

Swenson Brothers.

Bertrand, Nebr.

**OUR HEAVIEST  
PRODUCING  
COMBINATION  
FOR HAY and PASTURE !**

# MARVELOUS MIXTURE

## 50% CLOVERS

BALANCE  
TIMOTHY

Item No. 95 on Price List

**SEE SAMPLE ENCLOSED**

The Most Popular Clover and Grass Seed Mixture  
Now Better Than Ever Before, It's "GRO-COATED"

**ECONOMICAL AND VERY SATISFACTORY**

Look at this great value. See the quality of our heaviest yielding Mixture. For years it has been our biggest seller. Now we have added the tremendously popular, expensive Ladino Clover. There is sufficient Ladino in this mixture to give you approximately 2 seed per square foot. A Ladino plant covers a lot of ground. You get a total of 50% of rich, fine, heavy yielding clovers. Red, Alsike, Sweet Alfalfa and Ladino. The balance is Timothy. This will average 40 to 50 Clover seeds per square foot when sown at the rate of 11 pounds per acre. You can sow less seed and get a good stand. It is a marvelous value. You can really stretch your seed dollars over more acres and get a fine seeding. The added Ladino is wonderful for pasture.

**A SEEDING THAT LASTS SEVERAL YEARS**

Such a combination of Clovers and grasses makes extremely heavy yields of hay. Our customers report highly satisfactory results. Big crops. Fine quality and big savings in cost. Many use it. The Alfalfa seed in the mixture helps to establish the crop on your land. The Sweet Clover opens up the soil and adds much nitrogen. The Red Clover and the Alsike fill the lower growth while the Timothy supports them and adds to the weight and growth of all. It is a great seeding and our customers are enthusiastic about it. Year after year Marvelous Mixture continues to be our biggest selling item.

# Berry's Famous 5 WAY MIXTURE

Item No. 100 on Price List

**Contains Red Clover, Alfalfa, Alsike, Timothy and Ladino**

**Contains 30% of Clovers, Including Ladino—All Gro-Coated**

This combination is next to Marvelous Mixture, our biggest seller. A few years ago it was our 4 Way. We had so many requests for Ladino that we have added some of that expensive clover to it. This adds a lot to it, both as a hay or pasture crop. The Ladino gets heavier in the growth from year to year. You will find this mixture good for a semi-permanent meadow or pasture. This is a seeding that provides quantity and quality. Sow 8 to 10 lbs. per acre.

You can thus figure on a very reasonable seeding cost and a mixture that will give you top results. It is all

domestic seed and contains no imported item. We are able to buy many lots of mixed seed at a discount just because they are grown in a mixture. We blend such lots together and add Clovers or Alfalfa as may be required to make it as uniform as possible. Its high Clover content means big yields in addition to fine feeding and soil building qualities.

This mixture is just next to Marvelous Mixture in sales to our customers. We do not add any Sweet Clover to this combination. It has straight Timothy for the grass seed item. There are other combinations listed throughout the catalog but we believe this is one which will please you as much, if not a little better, than most. The selection of a mixture to suit your requirements will depend somewhat

on your soil and seasonal conditions and the purpose for which you want the crop. We have combinations to suit almost every purpose and also we have mixtures at different prices to fit most every pocketbook. Whatever your seed needs you can save money by buying direct from Berry's.

Alsike Clover  
Red Clover  
Alfalfa  
Timothy  
Sweet Clover  
Ladino Clover

**"GRO-COATING"**  
Kills  
Harmful Seed  
And Soil Borne  
Bacteria

**QUALITY GUARANTEED TO PLEASE**

Please examine the sample closely. Note the heavy Clover content. Each one is new crop domestic. Thousands of satisfied customers praise Marvelous Mixture. Some of the letters reaching us read as follows:—"Never had a finer stand. Saved about half in buying this item." "Have been using it several years with the best stands and yields of any seed used." "Got 21 loads off 9 acres first cutting and 11 loads of Alfalfa second cutting." "Have used Marvelous Mixture for 8 years and never been disappointed." We will send your money back if you do not consider it a great value on which you have made big savings. See page 33 for guarantee on all seed.

**PROFIT MAKER**

You too, can become enthused over its wonderful production and high feeding value. See how it checks soil erosion and enriches your land. That dense heavy mat of Clovers is a joy to behold. We sell many thousands of bushels of Marvelous Mixture every year. With present low prices on such a combination of all home grown seed, its sale should smash all previous records. In our opinion there is no other mixture that will give you as much Clover for the money as you will obtain in this Marvelous Mixture.

**"GRO-COATING"**  
Is An Exclusive  
Process  
See Pages  
2 and 3

Ransomville, New York.

Dear Sir: I sowed Gro-Coated Marvelous Mixture and Alfalfa seed and am very well satisfied. The crop is far ahead of that from seed not Gro-Coated. It is the finest stand I have obtained in 27 years of farming.

Very truly yours,  
Raymond Bradley.

Wilson, Kansas.

Dear Sir: The Gro-Coated Alfalfa Seed that I sowed came up good. I sowed less seed than usual yet I got a better stand. It was planted on a creek bottom and it was flooded twice with four feet of water but there is still a good stand.

Yours truly,  
Arthur Grubb.

# A Beautiful Lot of Hardy Alfalfa!

## LOT GOLD

**FINEST NORTHWESTERN GROWN  
DAKOTA 12 TYPE**

**99% PURE**

**92% GERMINATION**

### The Famous Yakima Valley Seed

Here is one of those special seed values that are seldom found. Through our special buying connection we have obtained a few cars of this beautiful seed below prevailing market prices. This seed is grown in Eastern Washington, just a few miles across the line from the northernmost part of Idaho. It has all the characteristics of yield and hardness of the Montana and Northern Idaho seed.

This is such a wonderful value that we are sending you a sample of it. Please look it over carefully. See how clean it is. The berries are bright and plump. It is high germinating seed free of noxious weeds. Compare it with others. See how much high quality you get for your money. It is seed that will delight the most critical buyers.

Alfalfa of this kind is often referred to as the Dakota No. 12 type. It is vigorous growing, hardy productive plant. This seed, in our opinion, is adapted to all parts of the nation. If you live in the Northern areas or anywhere in the corn belt, you should find this seed highly satisfactory. Money cannot buy finer quality. This seed is priced to sell below what many others are asking for less hardy origins of poorer quality.

### Order Early for Lowest Prices and Best Values

Lot Gold is outstanding among our Alfalfa values. We guarantee you a generous saving or your money back. Quality for quality you will find our prices lowest. Do not, however, defer ordering too long, because the supplies are limited. See item No. 16 on price list. This is "GRO-COATED" SEED. See pages 2 and 3.

Dear Sirs:

For years I have tried to get a stand of Alfalfa but could not. I used two bushels of Dakota No. 12 Gro-Coated seed and got a wonderful stand. The plants grew very vigorously.

Sincerely yours,  
Ben Rager

## BUFFALO ALFALFA

**WILT RESISTANT-HEAVY YIELDER**

### HIGHLY RECOMMENDED

The new, wilt resistant Buffalo Alfalfa has shown outstanding results. The U. S. Department of Agriculture, as well as State Colleges, praise Buffalo enthusiastically. It has similar characteristics to the Ranger Alfalfa, described on the next page. Both are highly resistant to bacterial wilt which has caused so much damage to Alfalfa seedlings in many sections. Buffalo recovers rapidly after cutting. It is a terrific yielder. In our opinion it outyields Ranger, but it is perhaps not quite as winter hardy. It should do well in Iowa, Illinois, Nebraska and states on east and south. The U.S.D.A. states certified seed of Ranger and Buffalo Alfalfa, will perform satisfactorily regardless of where the seed was produced. Makes a high quality, leafy hay.

### Official Tests Prove Its Superiority

In tests conducted at the Iowa State Experiment Stations, Buffalo showed an average dry hay yield of 4.01 tons per acre for a four year period. This was considerably higher than other well known varieties tested. Kansas State Experiment Stations reported a 95% stand after 4 years from Buffalo Alfalfa, while its nearest competitor had only a 25% stand. Other official State tests report equal success.

### SEED AVAILABILITY

Buffalo seed stock has not been increased sufficiently to meet the demand for this popular variety. Our supplies are limited. Please order early. Genuine Blue Tag, Certified seed, and therefore do not break seals on Certified seed, and therefore cannot sell such seed Gro-Coated. Any order calling for smaller quantities or an odd number of pounds will have to be shipped in bags without seals. See Item #21 on Price List.

# Honest John

**THE LOWEST PRICED ALFALFA THAT  
GIVES Wonderful Satisfaction!**

Honest John is not our lowest priced Alfalfa, but one of our finest values. We have combined several lots that we believe will make an excellent seeding for most corn belt areas. It contains part northern grown common, part chilian type Alfalfa, which has variegated blossoms. While California grown, this variegation is quite general and considered a characteristic of a very hardy strain. It also has some Northern Texas, grown just across the line from the main Oklahoma seed area. This is considered equal to Kansas. There is some high altitude New Mexico seed in it. While there are some thinner seeds in it, the general quality of Honest John this year is far better than in previous years. It is a great value. The seed is Gro-Coated and that gives you extra assurance of getting much finer stands.

### "Customers Are Enthused About Honest John"

Customers write in and say it produces stands as "thick as hair on a dog's back." Others write that they saw Honest John Alfalfa on their neighbors field where it produced better stands than they had from seed costing almost twice as much. We handle this serviceable seed for those who want to cut their seeding cost as low as possible. You do not have to sow it any thicker than any other Alfalfa. If you do not object to a lack of uniformity in appearance, so long as it can produce satisfactory results, then this seed should please you. It has pleased thousands. Again this year it will be the selection of thousands of farmers. It is not always possible for us to secure a sufficient quantity of this type of Alfalfa to supply the tremendous demand that exists. We, therefore, sincerely urge you to order as promptly as you can. This great value reduces your seeding cost very drastically. You can afford to use it liberally either in establishing stands of pure Alfalfa, or using it with Mixtures or other grasses or clovers.

Gentlemen:

Last spring I sowed Gro-Coated Alfalfa, Red Clover and a pasture mixture. I used less seed than normal, yet I got a more even catch. The plants also seemed healthier and grew more vigorously.

Very truly yours,  
Raymond Nelson

**NOW

Union Grove, Wis.

# THE NEW WILT RESISTANT "RANGER" ALFALFA

**Highly Recommended Where Bacterial Wilt Is Killing Alfalfa Stands**

Often times farmers will write in to us stating that their Alfalfa plants are turning yellow and dying out. They want to know what is causing them to lose their stands. Closer observation would reveal that in many instances it is bacterial wilt. This bacterial wilt is most easily recognized in the fall. At this time severely affected plants throw up many weak, slender, short yellow branches as compared to a few strong green shoots of healthy Alfalfa plants. This same condition is noticeable after first and second cuttings. After the first sharp frost, plants affected by bacterial wilt will be frosted, while healthy plants will be uninjured. If weak looking plants in such a field are dug and the roots cut across diagonally with a knife or the bark peeled from the roots, the color of the wood layer will be varying shades of brown instead of the clear white of healthy roots. Many times, too, farmers will claim that their Alfalfa has winter killed, however, actually, the plant has died out over the winter through bacterial wilt. Therefore, if you have experienced any of the same conditions in your own Alfalfa, then we strongly urge you to make a seeding of this wilt resistant variety of Ranger or the Buffalo advertised on the opposite page. This costs a little more, yet when you consider what it will save you in the long run, it pays big profits.

**Ranger Alfalfa Is Fine-Stemmed, Leafy, Long Lived**

Another advantage of Ranger Alfalfa is that it will continue producing heavy yields of fine quality hay long after ordinary Alfalfas have died out. Under normal conditions you can expect maximum results from a seeding up to six years and more. Ranger is extremely winter hardy and is adapted to the northernmost states.

Generally, we have Ranger in both the Certified and Non Certified grades. The Certified seed is sealed in 30 and 60 pound bags. SEE ITEMS 22 and 23 ON PRICE LIST.

**"GRO-COATING"  
Is Your  
Assurance Of  
Better Stands**

## Berry's Finest MONTANA GRIMM

**Popular for Its Fine Quality Hay and Extra Hardiness**

Montana Grimm Alfalfa is in big demand. It has extra winter hardiness and somewhat finer characteristics of growth. The seed is not only beautiful in appearance, but produces the kind of a crop that many farmers demand. We have other lots of Grimm at lower prices yet if you want the very finest Grimm obtainable, then order Berrys Montana Grimm. The price is not high when you consider quality. Our supplies are limited. If sold out we can ship Ladak, Non-certified Ranger or other hardy origin like Lot Gold. To save time on your order if we get sold out, we will send the best available and refund the difference unless you mark your order "No-substitution."

**What Kind of Alfalfa Should I Buy?**

We are often asked that question. The answer depends upon conditions and personal preference. If you have trouble with wilt, then choose Ranger or Buffalo. For severe winters, Ranger, Grimm and Cossack are best. The Buffalo, Dakota #12 and regular Corn Belt Alfalfa generally makes heavier growth. Read the description of different varieties and origins in the catalog. They are widely adapted. If you want extra winter hardiness, buy Grimm and this is Grimm Alfalfa at its best. It's "Gro-Coated" although you can get it not Gro-Coated for 2c a lb. less. SEE ITEM #17.

**Insist On  
"GRO-COATED"  
Farm Seed**

## BEAUTIFUL MONTANA COSSACK ALFALFA

Cossack Alfalfa is noted for its winter hardiness. It has stamina and vigor. Many consider that it excels the Grimm in this respect. Cossack is one of the varieties that was used in making the new wilt-resistant Ranger Alfalfa described at the top of the page. Its fine, leafy growth makes beautiful quality hay. It is very fine to use in combination with grasses such as Brome for hay or pasture. A seeding should last for many years. We consider it hardy for any part of the nation. This World Brand grade of Cossack is beautiful seed. Purity and germination tests are high. Berry's direct-to-you policy makes possible this unusually attractive price. You will save money. We guarantee every shipment to show up to your satisfaction. Please order early. You will get the biggest values by doing so. The Cossack Alfalfa which we have available

Gentlemen:

Gro-Coated Alfalfa sure got off to a good start. Did better than any the neighbors had. They said they had never heard of "Gro-Coated" Grass seed. Keep up the good work. I will order more of it in the future. It made a better stand than the Non Gro-Coated seed.

Sincerely,  
Frank Haser

Stitzer, Wisconsin.

is only sold in our top grade. You know when you sow seed like this that no other seed could possibly give you better assurance of getting satisfactory results. Our Cossack Alfalfa is "Gro-Coated." If we get sold out can ship other lots as suggested above under Grimm Alfalfa. SEE ITEM #20.

**SEE  
Pages 2&3 For  
Complete Story  
on "GRO-  
COATING"**

**OUR BIGGEST SELLING CLOVER VALUES!**

# **LOT LEADER** **Red Clover** WITH 25% **TIMOTHY**

**99% Crop Purity**

## **AN OUTSTANDING VALUE**

We are constantly striving to give our customers the benefit of our wide experience and purchasing power. In Lot Leader we believe that we have a value which no one else can match. This is beautiful plump seed with lots of large purple berries. It is a type of Clover that commands premium prices. You can be assured of complete satisfaction when you order Lot Leader. It is a favorite of long standing with our trade.

## **THE REASON FOR LOW PRICE**

When you look at the price on the enclosed list, which is Item 109, you may wonder why we could possibly offer it so low. Is there anything the matter with it? No, there is nothing about it that matters in any practical way. The reason the price is lower is simply because it is made up of different lots that were obtained at a particular advantage. In order to make it an even greater bargain and satisfy the needs of a large majority of farmers, we have added 25% Timothy. This combination is one which is liked a great deal by our customers. It gives maximum results. The Timothy acts as a supporting crop for the Clover, which helps them grow more erect and there is less loss of Clover leaves. The quality of the hay is often superior. Also the Clover increases the feeding value of the grass. We believe that our proportion of 75% Medium Red Clover and 25% Timothy are ideal.

## **LIBERAL SAVINGS AND SATISFACTION**

When you consider the extra fine quality of Lot Leader, the price we have on it is very attractive. You'll appreciate the savings all the more through the satisfaction you get from such seed. It not only has strong germination but is Gro-Coated which gives such seed its best chance to make a heavy healthy stand. Shipment is guaranteed to please you or your money back. SEE ITEM 30 ON PRICE LIST. That's a "GRO-COATED" price.

# **Golden Acre** CLOVER COMBINATION

## **SIX DIFFERENT LEGUMES**

This is a great combination that we have prepared to meet the demand of many customers. Some have grass seed of their own and want a variety of Clovers to mix with it. Others prefer to make a seeding of straight clovers but like a variety. They figure there are several advantages to this. First, if one fails to catch due to unfavorable soil or weather conditions there are plenty left to make a full stand. When used in pasture combinations the different clovers give a prolonged pasture season as some do best when it is hot, and others early. Even when cut for hay it is desirable to have a good aftermath for pasture or plowing under green. If you happen to strike a wet year there is Clover for that kind of a season.

**Contains Alfalfa, Red Clover, Sweet Clover, Alsike, Ladino and Scarified Early Korean Lespedeza**

We can give you an exceptionally low price on this wonderful seeding because we can use in it some lots of seeds that are grown mixed. Those can be bought at sharp discounts under the prevailing market. We add other clovers to make a balanced seeding. Red Clover, Alfalfa and Alsike makes the largest percentage with Alfalfa predominating. Also contains enough Ladino to produce a nice stand of that valuable Clover in with the others.

7 to 8 pounds per acre will give you a good stand. That makes the cost of seeding exceedingly low. SEE ITEM NO. 58 ON PRICE LIST. (If you have mislaid our price list please drop a post card and another one will be promptly sent.) Remember, our prices include "GRO-COATING."

Rosalie, Nebr.

Dear Sirs:  
I never had a stand of Alfalfa and Clover as nice as I had this year. I sowed less seed per acre, and got a better growing crop. I sure want Gro-Coated seed on my future purchases.

Harvey Thield

# **LOT Just-Rite** **RED CLOVER**

**With Alsike and Timothy**  
**Now Contains 50% Clovers**

Here is one of our favorite combinations made richer and better than normal. Mixed seedings are becoming increasingly popular. Timothy is considered one of the best grasses to use with Clovers. It helps these legumes to grow erect and it is better than straight Clover for soil erosion control. The Timothy roots hold the soil better. The Clovers feed nitrogen to the Timothy, thus increasing its growth and improving its feeding value. In many areas payments are being made for making such seedings. But whether you get "outside" money or not, it is good business to hold the soil you have by using grass seed. Use the Clovers to build up soil fertility and to produce high protein feed.

## **A Highly Satisfactory Seeding**

You can get an excellent stand by sowing at the rate of 7 lbs. per acre. In fact at 6 lbs. per acre you will have an average of over 24 clover seeds per square foot, plus the grass seed. It is economical and you have practically double assurance of getting a good stand. There is plenty of both Red Clover and Alsike, so if either should fail completely there still would be a good stand of the other. Alsike will stand more wet conditions and more acid soils than the Medium Red.

The seed is all hardy re-cleaned stock. The seeding has the ability to produce excellent stands of heavy yielding hay or pasture crops. The feed is of excellent quality. You can build up your land and check erosion with it. You can save very materially on your seed bill. This Lot Just Rite Mixture has been pleasing our customers for years. SEE ITEM NO. 103 ON PRICE LIST for "GRO-COATED" price.

# **LOT BEAUTY** **RED CLOVER WITH 25% ALFALFA**

## **CHARACTER OF LOT BEAUTY**

*See Sample Enclosed*

This is a combination which is similar to the Lot Leader described above (upper left), but instead of Timothy added to the Red Clover this Lot Beauty has Alfalfa added. There are a great number of our customers who prefer straight legumes. In those instances this Lot Beauty is strongly recommended.

## **THE QUALITY IS HIGH—THE PRICE IS LOW**

At seed harvest time our buyers comb the country for outstanding values which we can pass along to our customers. In the case of this Lot Beauty we have assembled a number of different lots which contain a small amount of alfalfa seed. Because of this fact they were purchased at a lower price. We have taken these different lots and added to them a quantity of high quality Alfalfa seed which will approximate 25%. By handling it in this way we can save you money on your seed bill and at the same time give an outstanding value that is sure to please you.

All of this seed is thoroughly re-cleaned and is high in purity and strong in germination. Not only will it make excellent hay and pasture, but it will also improve your soil materially. Please be sure and inoculate your seed which will enable the plants to draw nitrogen from the air and store it in the ground. Frankly, we do not have too much of this seed, therefore it would be to your advantage to send your order as promptly as possible. SEE ITEM NO. 31 ON PINK PRICE SHEET. This seed is "GRO-COATED." See pages 2 and 3.

Arkdale, Wis.

Gentlemen:  
I compared Gro-Coated Alfalfa seed with other seed which was not Gro-Coated. The stand from your Gro-Coated seed is almost twice as great.

Walter Cappel

# HARDY RED CLOVER

Berry's Famous **WORLD BRAND QUALITY**

## IDAHO

### Lot More Hardy

Idaho grown Red Clover seed always commands a premium on the market. It is unusually beautiful seed. It has extremely fine color. It is bright, clear clean. The plump seeds are full of vitality. The seed has strong germination. It is produced under conditions that makes the finest quality of seed possible. If you are looking for something superior to the average Red Clover seed you will find Idaho grown stock to be a fine selection.

This Lot More Hardy is a lot of Idaho grown Red Clover that contains a little percentage of crop seed. By crop seed we mean seeds of other crops like Alfalfa, or Alsike or Sweet. There is about 4% of this crop seed in Lot More Hardy. From a practical standpoint it will do all that the World Brand will do that is quoted, yet you can buy it around a discount of \$6.00 per hundred. We know that many of our customers like to make savings such as this. That is why we snapped up this particular lot when it was offered to us. It's just as nice looking as the World Brand quality, in fact only an expert analyst would detect that there was this 4% of crop seed in it. If you demand Idaho seed as many farmers do this is the value for you. All our Red Clover prices are Gro-Coated. See Item No. 35 on Price List for quotations.

### World Brand Grade

This is the extra fancy quality of the Idaho grown Medium Red Clover. Many farmers are glad to pay premium prices for Idaho Red Clover. You will not find it any finer than this beautiful World Brand grade. It is the best that money can buy, 99½% pure Clover. We price it to you on a wholesale basis. See Item No. 36 on Price List of quotations on Gro-Coated seeds.

### Wonderful Service—Big Yields

Sirs: Le Sueur, Minn.  
I have been well pleased with the seed I bought from you. We have had excellent yields and wish to thank you for your wonderful service.  
Very truly yours, Harold C. Budke.

## CENTRAL STATES

### World Brand Red Clover

#### Extra Fancy Quality at Money Saving Prices

Medium Red Clover is one of our feature items in "value-giving" this year. Our supplies for the early trade were accumulated under favorable market conditions. You have the advantage of the savings these markets made possible. See the enclosed price list for quotations or get our latest price list. We guarantee to give you more real value for your money in Medium Red Clover than is obtainable anywhere else. Your money, plus freight, refunded if you do not find it so. This World Brand seed is of high purity, strong germination, 90% or better live seed, has very good color, purity runs 99%. It is quality that will please any buyer.

You can spend more money for Medium Red Clover seed but you will not get seed that will do a finer job or that will be better. In order to give our customers the advantage of the very lowest prices possible we are deferring pricing our seed in the catalog. This book has to be prepared six to eight weeks before it is delivered to us. By putting in a separate price list we can print that, a day or two before the catalog is mailed. Be sure to look for this price list and save it. Every price in it is figured down to the lowest possible figure.

This Central States Medium Red Clover is grown in the Central States and is thoroughly adapted to that area. Berry's World Brand is the top quality in that seed. It will please those who demand the best. Remember it must satisfy you in every way or we trade back. Small lots postpaid, 1 lb., 65c; 5 lbs., \$2.75; 10 lbs., \$5.25. See Item No. 34 on Price List for other prices.

### Saves 1/3—Gets Heavier Stands

Dear Sir: Fennimore, Wisc.  
With some of our seeds, I get heavier stands at a savings of as much as one third less cost.  
Sincerely yours, Clarence R. Block.

## FANCY GRADE

This is really Fancy Brand and next to our very finest World Brand quality. It is much better in quality than many country dealers will sell for their best. It may run below the 99% purity of our World Brand but often this is due to a trace of crop seed such as Alfalfa or Alsike. Normally it should be around 98% purity and 90% germination. It gives fine results in appearance alone it would be hard to tell from our World Brand. If price is a factor in your Clover buying, don't hesitate to order this as we know the results will be pleasing. This is Medium Red Clover.

**HARDY ORIGIN—ADAPTED ANYWHERE**  
This seed is from the Central States such as Iowa. Seed grown in this section has proven itself, over a long time, to be hardy and adapted for use anywhere all weed seeds possible. It is bulked or blended uniformly. Every bushel you get from us will run as nearly alike as we can make it.  
Our regular grades of any seed such as this Fancy Red Clover is used. This seed, like our World Brand, has been processed over special machinery to remove all weed seeds possible. Be sure to order as choice as possible. See Item No. 33 on Price List. For Choice or Planet Brand Grade of Medium Red Clover See Item 32 on Price List for Gro-Coated seed.

## KENLAND

### State Certified Seed—Blue Tag Quality

Kenland is a variety of Red Clover that has been bred especially for disease resistance. In producing this Clover seven superior strains of Red Clover especially adapted to the southern corn-belt were subjected to heavy inoculation of the southern anthracnose for several generations. The plants that survived from this cross, it has the same general adaptation as the resistance, but it is far superior to it in its anthracnose resistance. In years when that disease is troublesome where Kenland to be way ahead in yields. While it was mostly developed for the southern half of the Corn Belt it is being used over a wide area. Montana Experiment Station states in their bulletin that it is a disease resistant variety that lives longer than other Red Clovers grown in the Red Clover belt of the United States. Foundation seed of the Kenland is being used in Montana. It really does not make so much difference where the seed stock is produced so long as you get the genuine Kenland. You can be assured of that in buying our State Sealed stock. The State Sealed seed is not Gro-Coated because we do not break the seal unless you order in quantities other than the regular 30 and 60 pound sizes. See Item No. 37 on Price List enclosed.

Our Special Low Prices  
on all clovers are on a wholesale basis.

# MAMMOTH RED

## The Heaviest Yielding of All Red Clovers

Mammoth Red Clover seed has for years sold at a premium price over Medium. This year it so happens that weather favored the production of Mammoth and there is a proportionately larger supply. That is why this year the price of Mammoth is even a little lower. You have here an opportunity to buy the very finest of seed at a very low cost. Our seed is GRO-COATED to give you extra assurance of getting fine stands.

Mammoth matures its seed crop somewhat later than the first cutting of Medium. Most all its blooms form at that time. It does not, as a rule, bloom the second time like Medium. The growth of Mammoth is taller and heavier. Its one big hay crop is extra large. The second growth makes wonderful pasture and is great for plowing under. There usually is not a second hay crop. This Mammoth Clover fits into some farming plans better than Medium. Many like it better in pasture combination because it is longer lived. We recommend Mammoth as a fine crop to use for plowing under to build up the soil. You can afford to use it liberally at present prices.

### World Brand

This is top quality Mammoth. The finest hardy northern grown seed. Beautiful color. High purity and germination. See Item 41 on Price List for big money-saving prices.

### Planet Brand

A very serviceable and dependable quality of Mammoth. May contain a trace of crop but is capable of producing excellent results on your farm. See Item No. 40 on Price List.

# ALSIKE CLOVER

THE CLOVER THAT GROWS UNDER UNFAVORABLE CONDITIONS

## Lot ECONOMY

### Alsike with Ladino and Timothy Contains 50% Clovers

This very popular combination is now better than ever before. Our customers use tens of thousands of pounds of it each year with great satisfaction. Now, Ladino Clover is added, which is described on page 27. There is enough Ladino to give you a good start of this truly wonderful Clover. It will add to the production and the feeding value of the crops.

The Timothy in this Mixture helps hold up the Alsike and the Ladino. Such a growth is taller, cleaner and yields heavier than when the crops are sown separately. When sown at only 6 to 8 pounds to the acre, you get approximately 50 to 70 Clover seeds per square foot. You will find this to be a very satisfactory, as well as an economical seeding. The crop is very nutritious. This seed is adapted to a wide range of soils and climatic conditions. It is wonderful for either hay or pasture. Do not confuse this with other Mixtures that are not so rich with Clovers. There is true economy in using Lot Economy.

## PLANET Brand

The Planet Brand is a very choice grade of Alsike Clover. It is a good serviceable quality that you can get at a very decided saving in price. It does not require any more seeds per acre, and should produce entirely satisfactory results. Our customers buy large quantities of this grade every year. The color is not quite so dark as in our World Brand Western. The seed is a little smaller, but we know you will find it highly satisfactory. This seed is often used by farmers who have some Timothy of their own and use this for a mixture, or it can be combined with other grasses. This Alsike can be grown from Oregon to Maine, from Minnesota to Tennessee, as well as in southern states. We have grades to fit the demand of different buyers and certainly can serve you well on Alsike.

### 30 Years of Savings and Satisfaction

Dear Sirs:  
Berry's has been supplying me with seeds for over 30 years. I have always found them very satisfactory and also cheaper than I could get them at home. Your service has been prompt and courteous.

Very sincerely yours, M. A. Piddock.

Showing Growth of Alsike Clover

## WORLD BRAND

Alsike is a Clover that is adaptable to conditions that are unfavorable for other clovers. It is a very valuable crop. Pound for pound it is higher in feeding value than Red Clover. It will grow on wetter land than Red Clover and also is not so sensitive to acid conditions. You may be passing up a crop that you are needing when you pass up Alsike. It is a fine stemmed perennial clover. It has a beautiful green color. Less dusty than Red. Under favorable conditions will grow three to five feet tall. Prefers loam or heavy land. It is an excellent practice to sow a couple of pounds of Alsike with Red Clover. It helps to secure a better stand and a thicker growth. Alsike is generally easier to get started. The seed is smaller, five to six pounds per acre are a plenty. Stands trampling well and is good for pasture and makes wonderful hay.

ITEM  
No. 54  
ON  
PRICE LIST

### Finest Quality Hardy Seed

World Brand is beautiful, rich, dark green colored Alsike seed, has large berries, strong vitality, and is in our opinion the finest Alsike Clover that can be had. I know you will be proud to show this great Alsike value to your friends. We guarantee you a big savings on GRO-COATED seed. Postpaid 1 lb., 60c; 5 lbs., \$2.75; 10 lbs., \$5.25.

Inoculation Pays Big Dividends

## FANCY Brand

This Fancy Grade of Alsike is equal in quality to what a good many dealers may sell as their best. It certainly is very nice seed, and will give you good success. Compared to the average it may easily rate as the best. You save around \$3 per hundred in cost over our World Brand and \$6.00 to \$7.50 over most grades of this character. The seed will go just as far and you do not have to use any more seeds per acre. Our stocks of Alsike Clover this year are very good and we urge you to use some of it. It is a lot lower in price than Red Clover, and it goes much further. We would especially suggest that you stretch your Red Clover seed by putting in some Alsike. Even if you only use a pound or two per acre, you will find that a very good farming practice. A lot of farmers do it.

### Seed, Prices and Service Please Him

Dear Sir:  
I have been buying seed from Berry's for the past 10 years. Dealing with you has always been a combination of good seed, reasonable prices and excellent service. Respectfully, Peter Crestani.

# SPECIAL CROPS FOR SPECIAL PURPOSES AND PROFITS

## LADINO GIANT WHITE DUTCH

### THE NEW 4-PURPOSE PASTURE CLOVER

This clover is largely used for pasture but it also can be put in a silo or cut as a hay crop. It has big profit possibilities as a seed producer if the season is not too wet.

Ladino is a widely adapted, easy to start, perennial clover. It is very palatable and nutritious. High in mineral and protein content. It is among the earliest legumes to start growth in the spring. Produces abundantly on upland of fair to good fertility. Will stand wetter land than Alfalfa or Red Clover. Good on loam and clay land.

It will grow two to four times as large as White Clover and six times as big as English Wild White Clover. Stems are erect, 10 to 15 inches long. Also has fleshy creeping stems that root at joints. Covers the ground thoroughly. One plant may occupy 2 or 3 square feet of space. Blossoms are as large as Red Clover. It is especially valuable mixed with other grasses like Timothy, Blue Grass, Orchard Grass and is sometimes used with Red Clover or Alfalfa in pastures.

Pennsylvania reports Ladino used as a poultry range, yielded as high as 30 to 40 tons of green feed per acre. May run as high as 30% protein on a dry basis. An 8 acre range carried 2500 to 3000 head of poultry from April until late October. On a dry basis, yield was calculated at 5.4 tons per acre. Illinois reports indicate 3 cows per acre may be pastured throughout the grazing season. Ohio tells of two cows and three calves per acre the entire season without any other feed.

### Widely Adapted

It is being grown in most states from the Atlantic to the Pacific and south into Tennessee. Michigan says it can be used for hay, silage or pasture. Illinois says it is adapted to the entire state. A Kentucky report says it grows practically every month in the year. We recommend it for most any section and soil, unless soil is low in phosphorus. Phosphate and those elements can be readily supplied. On sand or very heavy clay we do not recommend it. The clover is shallow rooted and often does well on land underlain with hardpan. It is impossible to tell you in this limited space all the wonderful features of Ladino. We urge you to try some and see what it will do. Ask for our free descriptive circular on Ladino.

A little goes a long way. There are over two million seeds in a pound. You can top seed on thin pasture in February or early March without covering. New seeding should be made on a firm well packed seed bed. Roll, if you can, before and after seeding. Two pounds per acre is plenty.

In Mixture one half to one pound is ample. Even a quarter of a pound will provide over five seeds per square foot. Prices small lots, postpaid, one pound \$2.00, five pounds, \$9.25. See item number 62 and 63 on price list for quotations on Certified and field inspected Ladino. Field inspected means true Ladino, but it isn't sealed by State authorities as in the Certified. Certified Ladino available sealed in fifteen, thirty and sixty pound bags. Smaller lots are not sealed. Non-sealed bags are GRO-COATED. Sealed bags are not.

Please write us if you have mislaid our Pink Price List

Showing luxuriant growth of Ladino in an 80 acre field in southern Iowa in mid September after a hay crop had been taken earlier in summer.

## BROADLEAF BIRDSFOOT TREFOIL OFTEN CALLED POOR LAND ALFALFA

Use of this very remarkable legume is growing by leaps and bounds. It is a long-lived, deep rooted legume that will grow on poor land or rich land, on wet acres or dry ones. It is a great crop for pasture. It stands a lot of trampling and close grazing. It stands up under heat. It is grown very freely in New York State as well as in States farther South. The Iowa State Experiment Station states in one of their bulletins that their own experiment, plus reports from many farmers, indicate that it is an unusually well suited legume for permanent pastures in Iowa. What it does in Iowa, it can do anywhere in States having similar climatic conditions as well as in areas South of us. New York State has, perhaps, had even a wider experience with the Trefoil than any other State.

Do not confuse Birdsfoot Trefoil with ordinary Yellow Trefoil. The crops are quite different. The Birdsfoot Trefoil is one of the best types. The plants grow 18 to 36 inches long. The crop looks very much

like fine stemmed Alfalfa. It has a deep tap root with branches. The feeding value is high. Hay composition shows Protein 14.24%, Fat 2.90%, Fiber 29.60%, Calcium 1.10%, Phosphorus .28%. We had some very wonderful results with it in our experiments here at Clarinda. We had some land that we wanted to put in a row crop and sowed it to Broadleaf Trefoil. It was sown very late, along toward the first of June, and it was in bloom in August and it made a great abundance of fine stems and heavily set with leaves.

### EMPIRE BROADLEAF TREFOIL

Empire is a variety of the Broadleaf Birdsfoot Trefoil that has come out of New York State. There are some who very much prefer the New York strain of the Trefoil. This strain makes its largest hay production in the first cutting. The second growth is used for late summer grazing. Of course, in other areas, they do not attempt to make hay out of the crop at all and use it exclusively for pasture purposes. We have contracted a limited supply of this Empire Broadleaf Trefoil. See item No. 64 on your price list. The regular Broadleaf Trefoil described above is of the European strain. That seems to be somewhat more erect in growth, a little quicker to establish itself and makes more second growth. For the Northern areas, the Empire is probably a good selection to make. For other areas, the European should be very satisfactory. Either Empire or Regular Birdsfoot Trefoil in small amounts, 1 pound postpaid, \$2.35, 5 pounds \$11.00, 10 pounds \$21.00.

### Better Than Advertised—Prices Lower

Gentlemen: Saline, Mich.  
I have purchased practically all of my grass seed from you for several years. They have always been better than you advertised and at a much reduced price.  
Sincerely yours, Orson E. Tobias.

Birdsfoot Trefoil is adapted to a wide range of soils. It produces seed abundantly. It sets seed even when closely grazed. After it is well established, it has a high acre production. The crop is palatable. It has a high feeding value. It is able to maintain itself in competition with sod forming grasses such as Blue Grass. It can survive severe grazing abuses. It is winter hardy. We have had no reports of bloat as yet on Birdsfoot Trefoil. It probably is because it is so fine stemmed and not sappy. Trefoil has done well with Timothy and also with some types of Brome Grass. It has been grown on some very thin land. It is impossible in the limited space we have here, to tell you all about Birdsfoot Trefoil. Be sure to write for our free circular on Trefoil. It gives you more detailed information. Sow around 4 to 5 pounds of seed to the acre. See item No. 65 on price list.

### CRIMSON CLOVER

This Clover resembles Red Clover in its growth. Blossoms are longer and brighter colored. Stems are somewhat more hairy. Grows 2 to 2½ feet, upright branching plants. It roots deeply. Provides generous quantities of nitrogen for soil improvement. It will grow on poorer soils than Red Clover. Very efficient for green manure. Plowing under a good crop of Crimson Clover is estimated to equal 20 loads of manure. Stubble alone plowed under is equal to 12 tons. It is considered a cheap source of nitrogen. One authority says it is worth \$20.00 to \$30.00 an acre in its nitrogen gathering value alone.

This crop is most extensively used in the south. There it is sown in the fall and acts as a winter annual like wheat. It prefers a cool growing season. When used in northern states it should be sown in the spring, as it will winter kill. Growth, when sown in the spring, depends upon season. Will make its full growth same year it is sown. Seed is larger than Red Clover. Sow 15 lbs. per acre. Our seed is of very fine quality.

Small lots postpaid 1 lb. 50c; 5 lbs. \$2.00; 10 lbs. \$3.75.

See Item No. 60 on Price List

### Quality Shows in Field Performance

Dear Sirs: Clifton Hill, Mo.  
In every instance the shipments of seed I have received from you have been satisfactory in every way. Not only the quality but also the field performance of your seed has been the best.  
Yours very truly, John H. Dickerson.

# BROME GRASS

★ HIGHLY PRODUCTIVE  
★ EXCELLENT FEED  
★ DROUGHT RESISTANT

## One of the Most Valuable of All Grasses

There is a tremendous interest in Brome Grass throughout the north eastern quarter of the United States. From Kansas to the Dakotas, across the entire nation, Brome Grass is showing itself to be a very profitable crop. Practically every state experiment station has one or more bulletins or circulars telling about this great crop. They all praise its drought resistance which comes from its deep root system. Its palatability which it keeps even after plants are dry. Many give reports on the high feeding value and heavy production of Brome especially when grown with Alfalfa.

## It is a Crop That Is Widely Adapted

The Illinois Station reports Brome is adapted in that state from north to south. It has given good results in Kentucky, Iowa, Nebraska, Indiana, Minnesota, Wisconsin, Michigan are great Brome states, and a lot is grown in Canada. We consider it adapted throughout the eastern U. S. and in farther western states.

As to soils, it prefers loam land although it has given good results on sandy soils if not too low in fertility. Well drained muck land will grow Brome if they get an application of some phosphate and potash. Brome is moderately resistant to Alkali. We do not recommend it for wet land but it will stand overflow that only stays on a few days. It will also stand a lot of silting and come up through quite a heavy deposit of silt if the Brome is well started at that time. You will find it a fine grass to use in terrace outlets and grassed waterways because it has a dense spreading root system.

## Other Valuable Features of Brome

It starts growing early in the spring. It yields more than most any other grass. You can graze it heavily but if you have an excess of growth, just let it stand. It will retain its palatability and feeding value and your stock will eat it later. This grass is substantially higher in protein than Timothy. It outyields Blue Grass and Orchard Grass. Brome is chiefly used for pasture but it also makes good hay. You can combine the seed crop and still have the leaf growth by setting the combine high or by stripping the seed.

## How to Get Started with Brome

The seed is light and coarse. It is difficult to feed through a drill unless it has good agitators in it. A good plan is to sow it with about 1½ bu. of oats or with some cracked corn to keep the seed flowing through the spouts. Your seed bed should be fine and firm. Discing is often preferable to plowing. Then harrow and if possible roll with a cultipacker. Then drill in seed but be careful not to cover over ½ to ¾ of an inch. You can sow broadcast and harrow but you do not get such a uniform covering. We advise rolling again after seeding. Use 20 lbs. per acre if you sow it alone. When mixed with alfalfa there is quite a difference of opinion. The 40-60 combination we list below is good. Some use more, some less. You can buy any alfalfa you like and seed in proportion to meet your own ideas.

### "Thicker Stand, Taller Growth"

The Gro-Coated seed which I sowed last spring (Vetch, Lespedeza, Crimson Clover, Red Clover) gave me a good stand. It was much thicker than seed from a stand produced from non-Gro-Coated seed and it grew a lot taller. It is already headed out and the crop from the non Coated seed is not. I surely want Gro-Coated seed.

Albert Vileta, Jr., Elberon, Iowa.

## Getting the Best Results

Brome Grass uses lots of Nitrogen, that is why many like to sow Alfalfa with it, to keep up the Nitrogen content. This also, of course, can be done by applying commercial fertilizer. That will help you to maintain stands of Brome and high production over a long period of time. To get the best pasture from Brome, let it maintain a growth of at least 4 to 5 inches. You can often get a big extra cash income from Brome Grass seed production as it will yield 200 to 700 pounds per acre. If the seed is combined and not thoroughly dry, be sure to spread it out and turn it to prevent heating, otherwise, you will kill germination. The kind of Brome to select depends somewhat upon the location and on the way in which you expect to use it. See next page for variety description.

### "Thoroughly Satisfied"

The Gro-Coated Alsike Clover seed we got was sown in oats last spring. The Oats was late again so the clover got a late start but it grew fine, almost as fast as the oats, a lot of it went to seed. This ground had never been limed and very little clover on this farm before I purchased it. It grew fast and made better stands. I sure want Gro-Coated seeds in the future.

Geo. E. Frech, Birmingham, Ill.

Be sure to write us if you have mislaid our Pink Price List

# ALFALFA and BROME a Great Combination

As explained above, Brome Grass likes lots of Nitrogen. The cheapest and best way to provide that is to sow Alfalfa and Brome together. The Alfalfa supplies the nitrogen and at the same time increases the yield, and raises the feeding value of the crop. They are well adapted to growing together and provide a great drought resisting, palatable, perennial crop that can be used for either hay or pasture.

We should all pay more attention to our pastures because they can help us make a lot more money. Dairy cows, sheep and beef cattle will all bring greater profits when a good pasture is available. We know of nothing better than Brome and Alfalfa providing of course your land is adapted to Alfalfa. You can cut grain and food concentrate costs when you have such a pasture on your farm.

## 60% Brome—40% Alfalfa, a Popular Combination

The percentage of Alfalfa to use depends largely upon personal preference. Some like it mostly Brome and others just reverse, but a 60% Brome and 40% Alfalfa seeding by weight, the total seeding of around 20 pounds per acre, is a very popular one. When used as a pasture, the Brome cuts down the danger from bloat on Alfalfa and the two together make a wonderful combination. Brome and Alfalfa seeds do not stay mixed too well in shipment, it tends to separate, therefore, we would advise that you make your own combination. We will be glad to supply you with whatever variety of Brome you wish and whatever grade or type of Alfalfa. Thus you can make just exactly the kind of a combination that you personally prefer. Remember that you can now buy your Brome Grass Gro-Coated. We have had to devise special machinery to do it, but we believe that Gro-Coated Brome is far superior to Brome Grass not Gro-Coated.

### Brome and Alfalfa Make Big Yields

Dear Sir:  
I have always been very well satisfied with your seeds. This year I harvested 30 tons of alfalfa and Brome grass off of 7 acres. Your prompt service has been greatly appreciated.  
Sincerely,  
Merle L. Schrader.

Burlington, Wis.

Gentlemen:

For many years my Father purchased from your Company, all of the seed used on his farm. He was so well pleased with your service and the price that he recommended I continue buying from you after I took over the operation of the farm. I have found that your seed is as good or better than advertised in your catalog. Very truly yours,  
Stanley F. Scheering.

Hamilton, Ohio

# SOUTHERN BROME

The kind of Brome Grass to select depends somewhat on where you live and how you want to use the crop. The Southern Bromes are taller growing, they are more vigorous for areas having climatic conditions similar to the southern  $\frac{2}{3}$  of Iowa and on South of that. North of this line, the Northern or Canadian seems to do about equally well. There are some, however, North of this line who prefer the Southern because of its faster growth and there are others South of this line who like the Canadian because it is not quite as competitive with Alfalfa or other crops that they sow with it.

The Southern strains seem to start off somewhat faster and also to stand hot weather better than the Canadian. Because of its more aggressive growth, it may use up still more Nitrogen and, therefore, fertilizing becomes extra desirable, both from the standpoint of hay yields and seed production.

Please remember that our prices on Brome are for the seed Gro-Coated. Last year we were unable to treat this seed as we did not have the machinery for handling it, but we are now set up to do it and strongly recommend it. We believe that Gro-Coating gives you a big extra measure of assurance in getting satisfactory stands. The price is 2c a pound less not Gro-Coated, but when you figure the little extra cost per acre for Gro-Coating, we believe it is the wisest money that you can spend.

## LINCOLN BROME

This is a strain of the Southern Brome Grass that has been developed in the State of Nebraska. This is a very popular selection of Brome Grass. In it, you will find combined a very high degree of winter hardiness plus an ability to stand a lot of hot, dry weather. It is a very vigorous growing grass, it will make a taller growth and heavier production than the Northern. This Grass starts growing very early in the spring and stays on the job until late in the fall. It is adapted to a wide range of soils, although we do not recommend Brome for wet land. Highly productive stands can be maintained for a long period of years especially if the land is kept in a state of high fertility. See item No. 137 on price list for quotations on Gro-Coated Lincoln Brome.

## ACHENBACH BROME

This takes its name from the farmers who made a special selection of Brome Grass in Kansas. It is very similar to the Lincoln in its performance. Some say that they can see no difference between them. Others contend that the Achenbach will stand even higher temperatures, that it seems to start off even earlier in the Spring. It certainly is a very fast starting, rapid growing Brome Grass. It is both highly drought and cold resistant. There is always a heavy demand for Achenbach and the demand often exceeds the supply. See item No. 138 on price list for Gro-Coated quotations. Any variety of Brome, 2 pounds postpaid 80c; 5 pounds \$1.75; 10 pounds \$3.35.

## CANADIAN No.1 BROME

### Item No. 136 on the price list

We generally supply Canadian No. 1 when we receive orders for Northern Brome. This seed runs heavy in weight and of very good germination. Many carloads of this seed are used by our customers every year. It is a quality that our trade likes. The purity and germination give excellent assurance of getting satisfactory stands. This is not as competitive to Alfalfa as the Southern and we especially recommend it for use in connection with Alfalfa seedings. It will not deplete your soil fertility as fast and has very high resistance to cold as well as drought. Some reports that we have indicate that north of central Iowa, the Canadian is fully as productive as the Southern strains. It is still extensively used in the Southern sections, especially in combination with other Grasses or Alfalfas. We can supply you with any of the seed and they are all Gro-Coated to give you extra assurance of getting satisfactory stands.

## "REED CANARY GRASS"

### See Item No. 141 on price list

### A Remarkable Permanent Grass

This is a grass of great value. It is one you can grow on exceedingly wet land and it is also a great drought resister. In one of the driest years we had in Iowa, Reed Canary Grass stood out like an oasis in the desert. It yielded three ton per acre when it was so dry that Sudan only made half a crop. Produces two to three cuttings a year. It is a great crop for waterways. It is good for hay and pasture. It is widely adapted and grown from the Atlantic to the Pacific, in the northern half of the United States and as far south as eastern Tennessee. From Oklahoma to Wisconsin we get great reports on this grass.

### Very Leafy, a Heavy Producer

It is a very leafy grass. You almost have to see it to appreciate it. Yields of three to five tons of cured hay per acre have been obtained in two cuttings. The second crop is leafier but not quite as tall. A seeding lasts many years, starts growing early in the spring, is still on the job in the fall. It makes a very strong sod. Stands in Minnesota have been producing hay crops for 15 years, and then 18 years as a pasture. It is not a pest. It can be easily eradicated. We cannot begin to tell you all about this crop in this space. Be sure to write for our circular on Reed Canary Grass that tells how to grow it.

### Be Sure to Use High Quality Seed

Seed supplies are more plentiful this year and the price is less than half of last year's quotations. Be sure to try some. Also, read about the new Meadow Fox-tail grass on page 20. Price small lots, postpaid: 1 lb., 75c; 5 lbs., \$3.25; 10 lbs., \$6.25.

### Best Crops Ever Grown—Likes Berry Seed

Skiatook, Okla.

Dear Sir:  
I was very pleased with the seed I bought from you. It's more than satisfactory and has given me some of the best crops I have ever grown.  
Yours truly, Eugene Morgan.

## "WATERWAY MIXTURE"

### See Item No. 108 on price list

This special seeding has been prepared in response to a great many requests that we have received from our customers. Since soil erosion work has become more commonplace, farmers are becoming more conscious of the need for such a seeding. On many fields it has been found highly desirable to have strips of grass in the areas where the water drains off. It is on such places that soil erosion generally does its greatest damage. If a good stand of grass with a strong sod can be established in such places the water does not cut down into the soil. It prevents it from cutting in and forming gullies which would speedup the flow of the water, and thus cause it to carry more soil down the river.

### A High Quality Mixture of 8 Different Crops

These areas are not necessarily what you might call wet land, although they may carry a lot of water after heavy rains. They may be inclined to be a little lower than some of the fields. It is desirable to have in it some grasses that will withstand a lot of wet weather. The primary idea is to get a combination that will give you a dense sod and at the same time provide these other characteristics. Berry's Waterway Mixture contains eight different grasses and clovers. Reed Canary Grass, Alta Fescue, Red Top, Brome Grass, Timothy, Meadow Fescue, Alsike Clover and Ladino Clover. Practically all of these are expensive grasses, and a good mixture that will do the job in the most satisfactory way. You can get fairly good results from some of the other mixtures that we have. If you want something exclusively for a Waterway Mixture, we would recommend this to you highly. Our suggestion would be that you make fairly heavy seedings of around 20 to 25 lbs. to the acre. If you are looking for the best for this purpose, Berry's Waterway Mixture, I am sure will give you a high degree of satisfaction. Prices small lots, postpaid: 1 lb., 70c; 5 lbs., \$2.75; 10 lbs., \$5.35.

### Berry's Seeds Can't Be Beat for Germination

Dear Sirs:  
I have been buying my seed from Berry's for a number of years, and find that for germination, your seed can't be beat. I will buy all my seed from Berry's this year.  
Sincerely yours, A. F. Brantner.

La Salle, Colo.

## LOT FANCY

The Alfalfa that we use in making up our Corn Belt Alfalfa, is a combination of origins. We believe that this will make a very satisfactory seeding throughout the Corn Belt. Seed of these origins is widely used in States like Idaho and when grown there one year, resold at fancy premium prices. We use approximately,  $\frac{1}{3}$  each of the hardest Washington or Oregon, the Northern Siskiyou County high altitude California and the highest altitude New Mexico. By giving you this combination of origins, you get seed of wide adaptation. When you sow 12 pounds to the acre, you would get an average of about 24 seeds of each kind per square foot or a total of 72 seeds. If, for any reason, your particular conditions should not be suitable for one, there would still be plenty of the other to give you a good stand. This is especially true when you use the Gro-Coated seed.

All of the lots of seed that come from these areas are not equally nice in color. Those that do not make the very top grade, go into Lot Fancy. It does not contain any real off-grade seeds, it just comes a little below the very top grade. You will find this a thoroughly dependable lot of high quality seed. It can easily pass for the best unless compared with something extra fancy like our World Brand. You will like our Corn Belt Alfalfa and you will like it Gro-Coated. See Item No. 12 on our price list.

### Healthier Stands

I noticed our Clover, and especially the Alfalfa from Gro-Coated seed, has not shown the yellowish spotted colors we have gotten after our spring seeding. I presume it has been some fungus factor which caused that condition. We are very well satisfied.

Dr. Earl Ferris, Danville, Ind.

### Unusual Growth

The Gro-Coated Alfalfa was sown in Wheat. It was knee high when I cut the Wheat and lots of it was in bloom.

Gro-Coated Clover was 12 inches high in Oats when they were cut and have cut it again in September for hay. None of this had any extra fertilizer.

James L. Hillock, Sheridan, Wyo.

### Gets Stand Under Difficult Conditions

I put Gro-Coated Alfalfa seed in a gravelly hill. It produced a very good stand. Was able to cut it twice this summer and really should be cut again this fall. Gro-Coating makes a lot of difference.

Frank Lentner, Navarre, Ohio.

### How to Start Alfalfa

We recommend that you have your land tested to see if it is acid. If you find it so, lime it and lime it as far in advance of seeding as possible. You can sow either in the Spring or in the Fall. Your seedbed should be fine and well settled. Do not sow it on a loose seedbed and do not cover very deeply. If possible, roll it in. The roller oftentimes makes the difference between success and failure in getting a stand. You can use a light nurse crop in the Spring if you wish, but by all means avoid a heavy grain crop with it. Inoculate your seed and use Gro-Coated seed as described below. Sow around 12 to 15 pounds of seed to the acre. Be sure to write us if you have any special questions on the seeding of any crop.

# ARIZONA WORLD BRAND

The Arizona seed is somewhat similar in its characteristics to the California seed, the Imperial and Sacramento as described on the next page. There is quite a decided preference on the part of some for the Arizona seed because they believe it to have a somewhat harder type of background. We do not consider it as hardy as the high altitude New Mexico and if you are wanting a harder type in the low price range, we would suggest the selection of the New Mexico. The Arizona, however, fits in remarkably well with the purpose that some farmers have in mind. They want to sow a kind that grows quick and fast. They figure that generally in the first year, they can get a good crop off of it that will more than pay for the cost of the seed, in fact, make it a very good investment even though part of it may kill out over winter. You find in this Alfalfa stock a character that satisfies them. It is recommended by some Experiment Stations to use in short rotations for soil building purposes. Where you have trouble growing Sweet Clover, this kind of Alfalfa is becoming quite widely used. We bring it to you in our very finest quality, our World Brand Grade, and it's all Gro-Coated. See Item No. 4 on our price list.

This is the World Brand Corn Belt Alfalfa as described above under Lot Fancy. Both of these lots are the Corn Belt stock. By Corn Belt, Alfalfa, we mean Alfalfa that we consider suitable for growing in most of the Corn Belt Areas. We like this type of Alfalfa for these large areas because it is the kind of Alfalfa that generally recovers somewhat quicker after cutting. It generally produces a larger tonnage and sometimes an extra cutting in a year. Frequently it will give you a hay crop the same year in which it is sown.

In the World Brand Grade, you get the Corn Belt Alfalfa at its very best. There is nothing nicer to be had. We guarantee this seed to please the most critical and exacting buyer. You will receive seed that has beautiful golden color, big bold berries, which have high germination, seed that's thoroughly cleaned and will test around 99.50% pure.

We cannot emphasize to you too strongly the advisability of getting your Alfalfa seed bought early this year because supplies of seed are drastically short. It is going to be our objective to try to hold our Alfalfa seed prices at the lowest possible levels throughout the year. We do know that it will be absolutely necessary to make advances in prices if we have to replenish seed on markets that are advancing as they are at the time that this goes to print. You are getting the advantage now of purchases that we made earlier which gives you a big extra savings. Remember, too, that our prices are for the seed Gro-Coated. You can deduct 2c a pound if you do not want it Gro-Coated, but that saves only around 25c per acre and the extra assurance of better stands that you get through Gro-Coating certainly makes it well worth the price. See Item No. 15 for price of World Brand Corn Belt Alfalfa.

### Inoculate and Gro-Coat

We want to emphasize that Inoculation and Gro-Coating are two different things. The Gro-Coating is described on pages 2 and 3 of this book and that supplies the disinfectant plus the growth stimulator, but that is not a fertilizer. The Inoculation, however, is something quite different. That is a live bacteria that you apply to the seed just before you sow it. It provides the bacteria which enable the Alfalfa plants to gather Nitrogen from the air and thus make its best production. Read page 34 for further information on Inoculation. Inoculation costs only 50c for a bushel size package, \$1.00 for 2½ bushel size and it will pay you to inoculate all your seeds. When you inoculate Gro-Coated seeds, we recommend putting the Inoculation on dry.

### Likes Berry's Seeds Best of All

Dear Sir: Suttons Bay, Mich.  
I have been using your seed for a long time and have been well pleased with it. I will continue using Berry's Seed as I like it better than any I have ever used.  
Yours truly, Leo Schaub.

### Cleanest and Least Expensive Seeds

Dear Sirs: La Fayette, New York  
I find your seeds the cleanest and least expensive of any I have ever bought. We've had excellent results. I also like the promptness of shipment.  
Sincerely, James E. McVoy.

# ALFALFA for every Section

You will find at Berrys a very wide selection of Alfalfa. See pages 22 and 23, as well as 30 and 32. Most of the Alfalfas listed on this page are hardier in their character than you might think possible, when you first consider where they are grown. There are wide variations in climatic conditions in many of these states, each one being described under its own heading. With Alfalfa very scarce we advise our customers to buy early this year.

When you select Alfalfa, you should consider the purpose for which you want it. For example, in some areas they are having some difficulty in growing Sweet Clover. Some Experiment Stations are recommending, and farmers are finding, that they can sow the rapid growing, heavy yielding California Alfalfa like the Lot Imperial or the Sacramento listed below. It is possible to get two cuttings the same year seeded, even though it may not all live over winter, you still have an investment that can give you good returns.

## LOT HIGH GROWN

### NEW MEXICO'S FINEST

We obtain seed from New Mexico grown at high altitudes in that state. The higher altitude crops are subjected to greater extremes of temperature. This tends to develop sturdier plants. They are better able to withstand fluctuating temperature conditions which frequently are so damaging to crops. We would consider this Alfalfa to have characteristics similar to the Kansas and to be adapted to similar areas. This seed commands premium prices over southwestern grown Alfalfa seed and there is a big demand for this type of stock. There is not a great deal of it available but we should be able to take care of early orders very nicely. The seed that we have is the World Brand quality which means it is clean, bright, plump, pure and of high germination. Shipment guaranteed to satisfy you in every respect. Our price, of course, is Gro-Coated. See Item No. 10 on our price list. Not Gro-Coated, it's 2c a pound less. This is an excellent value so long as the supply lasts.

## NORTHERN TEXAS

It seems a little unfortunate that the origin of Alfalfa is given by states. State boundaries are, after all, only artificial lines. The climatic conditions for example in northern Texas area are identical to those in Oklahoma adjoining it, yet the seed from Oklahoma sells for about \$10.00 a hundred more money and is absolutely no different. Our experience also indicates that the Oklahoma seed is no different in its performance than the Kansas, which sells at still higher prices. We believe that this extreme northern Texas grown Alfalfa seed will give results practically on a par with either of these two. That is why we took all of this northern Texas Alfalfa seed that we could get. For the money it is certainly a very outstanding value. With the Kansas and Oklahoma seed practically off the market, this seed should move out fast; so, if you wish some of it, don't wait until the last minute to buy it as there probably won't be any left. It's World Brand quality, guaranteed to please the most exacting buyer. See item No. 8 on price list.

## SISKIYOU COUNTY

### NORTHERN CALIFORNIA GROWN

As you may know, California is a long state. There is quite a wide range of climatic variations within this state. Not only is there a difference in north and south but also a difference in altitude. If you have a map showing the mountains in California and go to the extreme northern edge of the state you will find Siskiyou County is a mountainous country. These mountains shut off most of the warm Pacific air and winter temperatures drop well below zero. The Siskiyou County high altitude Alfalfa is produced at an elevation of more than half a mile above sea level. There are other states who produce what is known as northern Alfalfa. They have practically identical weather conditions. Immediately to the east of this county is Modoc County, and the Alfalfa from that area has long been considered by many as the equivalent of other northern origin Alfalfa seed. In fact a great deal of this seed goes into Idaho. Farmers there sell their own seed as Idaho grown at a premium and sow this character of seed in place of their own high priced stock. They do not change the character of the Alfalfa any by moving it to Idaho but because they can put the Idaho name on it next year they get a premium. That is not true in all cases but it is a fairly common practice.

You might as well make this saving yourself if you wish seed of this northern origin. The saving is a big one.

Since the seed production of northern origin Alfalfa has been very sharply reduced, the prices have advanced to quite high levels. There has been quite a wild scramble on the part of seedsmen to accumulate stock. We were fortunate in getting in on a couple of carloads of Siskiyou County Alfalfa seed. We are trying to get a hold of more because we consider it extra good. However, it is quite clear that we will have to pay extra money for it if we get more, so later in the season prices may be higher than they are now. In fact the seed may not be available at all. The Siskiyou County seed that we have is top quality. World Brand seed, finest money can buy. See Item #5 on price list.

#### Crop Grows Faster

I used Gro-Coated Alfalfa last year. It was not the highest grade of seed and I sowed 2 pounds less per acre. I got a wonderful stand. My opinion is that the seed plants grow faster. I surely want this kind of treated seed in the future.

Clarence Erickson,  
Prescott, Wis.

#### Alfalfa Makes Faster Growth

I consider plants from Gro-Coated seeds grow faster. I never saw Alfalfa before that bloomed even before Oats were cut. I have never seen anything grow so fast and thrifty. I will demand all Gro-Coated seed in the future.

L. H. Stroup,  
Montpelier, Indiana.

## CALIFORNIA

### Imperial

This comes from the Imperial Valley of southern California. It is the southern most seed. For areas having cold winters, we suggest its use as a one or two season crop for the purposes I have suggested in the article at the top of this page. It is beautiful quality seed and priced to save you money. It's a Gro-Coated price of course. See Item #1 on price list.

### Sacramento

This comes from the Sacramento Valley which lies to the north of the Imperial Valley and is considered to have characteristics of additional winter hardiness. We suggest its use for the same general purpose as outlined for Imperial. Because of its more northern origin it commands a higher price but still remains at an unusually low figure for extra high quality seed. See Item #2 on our price list for quotation.

#### Exactly as Represented

Dardanelle, Ark.

Dear Sirs:

With the experience I've had in buying seed, I cannot but give a good word for Berry's. Your seed is exactly as represented as to quality and price, and always gives full satisfaction.

Sincerely,

Arthur Cote.

#### Never Failed to Get a Good Stand

Bangor, Wisc.

Gentlemen:

Have ordered my seeds from you every year since I've been farming, and that has been 25 years ago. I think Berry seeds are the best for I have never failed to get a good stand.

Very truly yours,

William Haas.

# Extra Values in Grimm

Be sure to read page 34 of this catalog for information on inoculation. It pays to inoculate the seed of Alfalfa, Clovers, and all other legumes.

# ALFALFA

WORLD BRAND

## CHILEAN

### Variegated Blossom Alfalfa

This seed comes from old established fields that have stood for many years. When in bloom, the fields of this Chilean Alfalfa show a wide variety of colors in blossom. This variegation is quite generally considered to be an indication of a hardy type of Alfalfa seed. This seed was produced in California. It is considered, however, that the variety of Alfalfa is of greater importance than where it was grown. Authorities, for example, will tell you that the seed of the Certified Ranger and Buffalo Alfalfas produced in California, will be equally as hardy as seed of the same type grown in Northern States.

The seed that we have for you in this Chilean is a beautiful lot of seed. It has these big, bold berries that contain strong, vigorous germs, has the high purity, color, and germination. It is the kind of seed that will appeal to the most critical buyer. This Alfalfa makes big yields and fine quality. We do not represent this to be equally as hardy as Grimm, but we do consider this variegated type stock of a materially harder character than a great deal of the California Alfalfa being used. We know you will be delighted with the quality of the seed and we know that many of our customers will find this Alfalfa very well suited to their purposes. It should be able to be used quite far North, especially in short rotations. See item 3 on price list for quotations.

## BONAFIDE

### GRIMM ALFALFA

#### A Fancy Grade Lot

Lot Bonafide has for years been a very big seller with us. It is a selected value and a sound, dependable lot of seed to use. Here is honest-to-goodness quality that will give you good serviceable results. It does not have that extreme fancy color which means materially higher prices. If you wish the extra fancy-looking seed use our World Brand Grimm as described on page 23 of this book.

While this seed does not have the extra fancy appearance it has been well recleaned and has good growing power. This is northern grown seed and that kind of seed is extremely scarce this year. The better posted you are on the Alfalfa seed situation the more you will realize what an outstanding value this Lot Bonafide is this year. When you can buy seed of this character for more than \$10.00 per hundred below the price of the World Brand you are really buying seed worth the money.

Frankly we do not know just how long throughout the season we will be able to supply seed of this quality. We have a reasonable supply of it as our Catalog goes to press and we are hoping to obtain more of it. The probabilities will be, however, that these additional lots will cost materially more money. There are too many people trying to buy Alfalfa seed and this is bound to force the market to much higher levels. You will be using good judgment to buy your Alfalfa seed right away. In considering our values, remember that our prices are for the seed Gro-Coated. Not Gro-Coated there is a reduction of 2c per pound. We certainly consider Gro-Coating a wise investment.

No. 18  
ON  
PRICE LIST

#### Seeds Satisfy—Saves Money

Portland, Mich.

Dear Sirs:

I am perfectly satisfied with your seeds in every way. Also, your low prices saves me money.

Yours truly,  
C. W. Knoll

## BED-ROCK

### GRIMM ALFALFA

#### Our Lowest-Priced Grimm

This is a very serviceable lot of seed and has also northern origin, the same as Lot Bonafide. At the extremely low price that we have on Bed Rock you would not expect the color to be quite as fine or the berries as large. This lot contains smaller berries and there are off-colored seeds in it. The germination per hundred seeds is lower. However, you must remember that the smaller berries means there are more seeds per pound. When you sow seed you sow by weight or measure, and not by count. A pound or a quart of Bed Rock will contain more seeds for example than our World Brand. Therefore, even though the germination per hundred seeds tests lower, the number of sprouts per pound or per quart show up very favorably. In fact in some of our tests we've gotten more sprouts per ounce than from the more expensive seed.

We sell a lot of this Bed Rock Grimm Alfalfa every year. Our customers like it because they find it has the ability to produce good strong stands. It has the same hardy characteristics as the higher priced seed and the same yielding ability. You do not have to sow it at any heavier rate per acre. We suggest 15 pounds.

In the Grimm Alfalfa you do get extra hardiness that under some conditions is very desirable. If you consider that your conditions demand this we will be glad to take care of your order for the Grimm. We have it in these two lots and the other as described on page 23. Remember there is a saving of 20c per pound between Bed Rock and the World Brand. This really is a sensational value, and it's Gro-Coated too. If we have this at all later in the season it will be at higher prices because every time we acquire more of this seed it is costing us more money. Be sure to order your Alfalfa at once.

PRICE LIST

#### Consistent Values—Prompt Shipment

Homer City, Pa.

Dear Sirs:  
I seeded 10 acres of oats this year with your Northern Grown Alfalfa seed. I never had a finer catch of alfalfa, and that is quite some satisfaction. I like your promptness in shipments and your consistent values.

Yours truly, Homer F. Kunkle

# ORDERING IS EASY, SAFE <sup>and</sup> ECONOMICAL

## GUARANTEE

We guarantee to save you money, considering quality. If upon receipt of your order you are not entirely satisfied you can return it and your money, plus transportation charges, will be promptly refunded. Or you can keep it 60 days and have the seed tested in order to satisfy yourself that the quality is good and that you have saved money and secured a big bargain. Then if you are not pleased you can return it, and have all money, including freight paid, refunded. You must be satisfied and we guarantee to save you money.

For garden seed guarantee see page 38—nursery stock page 55. Gro-Coated guarantee page 2.  
BERRY SEED CO., Clarinda, Iowa.

## ★ Can Berry's Save Me Money?

We sell direct to farmers, eliminating extra profits. Our direct to you prices are generally on a wholesale basis, and sometimes even lower. You will also find that Berry's has a larger selection of seed than is available in any retail seed store.

## ★ Is the Seed Good Quality?

You will find dependable value in every grade and lot offered. In the World Brand quality you will receive strictly top grade seed. It is better than is oftentimes sold as the best.

## ★ What Grade Should I Order?

You will see from the description and from the price list enclosed that in some lines of seed like Alfalfas, Clovers and some Grasses we have different grades. These grades vary largely according to color of seed and size of berry. The lower priced grades are not quite as high in germination per hundred seeds, but there are more seeds per pound, and they give good results. Thousands of customers use them with excellent satisfaction. If you are among those who demand the best, then order the World Brand Grade. It is sure to please you. Where only one grade is offered, it is our best. Every shipment is guaranteed to satisfy you as explained above.

## BANK REFERENCES

Our Company has a Capital surplus in excess of \$2,500,000.00. You can check our financial responsibility further through Commerce Trust Company at Kansas City, Mo.; Omaha National Bank, Omaha, Neb.; First National Bank, Chicago, Ill.; Iowa Des Moines National Bank, Des Moines, Iowa; Bank of the Manhattan Company, New York, N. Y.; R. H. Mabbatt & Company, Chicago, Ill.; First National Bank, Lincoln, Neb.; and the Drovers National Bank, Chicago, Ill.

## ★ Is the Seed Adapted to My Area?

Some crops are more limited in their growth habits than others. Where winter hardness is an important factor, the description of each article will describe the character in that respect. If there are any questions in your mind about any crop, be sure to write us. The experts in our Service Department will be glad to answer you promptly.

## ★ Is There Any Advantage in Ordering Early?

By ordering early you have a wider selection to choose from. You have better assurance of getting exactly what you want. You almost invariably get lower prices because we make our early prices the lowest. You are also assured of having the seed on hand in plenty of time for your spring seeding.

## How to Order

By studying this Catalog you can get a very good idea as to what the crop may do for you. If you are in doubt write to our Service Department for expert advice. If possible, use our regular order blank when you order, if lost, any other paper will do. Give your full name and complete address, tell what station you want the seed shipped, and how you want it shipped. Freight or truck is most economical. Express or parcel post is quicker, but much more expensive. If you are in doubt how you want it shipped, you can leave it to our judgment. If your freight station is different from the post office, be sure to indicate it. If there is no agent at your freight station, we will prepay the freight and send you notice as to the amount due.

If you want the seed shipped by truck, try to give the name of your truck line and find out if they have a truck depot at

your station. Many truck lines serve small towns that have no depots. In such case you should give the name of some storekeeper or oil station to whom the seed could be delivered. It will then be shipped to you in care of such place of business.

Sometimes some lots of seed become sold out and unless you mark your order "No Substitution" we will send the nearest thing to it, and either refund the difference in price, or bill you for the balance, or notify you as to the change in price.

Please send remittance with order. That gives you better service. Use postal or express money order, bank draft or personal check. Do not send stamps or coin, if convenient to remit otherwise.

## Eastern Shipments

In order to save our eastern customers money, we have arranged to ship our seed from a north central Ohio town. That is to give you quicker delivery and lower transportation cost. We also may be able to ship from Chicago. Look at our pink price list to see how the seed is quoted. It costs more money to put the seed into these Eastern points, and there is an extra handling cost, so our prices have to be somewhat higher. However, the saving in transportation charge and the quicker service will much more than offset this small difference in price. **Do not write to any other address but Clarinda.** Your letters will simply be delayed because they will be forwarded on to Clarinda. If you wish your order shipped from the eastern point, just state that on your order, and remit the corresponding price.

### Retail Store at Marion, Ohio

We have a Retail Store at 420 North Main Street, Marion, Ohio. If you wish to drive in there for your seed, you will find a good selection available at very reasonable prices. We

are open there the year around, and urge you to drive in if you can. Many farmers come as much as 150 miles away to pick up their seed at Marion.

## Parcel Post Rates

Any order for seeds can be sent Parcel Post. Use the map above to find your zone and figure the rates below in remitting for any seeds ordered shipped by Parcel Post not quoted postpaid.

	1st lb., costs	All Additional pounds
Zone 1	12c	2c
Zone 2	12c	2c
Zone 3	13c	2½c
Zone 4	14c	4¼c
Zone 5	15c	5½c
Zone 6	16c	7¼c

These postal rates are in effect as this catalog goes to press. Should rates increase, we will bill you for any additional amount due. We can ship Express charges collect if preferred. Order early though, so we can ship freight which is cheapest, particularly on Seed Grains such as Oats that take a special rate. Above rates subject to any change in postal regulations.

## BETTER SERVICE

We have started our cleaning operations earlier this year, and are working our plant on a three shift basis. This will permit us to have more seeds ready for shipment early, and will cut down delays in shipment. If for some reason there is to be a short delay, you will be notified. Every effort will be made to ship your order promptly. We strongly suggest ordering as early as possible. We have improved cleaning facilities, a better organization and can take good care of your business.

## GRO-COATED SEED

Be sure to read pages 2 and 3 of this book telling about the "Gro-Coated" seed. All farm seeds, except as noted, are priced GRO-COATED. This slight cost is cheap insurance for better stands and bigger crops. We strongly recommend it.

## CATALOG PRICES

### Save Our Pink Price List

We are pricing our seed on a separate price list. That gives you the benefit of the latest market. Heretofore, we have had to set prices so far in advance that the prices could not be protected very long. Because of market fluctuation, we will still have to hold our prices subject to change, but by printing the prices later, they are less apt to change, and they will be protected against any advances as long as possible.

Be sure to save the Pink Price list enclosed with the book. If it gets mislaid or outdated, drop us a card, we will send you another copy at once. If possible buy from the price list that comes with the catalog, because some items may become sold out entirely, and others may have to be replaced on higher market. Our sincere desire is to give you the very best of seed and service and value. You can get that by buying early.

# LESPEDEZA

THE CLOVER THAT GROWS ON  
POOR LAND WITHOUT LIME

## Early Korean for the central corn belt

See Item  
No. 75  
on Price List

Berry's Early Korean has been widely known as the Early Giant Korean. It is a great producer and becoming more and more a crop of vital importance. The more farmers see of it the more anxious they are to start growing it. That is especially true during the hot summer months when Blue Grass pastures are thin and dormant. It is under these conditions that Lespedeza makes its best growth. It stands a lot of heat. It enriches the land, and makes very fine feed that is high in protein. It is often a life saver to have a field of Berry's Early Korean to give you high quality feed when you really need it.

This Lespedeza is also known as Strain #19604. It will mature seed 100 to 150 miles north of ordinary Korean. We consider this adapted to climatic conditions similar to those prevailing in the central and southern part of Iowa as well as into northern Missouri. That takes a large area in Nebraska, Kansas, Illinois, Indiana, Ohio, etc. It may be grown north of this area but we are not certain that it will mature seed north of central Iowa. U.S.D.A. states it will be a reliable

seed producer to the northern limits of Illinois. Another important factor is that the seedlings make an early start and seem to grow more vigorously than ordinary Korean.

### Big Profit Features

Growth up to two feet has been reported in some dry years. It will stand a lot of hot weather. Will respond favorably to moisture conditions. You can grow it on very poor soil without lime or fertilizer. On the better land it will grow taller and heavier. We have had customers report that it grows twice as tall as common Lespedeza. It produces up to 1000 pounds of seed per acre. An Iowa farmer used it by sowing it with Oats in the spring. After the oat crop was taken off, a hay crop of Lespedeza was harvested in August and in October a seed crop was taken. That is three crops off the land in one year. Write for our Circular telling you more about this great Lespedeza and other varieties. All our Lespedeza seed is Gro-Coated.

Small Lots Postpaid: 1 lb. 30c; 5 lbs. \$1.25; 10 lbs. \$2.25.

Showing leafy growth of Lespedeza

## SERICEA THE PERENNIAL LESPEDEZA

Item No. 76 on Price List

### Comes Up from the Roots Each Year

This variety if started early in the spring develops a big root system. Excels Regular Korean as a soil builder. Has wintered over as far north as Vermont, New York and southern Michigan. It is adapted throughout the corn-belt and very well suited to southern states. Produces one main stem the first year, the second year it sends out 10 to 15 stems and the following years the growth gets still thicker and finer. It will grow to a height of two to four feet. Has a large carrying capacity as a pasture. Cattle will eat it readily after becoming accustomed to it. Do not sow as early as most clovers; Lespedeza is good for Iowa. Sow around 12 pounds to the acre. Some sow a little earlier than April. Makes a wonderful crop. Our free circular on Lespedeza will also tell you more about this great perennial variety. There are many valuable characteristics in this crop. We urge you to grow some of it.

Small Lots Postpaid: 1 lb. 50c; 5 lbs. \$2.25; 10 lbs. \$4.25.

Showing growth of Sericea

## REGULAR KOREAN

### Grows Most Anywhere. Wonderful Pasture and Soil Builder.

Korean Clover is an annual. It grows only one year from a seeding. It reseeds itself very readily, and matures seed even after plants have been killed by frost. Thus, it is proving itself adapted farther north than was first thought possible. It is steadily and surely working its way north into Iowa, Illinois, Ohio and Indiana. The Early Korean described above also helps to popularize the crop farther north. It is quite a common practice to put Oats on land where Lespedeza has reseeded itself. After the Oats are off the Lespedeza is there to give an abundance of pasture from mid-summer until frost.

Korean Clover shows its greatest value as a pasture. It will do best during the latter part of June, July and up to killing frost. It can be maintained in permanent pastures because it reseeds itself. You can sow it on winter grain or spring grain. After the grain is gone, the Lespedeza comes on to make its growth. While not tall, the stands are very leafy, and that is where most of the feeding value lies. The yields are surprisingly large from a stand that seems fairly short. The fact that it will grow on the poorest land without lime, and that it will resist more heat and drought than other clovers, makes it a very valuable crop.

### Gro-Coated Korean Clover Seed—A Wise Investment

Regular Grade Fancy Unhulled Item No. 70 on Price List. The supplies of Korean Lespedeza seed are much shorter than a year ago. You will probably find prices higher later in the season. Scarified Korean seed with hulls removed germinates quicker. Requires only 1/2 as much seed per acre. Item No. 72 on Price List. Note: Iowa customers should order scarified seed only, to comply with State Seed Law provisions.

## INOCULATE ALL LEGUMES with NODULE GERM

### For Better Stands and Bigger Crops Use Berry's Nodule Germ

#### Inoculation Is Necessary

Legume crops which means all Clovers, Alfalfa, Vetches, Peas and Beans are soil building crops. However, they can build up soil only when they have the certain strains of bacteria working in the roots. Then and then only can these legumes take nitrogen from the air and use it for their own growth. If they do not have these bacteria they will actually rob the soil of nitrogen and leave it poorer instead of making it better. These crops use a lot of nitrogen. That is why mother nature has given them the power to take the nitrogen out of the air. You cannot be certain that you have the proper bacteria in your soil. Even though the crop may have grown on there well a few years ago does not mean that the bacteria are still there and alive. Chemical changes in the soil or other conditions may have killed them.

When you buy Berry's Nodule Germ you get a package containing millions of bacteria that are suited for the crop that you specify. Just put this on the seed. It is very simple to put on. Clear simple directions are printed on each package. You apply it just before seeding. Then when the seed germinates the bacteria are there, to penetrate the roots of the plants. Then it has the power to make its own nitrogen fertilizer out of the air.

We urge you to inoculate because the cost is small. We guarantee it to give you good results. If our nodule germ does not make nodules on the roots of your plants we will refund the price of the material. It is a wise investment. Inoculation may mean the difference between success and failure in getting a stand, or it may mean the difference between a vigorous growing stand and a poorly producing one. The cost is so small that no one should avoid or do without inoculation.

### Berry's Nodule Germ Is a New Development

Most inoculants are prepared so that you have to buy different packages for different kinds of legumes. Now in Berry's Nodule germ we have inoculation that combines different bacteria so that one package will inoculate Red Clover, Alsike, Crimson, Ladino and Alfalfa. However, Lespedeza, Vetch, Soybeans, Field-peas and Cowpeas require special inoculation as per prices shown at right. Be sure to state the kind of inoculation that you want. All prices are postpaid.

Alfalfa and Clovers 1 bu. 50c; 2 1/2 bu. \$1.00  
Birdsfoot Trefoil 1/2 bu. 25c; 1 bu. 50c  
Lespedeza or Vetch 100 lb. size 50c  
Soybeans 2 bu. size 30c; 5 bu. size 50c; 25 bu. size \$2.25  
Carton of six 5 bu. size \$2.95  
Field & Garden Peas and Beans 1 bu. size 30c

Well inoculated roots mean bigger crops

# SWEET Clover

**THE Great SOIL BUILDING Crop**  
**RESTORES FERTILITY TO POOR LAND**  
**Makes Good Land Better**

Sweet Clover is an outstanding soil improving crop. It is unexcelled for putting nitrogen into the soil as well as other elements of plant food that are made available when the crop decays. A crop of sweet clover plowed under in the spring will increase corn yields as much as 20 bushel to the acre. There are some who will let the crop grow until it is in the full bloom stage. Somewhat higher fertility is returned in that way. When you follow that practice, however, it becomes too late to put the land to corn that year. If you plow it under early in the spring when it is six to eight inches high you can generally still put the land to corn and get wonderful results. We could give you results of many experiments on the fertility of sweet clover. Its effect on corn yields will illustrate what it can do for you. It has very strong tap roots that go down deep. The tap roots will break up heavy soils and permit better drainage. Sometimes they will break up hardpan. They decay quickly when plowed under. We do not recommend plowing the same year it is sown unless you use Hubam, described on page 37.

The first year Sweet Clover will afford pasture from the latter part of July until in October. In the spring you can get pasture from April to along in July with Yellow and from May until August with White. That is why a good many like to mix White and Yellow to prolong the pasture period. It is good for hog pasture if you keep it held down to a height of around 15 inches. It has a tremendous carrying capacity as a pasture. We are now Gro-Coating our Sweet Clover seed. You can have it not Gro-Coated if you wish. It costs a little less (see Pink Price list) but you save only around 25c an acre. Gro-Coating gives you cheap extra assurance of better stands at that price.

Sweet Clover seed is more plentiful than last year and considerably lower in price. You can afford to sow it more liberally. Do not however delay buying. We expect markets to advance and some lots will be sold out.

## WORLD Brand YELLOW

**Inoculate All Sweet Clover Seed**  
**1 bu. size only 50c; 2 1/2 bu. \$1.00**

### Grades and Varieties

We handle Sweet Clover in about the same grades as the other clovers namely Planet, Fancy and World Brand. These grades are described on page 33 and on these pages. That which we list in our catalog as Sweet Clover is the White Blossom, unless otherwise specified. Because of conditions in the principal seed producing sections, it may contain some Yellow. The Yellow Blossom lives two years and matures about ten days earlier than White. It is finer stemmed and somewhat leafier. Hubam, also known as the Seven Wonder Clover, an annual variety, makes its full growth in one year, see page 37.

We also call your special attention to the combination seeding of Sweet Clover and Mammoth Red described below. It's a great value.

**Our Very Finest Quality**

This biennial or two year yellow blooming sweet clover is liked by many for the reason that it is finer stemmed, and that it does not grow quite as tall. It also seems to tolerate more adverse conditions such as drought and closer grazing or cutting. It will make about as large a growth the first year as the white, 12 to 24 inches, depending upon soil and seasonal conditions. The second year it may not produce quite as much because it matures somewhat earlier. This is oftentimes the feature which is greatly desired. It is also quite a common practice to mix white and yellow, so as to lengthen the pasture season, and also to lengthen the bloom season in event you want to use it for bee pasture purposes. If you demand the very best in quality you will find it in our World Brand grade. The seed is thoroughly scarified, and the shipment is absolutely guaranteed to please you. Write for special quantity or delivered prices.

ITEM  
No. 86  
ON  
PRICE LIST

## SWEET and MAMMOTH

Only Berry's skillful buying could make this astonishing value possible. A lot of high grade sweet clover containing about 20% of Mammoth Red Clover at practically the same price as straight high quality Sweet. Mammoth Red Clover is selling at over \$25.00 per bu.

It is a very practical seeding, too. If you wish to plow the crop under for soil improvement you will find that the Mammoth increases the growth. It fills in the space between the taller growing Sweet Clover plants. You can get a dense mass of vegetation in this way. If you decide to cut it for hay or pasture it, here again you profit by the added growth of the Mammoth Red Clover. You can get heavy production of high protein feed from our Sweet and Mammoth Red combination.

This isn't any cheap, low grade mixture. It is a quality lot. The price is low simply because we secured the seed to very good advantage as it was grown mixed and the two clovers couldn't be separated. It wasn't pure Sweet or pure Mammoth but with the two clovers together it will be 99% Pure Clover. It's a real buy while the supply lasts.

**Descriptions Reliable—Quality High**

Dear Sir:

I have been using your seeds for many years and have had very satisfactory results. Your catalog descriptions are very reliable, as I have always received high quality seeds at a reasonable price.

Sincerely yours,

Dominick Branchi.

**Good Results—Fine Stands**

Gentlemen:

We have been buying seed from you for several years and have always had very good results. Some of the seed we sowed this spring gave us the best stand we ever had.

Yours truly,

John C. Pokornoski.

# Sweet Clover PRODUCES Enormous Crops

## A Great Clover for Pasture

Sweet Clover has an unusually heavy carrying capacity as a pasture. It will take care of more stock per acre than any other clover. You can get this pasture the same year that you sow it. Sweet Clover when sown on winter wheat or with spring grain will grow quite fast after the grain crop has been removed. Generally you can begin pasturing it about the middle of July. You can put quite a lot of stock on it. Let the crop go into the winter with pretty good top growth. That will give the plants added strength and enable them to come through the winter in better shape. In the second year it starts growing early and grows until about mid-summer. Some make a practice of sowing sweet clover two years in succession on the same land. Thus when the second year clover is finishing its growth the new seeding is coming along to provide pasture for the balance of the season. You can maintain a pasture this way for several years.

## Generally Makes Hay the First Year

While the sweet clover is used principally for soil improvement and for pasture it also will make good hay, especially the first year. It should be cut early enough in the fall so that the growth can come on to make good production before winter sets in or cut it with a fairly high stubble. The feeding value of sweet clover hay, especially the first year's crop, is very good. It should be well cured so that it does not become moldy. If you wish hay in the second year be sure to cut it with a high stubble. The second crop from sweet clover, in the second year of its growth, comes up from the stubble and not from a crown like alfalfa. If you cut sweet clover close to the ground in the second year of its growth you will generally kill it out. If it is cut for hay in the second year, cut it about the time the bloom buds begin to show up.

## Berry's Prices Save You Money on All Grades

Berry's Sweet Clover prices are for GRO-COATED seed. See pages 2 & 3 and pink price list

### LOT DO-MORE SWEET CLOVER

#### A Very Special Favorite of Thousands

This Lot stretches your money over more acres than any other lot. It is our lowest priced grade, it has the quality that has been giving our customers satisfactory results. Naturally it isn't the finest for looks but the favorable reports that we get on this indicate its real value. After all, it is results that you are after when you make a seeding. Lot Do More has been scarified, it has been re-cleaned and it is the same kind as the higher priced grades. You do not tested. The crop from this grade is the same kind as secured by many of a heavier rate than the other grades. have to sow this at any heavier rate than the other grades.

#### This Grade is in Big Demand

Every year we sell large quantities of Lot Do More. This year the quality is improved. As mentioned above, it is not the finest looking seed, it is somewhat off-colored. The larger berried grade. The berries in "Do-More" are smaller. That is why it gives such good results. The larger number of seeds per pound generally offsets the lower tests per 100 seeds. You sow by weight and measure and not by counting out so many seeds per acre. It is the number of sprouts per pound that counts. The lower priced seed therefore may give you as many sprouts per ounce or per pound as the higher priced grade even though the sprouts per 100 seeds are less. Our prices on GRO-COATED seed are low. Still lower if not GRO-COATED.

**OHIO SHIPMENTS for EASTERN CUSTOMERS**  
See Page 33

SEE ITEM NO. 80 ON PRICE LIST

### LOT WONDERFUL

#### An Extra Value in Fancy Seed

This is a beautiful lot of Fancy White Sweet Clover. It comes quite close to our World Brand in appearance and all around quality. The size of the berry, the color of the seed, the germination, and purity are all good. It is as nice a quality as some dealers sell as their very best. You will find it thoroughly dependable. Like the Do-More it is the White Sweet Clover. This lot has a little mottled yellow in it. That indicates there might be a small amount of White Sweet Clovers.

#### This is an Especially Low Price

Supplies of Sweet Clover this year are somewhat more plentiful than a year ago, but stocks are not large. Prices are materially lower and you can afford to sow it much more liberally. For all practical purposes this lot will do everything that the World Brand will do, and you can buy at a saving of \$2.00 per hundred. We will gladly send you a sample so that you can see how much you get for your money in this great value. You can order it with the assurance that you will be perfectly satisfied with the seed when you get it. If for any reason it fails to please you, you can return it and your money including transportation charges will be refunded. Lot Wonderful is indeed a wonderful value.

**We Have RETAIL STORE at MARION, OHIO**  
See Page 33

SEE ITEM NO. 82 ON PRICE LIST

Be Sure to Inoculate all Sweet Clover. See Page 34

### SPECIAL "MIXED" SWEET CLOVER

This special mixture is similar to the Lot Premium Sweet Clover described on page 37. We were able to purchase one lot of this mixed seed at quite a little discount because the color wasn't quite as nice as in Lot Premium. Insofar as results are concerned, it can give you equally good performance. It is larger berried seeds than the Lot Do More described above and it gives you a very dependable seeding at a very reasonable cost. A combination of White and Yellow Sweet Clover is a very common one from the standpoint of practical value. You will get your money's worth and then some in this special mix. For pasture it gives you longer periods for in the second year the Yellow generally starts a little quicker while the White matures later. In plowing under for soil building purposes, the mixture is just as satisfactory as either straight White or Yellow.

See Item 88 on Price List

#### Sweet Clover Grows Fast

I sowed Gro-Coated Red and Sweet Clover this year. While the Wheat was not too heavy, the Red Clover was healthy and grew vigorously. In one field this spring, I plowed it up and sowed Gro-Coated Sweet Clover alone, putting 12 pounds to the acre. Have a wonderful stand now in September; it is 5 feet tall. The plant certainly grows vigorously.

E. G. Powell, Findlay, Ohio

#### Withstands Dry Weather Better

I sowed Sweet Clover, some mixed seed and Korean Lespedeza, all Gro-Coated. Used less seed than normal and got good stands. I think the crops from treated seed stand the dry weather much better.

E. N. Fruch, Dallas, Iowa

#### Gro-Coated Alfalfa Grows Fast

Gro-Coated Alfalfa was sown with the Barley and it grew nearly as fast as the Grain. The Barley made a heavy stand. It ran 61 bu. to the acre, yet the Alfalfa was as fine a stand as could be. Since threshing, 40 head of cattle are running on it and it's still growing. I think Gro-Coated is a wonderful help in getting stands and should be expanded to all grasses.

Willard Dittrich, Alma, Wisconsin

#### Gro-Coated Seed Made the Best Stand

I sowed some Gro-Coated Sweet Clover last year, using 8 pounds to the acre. That is less than I normally sow. On account of soil conditions being different in the field there was some difference in performance. There is not much stand where non-treated seed was sown.

Theo. A. Coufal, Bruno, Nebr.

#### Many Years of Fair Dealing and Saving

Gentlemen: For the past 25 or 30 years, I have been sending you my orders for seed. I have been well pleased with the seed and your fair dealings. If I could not have saved money, I would have bought seed here.

Very truly yours, G. B. Harris.

Sheridan, Ind.

#### Prompt Service—Satisfactory Quality

Dear Sir: I have used Berry's Seeds for the past 6 years and they have been very satisfactory in quality and seeding cost. My orders have always been given prompt attention. You can depend on an order from me each year.

Respectfully, Elwood Stock.

Hamilton, Ohio

# HUBAM ANNUAL WHITE SWEET CLOVER

## 7 GREAT FEATURES

Sometimes called "7 Wonder" Sweet Clover

### A GREAT MONEY MAKER—DEMAND INCREASING

More farmers each year are learning about the merits of this great crop. This sensation of the Sweet Clover family, being an annual, does two years work in one. With shorter rotations being practiced, with the need for continued all out grain production, and maintenance of high soil fertility, Hubam fills today's farming practices better than ever before.

Sow Hubam with a nurse crop. It is one of our greatest pasture crops and also can be used for hay. It is easy to get a stand and will make a seed crop the first year, yielding up to 10 bushels per acre. Hubam is adapted to any soil that will raise Sweet Clover. It can be pastured until frost, being very drought resistant. For hay it yields up to 4 tons per acre, with a protein content of 20 to 25% on a dry basis.

As a soil builder Hubam is nearly equal to Sweet Clover. It won't come up the following spring when plowed under in the fall.

#### Seven Points of Superiority

1. Makes its full growth the same year it is sown. Cash in on hay, pasture and seed.
2. High in protein 20 to 25%. Fine feed, excellent for dehydrating and grinding for stock feed.
3. Wonderfully fine for fertilizing. Stores an abundance of nitrogen in the soil. A legume of exceptional possibility.
4. An excellent pasture crop. Produces big yields of hay, rich in feed value.
5. A good heavy producer. Blooms abundantly. It also is a fine drought resister.
6. A profitable cash crop when saved for seed. Yields up to 10 bushels per acre.
7. Helps control root rot by giving you a quicker rotation. Keeps soil healthier.

#### Seeding Suggestions

Inoculate your seed with Berry's Nodule Germ. See page 34. Sow on winter grain when ground can be harrowed lightly. Sow 15 lbs. per acre. Harrow lightly or roll after seeding. Rolling is best. Sow with spring grain in a similar way. Cover seed lightly with a harrow and roll.

#### Supplies Limited—Buy Early

Hubam is in terrific demand due to its wonderful performance. Supplies are good today but because of the price of Hubam being lower than Sweet Clover more will be used than ever before so order early.

Hubam is adapted to every state in the Union. Try it this year. The results will please you. Berry's price is guaranteed to save you money. We offer only the finest quality, our famous World Brand. This is bright, plump, scarified seed of most vigorous germination and highest purity. It will satisfy the most critical buyer. Sample mailed on request. Seed markets are strong. Our prices later will be higher. Order Now!

Small lots Postpaid. 1 lb., 45c; 5 lbs., \$2.00; 10 lbs., \$3.50.

## World Brand WHITE SWEET CLOVER

This is the cream of the crop from a quality standpoint and also varietal purity. Our World Brand quality means only the very highest standards of purity, germination, color, size of berry, etc.

In order to get enough seed that would come up to our World Brand quality requirements Berry's have bought Sweet Clover from Oklahoma all the way up into Canada and from Ohio, west into Montana. Berry's were pioneers in introducing this crop to American Agriculture, and are today probably the World's largest handlers of it. Come to seed headquarters when you want the best of anything at a price to save you money.

What do we mean by varietal purity? Most Sweet Clover today is mixed to some extent, that is, the White will contain some Yellow. In our World Brand, Berry's choose the finest seed that grows, although it isn't 100% White and will contain a trace of Yellow.

Our supplies of this very finest seed may be gone before the season is over. We can't replace them at any price when that happens so order early. The early buyer always gets the best of service and quality at lowest prices.

(Be sure to write us if our Pink Price List is mislaid)

ITEM  
No. 83  
ON  
PRICE LIST

## PEARL CHOICE QUALITY WHITE SWEET

### Serviceable Quality—Guaranteed Satisfactory

Don't expect the best quality when you order this grade. Fancy Brand is better and World Brand is the best. Expect a quality though, that from a results standpoint will please you. In making World Brand so extra nice, we grade out the smaller berried seeds, we eliminate the discolored ones, etc., which go into our lower grades. This seed is just as uniform though, and as thoroughly cleaned as the best. In test, the purity and germination will naturally be lower, it may contain a little more Yellow Blossom but in value it is equally great. It does a satisfactory job or we couldn't guarantee it, nor would thousands of our thrifty minded customers continue to reorder it.

#### Samples on Request. Compare Values

To buy intelligently you should see for yourself the value in each offer. Ask for samples of all our four grades of White Blossom, along with our complete purity and germination test. Compare them. Our customer's needs vary. You be the judge of which will be the most economical for your job. This also shows you the savings possible by ordering direct from Berry's at wholesale prices.

## LOT PREMIUM A GREAT VALUE IN MIXED SWEET CLOVER

### Fine Quality at Our Lowest Price

This is our biggest Sweet Clover value of the year. It meets our customers' demands for high quality at a price that will save dollars per bushel. Lot Premium is mainly White Blossom type but contains more Yellow Blossom than our regular grades of White. This mixture has definite advantages. It gives you earlier pasture than White alone and also over a longer period. For hay, the Yellow Blossom present will help to improve the quality. It is equally good for soil building purposes to plow under.

This seed is of high purity, all hulled and scarified for good strong quick germination. Because it is mixed more than average we have been able to buy this seed at a discount and this saving is passed on to you in our special low price. Some seedsmen don't sell the straight White and Yellow as we do, so would offer this to you as just Sweet Clover for their best grade. We don't think this value can be equalled anywhere. It will fill more of our customers' needs than probably any other quality offered.

ITEM  
No. 87  
ON  
PRICE LIST

### Supplies Limited—Order Early

We tell all old and new customers each year to order as early as possible. We can give them better service and qualities, a more complete selection and lowest prices. We can protect this price only as long as early purchases last so it is up to you to order now and take advantage of this extra saving. You can now buy Gro-Coated Sweet Clover seed. See our Pink Price List for information.

#### Build Bigger Profits

Get started with Sweet Clover this year. In comparison with other Clovers and Alfalfa it has more value at present prices than ever before. Get the most out of your crop by using inoculation. It is your cheapest crop insurance and easy to apply. Sweet Clover is a great soil builder when inoculated. Order in 2½ bushel units for greatest economy. That will take care of up to 3 bushel. Special offer on Berry's Nodule Germ with Lot Premium Sweet Clover orders. 1 bu., 40c; 2½ bu. size, 75c; 5 bushels for \$1.35.

#### Very Satisfactory Results from Berry Seeds

Dear Sirs: Northampton, Pa.  
The seed which I have been buying from you for quite some time has given very satisfactory results. The stands have been very good.

Yours truly, Lester R. Becker.

#### Prompt Courteous Service Is Satisfactory

Dear Sirs: Lancaster, N. Y.  
I have always been very satisfied with the seed I bought from your company. I also like your prompt and courteous service.

Yours very truly, Dawn A. Brunk.

# BERRY'S Garden Nurseries Departments

**A GARDEN IS  
THE MOST  
PROFITABLE LAND  
ON YOUR FARM**

There is health,  
pleasure and profit  
in growing your  
own fruits and  
vegetables.

## Delicious VEGETABLES AT LOW COST

Food prices have advanced considerably this past season and we are told that we may expect even higher prices by next fall. You can cut your food budget by planting a large vegetable garden, also providing fresh vegetables for your table. You will never know how good garden fresh vegetables taste until you grow your own.

In our Vegetable and Flower Seed Department, we have listed several new varieties, all have been tested and we know they are tops for quality. Order our field grown plants for your early garden. Also don't fail to try our Ontario Potato Sets. This variety was introduced by Cornell University Agricultural Experiment Station. The tubers are very smooth, white, and are recommended where scab is a problem.

We have been selling quality vegetable seeds for over 50 years and by contracting with reliable growers in large quantities, we are able to give you better seed for less money. Check our prices. You will find them low for quality seed. Order early.

### SPECIAL SAVINGS WHEN YOU BUY IN BULK

When we speak of "Bulk" we mean in lots of 1/4 pound, 1/2 pound, 1 pound or larger lots instead of in packets. The average packet is intended mostly for the small gardener. When you buy in the larger quantities you get a lot more seed for your money and make big extra savings.

### See Post Card Enclosed

You will find enclosed in this catalog a post card addressed to the Berry Poultry Farm of Clarinda, Iowa. This is a different firm from the Berry Seed Company. While there is no connection between these companies we are sure you will be well pleased with any dealings you may have with the Berry Poultry Farm. Mail this card promptly and you will hear from them direct. They will send you a free large poultry catalog, printed in colors.

## HARDY Quick Bearing FRUITS

Save money by growing your own delicious fruits. Enjoy the delightful flavor of fruit picked fresh from your own back yard or orchard. Capture all the rich goodness by canning your own fruit picked at just the right time for flavor and freshness.

A bushel of fruit bought at the store will cost you as much as several of our high quality fruit trees. Buy a berry plant for less than the cost of a box of berries. Grow your own fruit, of the varieties you like the best. Have plenty of good things to eat for years to come at less cost than one season's fruit bought at the present high prices.

Our fruit trees are extra select stock. Grown only 20 minutes drive from the seed house. Hundreds of acres of all kinds of nursery stock to select from and under the supervision of horticulturists from the State Department. This makes the stock you buy free from disease and you get quality.

Berry's send you complete instructions for planting your nursery stock. These are included in the package. Read them carefully and you will succeed. In comparing our prices remember they are all prepaid. In ordering you can save at least 20% over other nurseries who may have just as low a price but ship collect.

If you use large quantities of vegetable seeds be sure to write for our MARKET GARDENERS PRICE LIST.

### BERRY'S GUARANTEE

Our large garden seed business is built on the firm foundation of thousands of satisfied customers and each year new thousands find Berry's value outstanding. Our seeds are all laboratory tested and produced by dependable growers.

We positively guarantee our garden and flower seeds to grow. If they fail to grow due to poor germinating quality of the seed we will replace such seed free of charge. Safe arrival as well as satisfactory quality are also guaranteed.

It is easy, safe and economical to order by mail. Save money and buy on an unqualified replacement guarantee.

### WE DO NOT SHIP NURSERY STOCK C.O.D. All prices are prepaid.

Your friends will appreciate an opportunity to grow a better garden. Tell them about Berry's Tested Seed. They are guaranteed to grow. Our attractive prices will please them too. We will gladly send them a catalogue if they will write for one.

We are one of the oldest and largest seed houses serving thousands of new customers each year. We guarantee safe arrival of all orders.

# BERRY'S FARM FAMILY GARDEN

## WILL PLANT AN ACRE OF DELICIOUS, HEAVY YIELDING VEGETABLES

This is a collection of garden seeds designed especially for farm or large city gardeners. The selection of varieties and quantities has been made in cooperation with state authorities. This new revised assortment represents in our opinion the fullest measure of quality and value we have ever sold.

This collection will provide your family with an abundance of delicious, crisp fresh vegetables and plenty left for canning and storing. Each variety has been selected for its

fine quality, excellent flavor and heavy yield. By making it an all high quality assortment it saves you a lot of time in making out your order. We save time in filling orders, as we can put up these collections in spare moments. Save on living costs by growing a fine garden. Save on garden cost by ordering this Farm Family Garden which contains the following seed. This has a regular catalog value of \$5.00. Average retail price would probably range around \$6.00 to \$6.50.

- 1 oz. Turnip, Purple Top White Globe
- 1 Pkt. Zinnia, California Giant Mixed

Delicious fresh vegetables such as these are delicacies that cost little but mean a lot to our food saving program.

# Berry's TESTED GARDEN BEANS

YOU'LL LIKE THEIR DELICIOUS QUALITY AND HEAVY YIELDS

## CULTURE

Plant after all danger from frost has passed and for succession every 3 weeks throughout the season. Sow the bush varieties in rows 2 feet apart and 4 inches apart in the row. Plant the pole varieties in hills 2 feet apart one way by 3 feet the other, dropping about 5 or 6 beans in a hill and set a pole firmly in each hill. Cover all varieties about 1½ inches deep with fine soil well pressed down to insure good germination.

### GREEN POD BUSH BEANS

**No. 134—BURPEE'S STRINGLESS GREEN POD.** 50 days. The old favorite garden bean for home, market or canning. Plants sturdy; very prolific. Pods round, fleshy, perfectly stringless, of excellent quality. Postpaid: ¼ lb. 15c; ½ lb. 25c; 1 lb. 45c; 3 lbs. \$1.20.

**No. 133—GIANT STRINGLESS GREEN POD.** 53 days. One of the favorite stringless podded sorts. Pods round, meaty, brittle. Stringless throughout entire growth. Heavy producer. Postpaid: ¼ lb. 15c; ½ lb. 25c; 1 lb. 45c; 3 lbs. \$1.20.

**No. 116—TENDERGREEN.** 50 days. Hardy and prolific. Light green pods 7 in. long are round, meaty, tender, stringless. For the home garden, canners or truckers. Postpaid: ¼ lb. 16c; ½ lb. 28c; 1 lb. 49c; 3 lbs. \$1.35.

**No. 129—LOGAN.** 52 days. A winner for the home and market gardener. Plants 16 to 20 inches tall, upright, with large, medium green leaves. Pods long, straight, light green, stringless, meaty and smooth. Excellent for canning and freezing. Postpaid: ¼ lb. 18c; ½ lb. 30c; 1 lb. 55c; 3 lbs. \$1.50.

**No. 106—RANGER.** 56 days. All-American Bronze Medal Winner. A stringless green pod variety. Plants are vigorous and produce short runners. Pods are round, mostly straight and of fine flavor. Seeds are white, excellent for winter use. Postpaid: ¼ lb. 16c; ½ lb. 30c; 1 lb. 50c; 3 lbs. \$1.45.

### POLE BEANS

**No. 144—CUTSHORT.** 72 days. A favorite for planting in corn. Short, fat pods. Postpaid: ¼ lb. 15c; ½ lb. 25c; 1 lb. 45c; 3 lbs. \$1.20.

**No. 141—KENTUCKY WONDER.** 65 days. Best known and most popular pole bean. Heavy producer, pods hanging in clusters. Fleshy green pods, very crisp when young. Postpaid: ¼ lb. 18c; ½ lb. 30c; 1 lb. 49c; 3 lbs. \$1.35.

**No. 119—KENTUCKY WONDER WHITE.** Developed by the U. S. Department of Agriculture as a high yielding type of Kentucky Wonder. Plants vigorous with dark leaves. Pods oval smooth straight, dark green, stringless when young. Seeds white. Excellent for dry shell beans. Postpaid: ¼ lb. 18c; ½ lb. 30c; 1 lb. 55c; 3 lbs. \$1.50.

**No. 149—MISSOURI WONDER OR NOX-ALL.** 65 days. The earliest green podded pole or corn hill bean. Pods long, round and tender. Postpaid: ¼ lb. 16c; ½ lb. 28c; 1 lb. 49c; 3 lbs. \$1.35.

### YELLOW POD WAX BEANS

**No. 126—NEW BRITTLE WAX.** 53 days. The outstanding variety for the home garden. Plant large, erect, vigorous, very productive. Handsome yellow pods, round, slightly curved, extremely brittle, fleshy, succulent, absolutely stringless and fiberless. The standard of highest quality. Postpaid: ¼ lb. 18c; ½ lb. 30c; 1 lb. 55c; 3 lbs. \$1.50.

**No. 104—CHEROKEE WAX.** 53 days. A new introduction. Pods entirely stringless, rich golden yellow, fleshy and tender. With less fiber. Ideal for canning or freezing. Postpaid: ¼ lb. 18c; ½ lb. 30c; 1 lb. 55c; 3 lbs. \$1.50.

**No. 127—PENCIL POD BLACK WAX.** 55 days. Of finest quality. Large plant, very productive. Pods round, slightly curved, golden yellow, absolutely stringless, brittle and without fibre. Postpaid: ¼ lb. 16c; ½ lb. 28c; 1 lb. 49c; 3 lbs. \$1.35.

**No. 130—TOP NOTCH GOLDEN WAX.** 51 days. This is an improved strain of regular Golden Wax. Pods average one inch longer and are much more productive. Very early—our best for the home gardens. Postpaid: ¼ lb. 16c; ½ lb. 28c; 1 lb. 49c; 3 lbs. \$1.35.

### LIMA BEANS

**No. 138—FORDHOOK BUSH.** 75 days. Potato Lima type. Plants strong, erect, bearing pods in clusters of four to eight. Postpaid: ¼ lb. 18c; ½ lb. 30c; 1 lb. 55c; 3 lbs. \$1.50.

**No. 139—BURPEE'S BUSH.** 77 days. Very early. Plants dwarf, vigorous growers, bearing until frost. Pods large, tasty, finest quality. Postpaid: ¼ lb. 18c; ½ lb. 30c; 1 lb. 55c; 3 lbs. \$1.50.

**No. 137—HENDERSON BUSH.** 65 days. The small butter bean known as "Baby Lima." Plants bushy, very productive. Early. Delicious flavor. Postpaid: ¼ lb. 15c; ½ lb. 25c; 1 lb. 45c; 3 lbs. \$1.20.

**No. 145—KING OF THE GARDEN POLE LIMA.** 88 days. A strong grower and heavy yielder. Uniform pods, of fine quality. Postpaid: ¼ lb. 16c; ½ lb. 28c; 1 lb. 49c; 3 lbs. \$1.35.

**No. 124—GIANT SPECKLED LIMA.** 90 days. Tall and strong plants. Stands up well in summer weather. Seeds 4 to 5 per pod, large oval greenish white with reddish mottling. Postpaid: ¼ lb. 18c; ½ lb. 30c; 1 lb. 55c; 3 lbs. \$1.50.

**No. 143—SIEVA POLE LIMA.** 77 days. A small seeded Pole Lima. Very prolific and early maturing. Small flat beans of the highest quality. Postpaid: ¼ lb. 15c; ½ lb. 25c; 1 lb. 45c; 3 lbs. \$1.20.

### DRY SHELL BEANS

**No. 148—GREAT NORTHERN OR IDAHO.** 90 days. The most popular navy bean grown. A tremendous yielder of large white beans. Exceptional quality, the best for soup or baking. Postpaid: ¼ lb. 14c; ½ lb. 20c; 1 lb. 35c; 3 lbs. \$1.00.

**No. 147—MICHIGAN NAVY.** 95 days. A hardy and prolific small, almost round white navy bean. Pods about 4 inches long. Used generally for baking. Postpaid: ¼ lb. 14c; ½ lb. 20c; 1 lb. 35c; 3 lbs. \$1.00.

**No. 118—PINTO.** 100 days. A dry land bean that does well in the West and South. Used for making chili. Oval shaped seed of light buff with brown markings. A heavy yielder. Postpaid: ¼ lb. 14c; ½ lb. 20c; 1 lb. 35c; 3 lbs. \$1.00.

**No. 150—RED KIDNEY.** 95 days. The old-fashioned baking bean. Produces large flat green pods, well filled with large dark red kidney-shaped beans, rich in flavor. Postpaid: ¼ lb. 16c; ½ lb. 28c; 1 lb. 49c; 3 lbs. \$1.35.

### INOCULATE BEANS AND PEAS

Uni-Culture Garden Inoculation is packed with millions of beneficial bacteria which are effective in stimulating the growth of these garden legumes. This package will inoculate from 1 oz. to 10 pounds of the following seeds: Sweet Peas, Garden Peas, Garden Beans, Lima Beans, Lupines and Peanuts. No. N10—12c. Postpaid.

Tendergreen

Kentucky Wonder

Brittle Wax

Burpee's Bush Lima

# Heavy Bearing FULL FLAVORED PEAS

## CULTURE

Plant as early as anything in garden. Light freezing does not hurt peas. Make successive plantings about one week apart. Peas will grow on poorer soils than most crops. Smooth varieties are hardiest, wrinkled varieties of finest quality. Plant about 1 inch apart, 3 inches deep.

## EXTRA EARLY PEAS

**No. 455—ALASKA WILT RESISTANT.** Extra early. Smooth seeded pea, ready to use in 53 days. Ideal for first market and home garden use. An old reliable variety. Postpaid:  $\frac{1}{4}$  lb. 14c;  $\frac{1}{2}$  lb. 20c; 1 lb. 30c; 3 lbs. 95c.

**No. 454—MARDELAH.** Something different in an extra early pea. Produces peas for the table or canning in 53 days. Exceptionally sweet and tender. Wilt resistant. Postpaid:  $\frac{1}{4}$  lb. 14c;  $\frac{1}{2}$  lb. 20c; 1 lb. 30c; 3 lbs. 95c.

**No. 464—SUPREME WONDER.** 12 inch—63 days to picking. A good reliable early variety. A favorite of many home gardeners for years. A very heavy bearer. Postpaid:  $\frac{1}{4}$  lb. 15c;  $\frac{1}{2}$  lb. 24c; 1 lb. 40c; 3 lbs. \$1.05.

**No. 463—LITTLE MARVEL.** 18 inch—63 days to picking. The home gardener's favorite in the Middle West. Excellent quality and high yielding ability. This pea produces when many varieties fail. Postpaid:  $\frac{1}{4}$  lb. 15c;  $\frac{1}{2}$  lb. 24c; 1 lb. 40c; 3 lbs. \$1.05.

Fillbasket

**No. 457—PREMIUM GEM.** 24 inch—66 days to picking. We think this the best of the Gem Peas. Early, and with the fine sugar flavor usually found in later varieties. Reliable for the home garden. Postpaid:  $\frac{1}{4}$  lb. 15c;  $\frac{1}{2}$  lb. 24c; 1 lb. 40c; 3 lbs. \$1.05.

**No. 460—THOMAS LAXTON.** 30 inch—61 days to picking. A very popular home garden variety in the East and South. Fine for canning or market garden. Large and sweet flavored, an exceptional yielder. Postpaid:  $\frac{1}{4}$  lb. 15c;  $\frac{1}{2}$  lb. 24c; 1 lb. 40c; 3 lbs. \$1.05.

## BERRY'S FAVORITE PEA COLLECTIONS

An early all season pea collection. Plant these four varieties on the same day and have a succession of peas for table, canning and freezing. They will mature in the order listed.

**No. 450—** $\frac{1}{2}$  lb. Alaska w.r.;  $\frac{1}{2}$  lb. Fillbasket;  $\frac{1}{2}$  lb. Little Marvel;  $\frac{1}{2}$  lb. Everbearing. 2 lbs.—4 varieties only 75c; 4 lbs.—4 varieties only \$1.35.

Save money on peas. Our stock is Western grown and will produce peas of unsurpassed flavor.

## Early and Mid-Season Peas

**No. 465—EARLY FILLBASKET.** 24 inch—70 days. Pods 3 to  $3\frac{1}{2}$  inches long, slender and straight. Excellent for home gardens canning or freezing. Postpaid:  $\frac{1}{4}$  lb. 15c;  $\frac{1}{2}$  lb. 24c; 1 lb. 40c; 3 lbs. \$1.05.

**No. 453—VICTORY FREEZER.** 24 inch—70 days. Pods 3 inches long, medium green, slightly curved, containing 6 to 8 large tender peas. An excellent mid-season canning and freezing variety of fine quality. Be sure and try this variety in your garden this season. Postpaid:  $\frac{1}{4}$  lb. 17c;  $\frac{1}{2}$  lb. 30c; 1 lb. 55c; 3 lbs. \$1.50.

**No. 452—MULTIFOLD.** 24 inch—66 days. A recent introduction of the large Hundredfold type. Resistant to Fusarium Wilt. Plants are dark green, strong and prolific. Pods are single and double, broad and slightly curved. Seeds large, green, sweet and tender. You will like this pea for canning or freezing. Postpaid:  $\frac{1}{4}$  lb. 17c;  $\frac{1}{2}$  lb. 30c; 1 lb. 55c; 3 lbs. \$1.50.

**No. 468—EVERBEARING.** 28 inch—75 days. A long bearing, large seeded variety for home and market gardens. Wilt resistant and hardy with a superior flavor. A very popular mid-season variety. Postpaid:  $\frac{1}{4}$  lb. 15c;  $\frac{1}{2}$  lb. 24c; 1 lb. 40c; 3 lbs. \$1.05.

**No. 471—TALL TELEPHONE OR ALDERMAN.** A climbing or pole pea grows to 5 ft. Ready for table use in 74 days. A handsome large podded variety. Excellent for home and market gardens. Wilt Resistant. Pods contain 8 to 10 large peas of highest quality. The best tall pea. Postpaid:  $\frac{1}{4}$  lb. 15c;  $\frac{1}{2}$  lb. 24c; 1 lb. 40c; 3 lbs. \$1.05.

**No. 476—DWARF GREY SUGAR OR EDIBLE POD.** Grows 2 to  $2\frac{1}{2}$  feet tall—65 days. A sweet, tender, and delicious edible podded variety that is very productive and wilt resistant. Small, smooth, sweet flavored. Postpaid:  $\frac{1}{4}$  lb. 15c;  $\frac{1}{2}$  lb. 24c; 1 lb. 40c; 3 lbs. \$1.05.

Multifold

## TABLE FIELD PEAS

**No. 479—CALIFORNIA BLACK EYE.** Dwarf or half runner. 95 days. Much more productive than the old type. Postpaid:  $\frac{1}{4}$  lb. 17c;  $\frac{1}{2}$  lb. 30c; 1 lb. 50c; 3 lbs. \$1.35.

# Berry's OPEN POLLINATED SWEET CORN

## Early Varieties

### GOLDEN BANTAM

70 days. The favorite early yellow sweet corn. Ears 5 to 6 inches long, kernels broad, deep golden yellow, very sweet, juicy and tender. **No. 277—** $\frac{1}{4}$  lb. 14c;  $\frac{1}{2}$  lb. 20c; 1 lb. 35c; 3 lbs. \$1.00.

### EARLY SUNSHINE

66 days. Four to five days earlier than Golden Bantam. Good sized ears, 10 to 12 rowed. Kernels golden yellow, sweet, tender. **No. 281—** $\frac{1}{4}$  lb. 14c;  $\frac{1}{2}$  lb. 20c; 1 lb. 35c; 3 lbs. \$1.00. Postpaid.

### GOLDEN GIANT

70 days. Mid-season yellow variety, good for home and market garden. A week earlier than Bantam. **No. 278—** $\frac{1}{4}$  lb. 14c;  $\frac{1}{2}$  lb. 20c; 1 lb. 35c; 3 lbs. \$1.00. Postpaid.

### GOLDEN SWEET CORN COLLECTION

$\frac{1}{4}$  lb. Golden Bantam,  $\frac{1}{4}$  lb. Golden Giant, and  $\frac{1}{4}$  lb. Golden Evergreen. Regular Catalogue Value 43c. **Order No. 295—**Golden Corn Collection 35c. Postpaid.

Golden Bantam

## Later Varieties

### GOLDEN EVERGREEN

85 days. A cross between Golden Bantam and Stowell's Evergreen combining the deliciously sweet flavor of Golden Bantam with the tenderness of Stowell's Evergreen. Ears with 14 to 18 rows, kernels rich golden yellow of finest quality. **No. 289—** $\frac{1}{4}$  lb. 15c;  $\frac{1}{2}$  lb. 22c; 1 lb. 38c; 3 lbs. \$1.05. Postpaid.

### STOWELL'S EVERGREEN

90 days. The best known standard main crop sweet corn, excelling all others. Ears 8 inches long 16 to 20 rowed. Very productive. Kernels clear, white, deep, medium width, sugary and tender. **No. 287—** $\frac{1}{4}$  lb. 15c;  $\frac{1}{2}$  lb. 22c; 1 lb. 38c; 3 lbs. \$1.05. Postpaid.

### COUNTRY GENTLEMAN

90 days. One of the best known late varieties, superior for home and market gardens, and commercial canners. Stalks often with two ears. Ears 7 to 8 inches long with narrow irregular grains of good quality, sweet and tender. **No. 284—** $\frac{1}{4}$  lb. 15c;  $\frac{1}{2}$  lb. 22c; 1 lb. 38c; 3 lbs. \$1.05. Postpaid.

### WHITE SWEET CORN COLLECTION

$\frac{1}{4}$  lb. Stowell's Evergreen,  $\frac{1}{4}$  lb. Country Gentleman,  $\frac{1}{4}$  lb. Stowell's Hybrid. Regular Catalogue Value 47c. **Order No. 296—**White Corn Collection 40c. Postpaid.

# Berry's FULL FLAVORED MELONS

## MUSKMELONS

Muskmelons are rich in vitamins—an excellent health food. They thrive under varied conditions and soils. Plant in hills six feet apart each way or if in drills, have six feet between rows and thin plants to 12 inches in the row. Plant thick and thin out after plants are up. The average family needs at least 1 ounce which will plant 60 hills.

### ORANGE FLESHED

**420 HALE'S BEST #36.** 80 days. An outstanding shipping and market variety. Fruits 3 to 4 pounds. Very thick, deep salmon colored flesh with a sweet aromatic flavor, and fine texture. The most popular muskmelon grown. Again we have a splendid variety here, which is very well liked among those who have planted them previously. Postpaid: Pkt. 5c; oz. 25c; ¼ lb. 75c; 1 lb. \$1.90.

**414 IMPERIAL #45.** Mildew Resistant. 87 days. A Hale's Best type with resistance to powdery mildew. A good keeper after ripening. A melon with unusual qualities. Thick, sweet, orange flesh. You're due for a pleasant surprise if you order this variety. Of course, if you've planted it previously, you already know its quality goodness. Postpaid: Pkt. 5c; oz. 25c; ¼ lb. 75c; 1 lb. \$1.90.

**411 HONEY ROCK.** 81 days. All American Winner and one of our most popular varieties for the home garden. Very early, weighs about 4 lbs., flesh thick and very sweet. You've probably heard a lot about this melon as many people say it is second to none. Postpaid: Pkt. 5c; oz. 25c; ¼ lb. 75c; 1 lb. \$1.90.

**413 HOODOO.** (Hearts of Gold). 90 days. Fruits round, about 3 pounds. Very small seed cavity. Tender, juicy, sweet with delightful flavor. A superior home garden melon. This is another of our choice varieties and should not be overlooked in making your selection. Postpaid: Pkt. 5c; oz. 25c; ¼ lb. 75c; 1 lb. \$1.90.

Early Hackensack

Rocky Ford

Hale's Best

### GREEN FLESHED

**412 EXTRA EARLY HACKENSACK.** 80 days. A most popular variety for home use and truck gardening. Fruits large, globular flattened. Flesh is thick, very sweet and spicy. This variety is equally as good as the best and is known among melon raisers as a prime favorite. Postpaid: Pkt. 5c; oz. 25c; ¼ lb. 75c; 1 lb. \$1.90.

**401 SELECT ROCKY FORD.** 92 days. Probably the most widely grown cantaloupe. Almost round. Green flesh of delicious flavor. Fruits weigh about 2½ pounds. You can plant this melon with our assurance of its goodness and delightful taste. You will not be disappointed. Postpaid: Pkt. 5c; oz. 25c; ¼ lb. 75c; 1 lb. \$1.90.

**403 HONEY DEW.** 112 days. Green fleshed fruits 7" x 8", skin smooth, hard and creamy white, flesh very thick, sweet, juicy and distinctly flavored. A good keeper. Those who enjoy melons at their best, can be assured of satisfaction in this particular variety. Postpaid: Pkt. 5c; oz. 25c; ¼ lb. 75c; 1 lb. \$1.90.

## WATERMELONS

Plant in hills about 8 feet apart each way. Don't disturb the vines after they start to run. Don't plant until ground is warm and cover only about 1 inch. Because of long growing season required in northern states, plant only early varieties.

**361 DIXIE QUEEN HYBRID.** 85 days. This new Hybrid is really queen in its class. Disease resistant and a heavy producer. Fruit nearly round or stumpy oval, 15 x 12 inches. Color light green with darker green stripes. Weight 35 to 40 pounds. The sweetest melon you ever tasted. Flesh is very bright red, crisp and delicious. No hard centers. Postpaid: Pkt. 25c.

**374 DIXIE QUEEN.** 85 days. Not quite as large as the Hybrid, although a fine melon for shipping and the home garden. A heavy producer and a winner in every way. Postpaid: Pkt. 5c; oz. 25c; ¼ lb. 70c; ½ lb. \$1.25; 1 lb. \$2.00.

**349 NEW ICE BOX.** 65 days. A small early variety. Weighs about 10 pounds. Recently introduced as a novelty which can be kept in a home refrigerator, without cutting. Rind rather thin. Light green with darker irregular stripes. Flesh sweet and red. Postpaid: Pkt. 10c; oz. 30c; ¼ lb. 90c; ½ lb. \$1.50.

**377 STONE MOUNTAIN.** Light veined with dark green. Fruits round, weigh about 45 pounds. Flesh rich red of fine texture, tender, sweet, luscious. Wilt-Resistant. Postpaid: Pkt. 5c; oz. 20c; ¼ lb. 60c; ½ lb. \$1.00; 1 lb. \$1.75.

**360 TOM WATSON.** 85 days. Very popular shipping melon of the long type. Keeps well. Flesh bright red of excellent flavor. Pkt. 5c; oz. 20c; ¼ lb. 60c; ½ lb. \$1.00; 1 lb. \$1.75.

**369 GOLDEN HONEY.** 88 days. A novel item for the home and market gardens. Dark green, medium sized, long oval shape. Cream colored flesh which is very tender and delicious. Postpaid: Pkt. 5c; oz. 30c; ¼ lb. 70c; ½ lb. \$1.25; 1 lb. \$2.00.

**Berry's RICH, MEATY, HEAVY FRUITING**

# TOMATOES

## EARLY VARIETIES

No. 655—**EARLIANA**. 65 days from planting to eating, a heavy yielder of good quality. This is a safe early variety that has proved its worth to thousands of gardeners for many years. Our Earliana seed is an improved strain that will please you. Pkt. 10c;  $\frac{1}{2}$  oz. 35c; oz. 60c. Postpaid.  
No. 649—**SIOUX**. 65 days. One of the best early varieties. Fruit large, smooth, attractive, red in color and meaty. Vines have a spread of 4 to 6 feet. Foliage remains in good condition throughout the season. Pkt. 10c;  $\frac{1}{2}$  oz. 40c; oz. 70c. Postpaid.

## SECOND EARLY VARIETIES

No. 664—**RUTGERS**. 76 days. The outstanding new variety in its class. A heavier yielder. It ripens from the inside out to a uniform bright scarlet color. Thrives under more unfavorable conditions than other varieties. Pkt. 10c;  $\frac{1}{2}$  oz. 30c; oz. 50c;  $\frac{1}{2}$  lb. \$2.00. Postpaid.  
No. 665—**MARGLOBE**. 77 days. A most popular all purpose variety, very vigorous and productive, disease resistant. Uniformly large solid fruits, bright scarlet of finest quality and flavor. Pkt. 10c;  $\frac{1}{2}$  oz. 35c; oz. 60c. Postpaid.  
No. 663—**NEW STONE**. 85 days. Plants large, dense, very productive. Fruits large, smooth, attractive, scarlet red. Ripens evenly and is uniform. Pkt. 10c;  $\frac{1}{2}$  oz. 35c; oz. 60c. Postpaid.

## SPECIAL FAVORITES!

No. 679—**GOLDEN QUEEN**. 84 days. A main crop; large, smooth, bright yellow tomato. Good for home gardens. Fruit are solid and of mild flavor. Pkt. 10c;  $\frac{1}{2}$  oz. 40c; oz. 70c;  $\frac{1}{4}$  lb. \$2.25. Postpaid.  
No. 670—**WHITE BEAUTY**. Many feature this variety. An ivory white tomato with paper white flesh. As big as Ponderosa with few seeds and no acid. Pkt. 10c;  $\frac{1}{2}$  oz. 50c; oz. 90c. Postpaid.  
No. 648—**ORANGE JUBILEE**. 72 days. Orange yellow in color. It is novel in appearance and makes a delicious juice of attractive color. Vines short, requiring small growing space. Fruit thick walled with few seeds. Pkt. 10c;  $\frac{1}{2}$  oz. 40c. Postpaid.

Rutgers

No. 675—**BEEFSTEAK**. 83 days. A splendid late variety for the home garden. Produces an abundance of large size fruits. Rich pink in color. Smooth and uniform. Flesh solid, juicy and has a rich subacid flavor. Pkt. 10c;  $\frac{1}{2}$  oz. 50c; oz. 85c. Postpaid.

## New Hybrid

## STOKESCROSS NO. 5

644 80 days. This new F-2 Hybrid will really produce. In our trial grounds the past two seasons it was our most outstanding variety. We consider it the greatest advance in tomato breeding in many years. Plants are vigorous and very productive, bearing fruit until killed by frost. Fruit medium size, bright red, meaty and firm. No ridges or cracks make this tomato ideal for slicing and canning. Pkt. about 200 seeds 50c; Trade Pkt. about 500 seeds \$1.00. Postpaid.

## LATE OR MAIN CROP

666 **GIANT IMPROVED PONDEROSA**. The largest tomato developed to date. Our seed has been triple tested, in laboratory greenhouse and trial grounds, in removing the roughness and splitting tendency from this giant of all tomatoes—a favorite of thousands. Almost seedless, making it fine for slicing. Vines are vigorous and productive, fruits large, oblong, purplish red, thin skinned and solid. Recommended for superior flavor. Pkt., 10c;  $\frac{1}{2}$  oz., 40c; oz., 65c, postpaid.

671 **OXHEART**. 87 days. A distinctively attractive variety, entirely different from any other tomato. Increasing in popularity each year because of its very solid meaty fruits of a delicious sub-acid flavor, almost seedless, the fruit grows extremely large and heart shaped. Flesh is pink. A favorite of thousands for the home garden. Pkt., 10c;  $\frac{1}{2}$  oz., 45c; oz., 85c, postpaid.

### Small Fruited Varieties

657 Red Cherry. 673 Yellow Pear.  
659 Red Pear. 677 Small fruited Mixed.  
667 Yellow Plum. 699 Ground Cherry.  
10c per packet postpaid.

## NO-SEED HORMONE Blossom-set

Grow **EARLIER**, Larger, Meatier **TOMATOES**... more on each plant... with No-Seed **BLOSSOM SET**, approved hormone spray that's easy to use. Just mix with water and spray. Stops blossom-drop; makes blossoms set fruit chemically. Tomatoes ripen 2 to 4 weeks earlier. Fruits are larger, firmer, more delicious. Many are **SEEDLESS**. Excellent for **STRAWBERRIES**, peppers, cukes, etc. Tested by USDA and leading Universities. 4 oz. bottle makes 1 gal., 75c; pint makes 4 gals., \$1.75.

## Plants

For the first time we are listing Stokes-cross F-2 Hybrid Tomato Plants. These are field grown and are more hardy than the tender plants you get from the Greenhouse. Each plant has a well developed root and will make a quicker start. Available April, May and June. Postpaid: 12 for 59c; 25 for 98c.

SEE PAGE 52 FOR OTHER FIELD GROWN PLANTS 43

# Berry's

## FINEST QUALITY SELECTIONS

Extra Delicious Vegetables • Beautiful Flowers

### TETRA SNAPDRAGON

Tetra is the most satisfactory outdoor snapdragon offered today. Being a Tetraploid, it is a vigorous grower. Almost never crippled with rust. Many colors. An eye opener for the home gardener. No. 1352—Pkt., 25c; 2 Pkts., 45c, Postpaid.

### FIRE CHIEF PETUNIA

All America Selections, Gold Medal Winner for 1950. Brilliant scarlet red, an entirely new color in this class. First Gold Medal Winner in 11 years. Plants dwarf and compact with long blooming season. One of the finest bedding petunias ever grown. No. 1326—Pkt., 25c; 2 Pkts., 45c, Postpaid.

### TITHONIA

Torch — All America Selections winner for 1951. Anybody who can grow Zinnias can have loads of brilliant orange-scarlet 4" cutflowers like Single Dahlias by mid-summer. A compact plant growing only 4' 4 1/2" high. Early enough for the South. No. 1377—Pkt., 25c; 2 pkts., 45c. Postpaid.

### HYBRID ONION

Y 42 Yellow Sweet Spanish type about 10 days earlier than this well known old variety. Bulbs are true globe shape, very firm, juicy and sweet. White flesh. Produces a heavy yield of large uniform and attractive onions. This Hybrid is worthy of a trial in your garden. No. 445—Pkt., 25c; oz., \$1.45. Postpaid.

### GREAT LAKES LETTUCE

A HOME GARDEN VARIETY that will really stand up, and will produce hard heads in hot weather. The heads are of medium size, attractive deep green with thick crisp leaves folding over the heads. Remains in condition long after forming. Resistant to tip burn. All America Selection—1944. No. 339—Pkt., 15c; oz., 50c; 1/4 lb., \$1.75, Postpaid.

### TOP CROP BEAN

All America Selections, Gold Medal Winner for 1950. Developed by the U. S. Department of Agriculture. Plants vigorous and very prolific, resistant to common bean mosaic. Pod medium green, round and very straight, stringless and meaty. This new variety will please you in every way. High quality for home canning or freezing. No. 105—Pkt., 15c; 1/2 lb., 35c; 1 lb., 60c; 2 lb., \$1.10, Postpaid.

### CHERRY BELLE RADISH

All America Bronze Medal Winner. A small round cherry, scarlet short top radish, that matures quickly. Delicious at eating stage. We consider it our best early radish. Buy enough for a succession of plantings and enjoy fresh radishes all summer. No. 535—Pkt., 10c; oz., 25c; 1/4 lb., 60c, Postpaid.

### HYBRID CUCUMBER

Sure Crop. New All America Bronze Medal Winner. White spine type, matures in 58 days. Fruits are slender, blunt ended and hold its dark color quite well. Fine for slicing or may be used for pickles at early stages of growth. Excellent flavor and texture. No. 241—Pkt., 25c. Postpaid.

### NEW EARLY GOLD SWEET CORN

OUR BEST EARLY YELLOW. 70 days from planting. Uniform ears, 7 inches long. Bright yellow kernels, 12 rows, stocks six feet high. Our best for home and market gardens. Plan on planting some of this variety and be the first in your neighborhood to have quality sweet corn for your table. We recommend this variety for canning or freezing. No. 280X—Pkt., 15c; 1/2 lb., 35c; 1 lb., 65c; 2 lb., \$1.20, Postpaid.

### BABY BEET

A BEET OF TRULY SUPERIOR QUALITY. An early variety of deep blood red color. A selection of equally superior quality for table, canning and pickling. Smooth globe shaped roots with short tops. Extra sweet and crisp. It matures quickly but is a splendid keeper. If you want the best try this one. It will be a favorite among all others. No. 164—Pkt., 10c; oz., 25c; 1/4 lb., 90c; 1 lb., \$2.50, Postpaid.

### MIDGET WATERMELON

New Hampshire Midget. An outstanding variety that will please you in every way. Under favorable conditions it ripens in 65 days from seed. Light gray green in color with narrow irregular stripes. Flesh bright red solid and sweet. Its average weight is about 3 pounds. Vines are small. An excellent melon for the home gardeners. No. 362—Pkt., 15c; oz., 35c. Postpaid.

1 Pkt. each of the above 11 Varieties. \$2.05 Value for \$1.69, Postpaid. Order No. 52x.

# A WIDE VARIETY OF *Choicest* FOODS

## ASPARAGUS

**101 WASHINGTON RUST PROOF.** Preferred by market gardeners because of freedom from disease. A large straight luscious stalk with firm tips of finest quality. Postpaid: Pkt. 5c; oz. 15c; ¼ lb. 50c; ½ lb. 95c; 1 lb. \$1.80.

**102 PARADISE.** A sensational new and early Asparagus. Producing a normal crop one year earlier than any other. A heavier yielder. Postpaid: Pkt. 10c; oz. 35c; ¼ lb. \$1.35; ½ lb. \$2.60; 1 lb. \$4.90.

Paradise

## CAULIFLOWER

**220 EARLY SNOWBALL.** 54 days. Most widely used early variety, especially valuable for market. Dwarf habit. A sure header, medium size. Delicious, white and tender. Postpaid: Pkt. 10c; ¼ oz. 75c; ½ oz. \$1.25; oz. \$2.00.

Early Snowball

## CRISP CELERY

White Plume Celery

**253 GIANT PASCAL.** 125 days. An excellent variety for fall and winter use. Large, thick, crisp, stringless stalks with a delicious nut-like flavor. Blanching to a beautiful yellowish-white. Postpaid: Pkt. 10c; ½ oz. 20c; oz. 35c; ¼ lb. \$1.30.

**252 GOLDENSELF-BLANCHING.** 105 days. Stalks heavier than white varieties blanching into a rich golden yellow. Fine quality, crisp, tender, free from strings. Postpaid: Pkt. 10c; ½ oz. 30c; oz. 50c; ¼ lb. \$1.80.

## Berry's Finest Table Beets

Beets should be planted both in Spring and Fall. Will keep fine stored in pit or may be canned. ½ ounce will plant 25 feet of row. Plant about 1½ inches deep, about 2 inches apart in row. Make several plantings about one week apart. Average person requires 10 pounds per year.

**154 EARLY BLOOD TURNIP.** 55 days. Excels in flavor and appearance. A medium early variety, roots top shaped, dark red, retaining color even when cooked. Sweet and crisp. Matures quickly but is a splendid keeper. Postpaid: Pkt. 5c; oz. 25c; ¼ lb. 70c; ½ lb. \$1.10; 1 lb. \$2.00.

**167 EARLY WONDER.** 52 days. This wonderful early beet is the result of years of reselecting and improving. For earliness it can't be beat. Very uniform in growth, root globular in shape. Postpaid: Pkt. 5c; oz. 20c; ¼ lb. 65c; ½ lb. \$1.00; 1 lb. \$1.90.

**155 CROSBY'S EGYPTIAN.** 53 days. An extra early variety preferred by market gardeners, splendid for bunching. Roots globe shaped, slightly flattened, with small tap root. Finest quality, tender and sweet. Flesh purplish-red. Postpaid: Pkt. 5c; oz. 25c; ¼ lb. 70c; ½ lb. \$1.10; 1 lb. \$2.00.

**157 DETROIT DARK RED.** 58 days. The outstanding variety for home use, truck gardeners, and canning. Fine quality, tender and sweet. Roots perfectly round. With small tap root, uniform. Flesh dark red with slight zone. Postpaid: Pkt. 5c; oz. 20c; ¼ lb. 65c; ½ lb. \$1.00; 1 lb. \$1.90.

**164 GOOD FOR ALL.** 55 days. Roots smaller than Detroit. Flesh deep crimson and sweet. Leaves medium size smooth and distinct. A very tender variety for canning or the market gardener. Postpaid: Pkt. 10c; oz. 25c; ¼ lb. 90c; 1 lb. \$2.50.

## MANGELS & SUGAR BEETS

Mangels are very easily grown. A loose or sandy loam type of soil is best to grow mangels in. Drill about 6 pounds of seed per acre in rows 2 feet apart. Cultivate right after planting down the drill row. The following 2 varieties postpaid: oz. 20c; ¼ lb. 60c; ½ lb. 95c; 1 lb. \$1.75.

**162 MAMMOTH LONG RED.** 110 days. Heaviest yielding and largest of mangels. Flesh pink tinged.

**160 GOLDEN TANKARD.** 100 days. Very large size and easily lifted. Skin deep orange, flesh yellow with white zones.

**165 KLEIN WANZLEBEN.** 110 days. Our best sugar beet. Extremely rich in sugar, flesh fine grained. Postpaid: Pkt. 5c; oz. 20c; ¼ lb. 60c; ½ lb. 90c; 1 lb. \$1.60.

## SWISS CHARD

**158 LUCULLUS.** 50 days. Makes continuous greens of delicious flavor throughout the summer. Grows anywhere. Plant from early spring till July. Postpaid: Pkt. 5c; oz. 20c; ¼ lb. 65c; ½ lb. \$1.00; 1 lb. \$1.90.

**163 RHUBARB CHARD.** A strong growing Swiss chard that looks like Rhubarb. Leaves and stalks are both wholesome and nutritious. Postpaid: Pkt. 5c; oz. 25c; ¼ lb. 75c.

## BIGGER BERRIES

For bigger better fruits use Berry-Set. Just mix the powder with water and spray the open blossoms. (Not necessary to confine spray to blossoms only. Perfectly safe to spray the whole plant.) The 50c package makes 4 gallons of spray solution, enough for several hundred plants. We recommend Berry-Set also for Blackberries and Rasp-

berries. Postpaid: 1 oz. Pkt. 50c.

## BETTER PLANTS

### HYPONEX

Grows Better Plants Quicker

Makes perfect balanced plant food when dissolved in water and applied. Grows sturdier, more luxuriant house plants, flowers, vegetables, lawns, trees in poorest soil—even in sand, cinders or water (Hydroponics).

Has highest percentage of quickly available plant food elements. Won't burn . . . Clean and odorless. Excellent for cuttings, seedlings, transplants. 1 oz. makes 6 gallons liquid food. Postpaid: 1 oz. Pkt. 10c; 3 oz. can 25c; 7 oz. can 50c.

## PROTECT CROPS

### FLYING DISK

SCARE Birds and Animals Away

Amazing protection for newly planted seeds, berries, tender seedlings, fruit trees, etc. Made of shining aluminum, FLYING DISKS spin and whirl madly in all directions—give blinding reflections and weird jingling, crackling sounds—to scare birds and animals away easily strung across area to be protected—or from branches of fruit trees and vines.

# HEALTH GIVING FOODS AT LOW COST

## CABBAGE

Golden Acre

Late Flat Dutch

Cabbage is of vital importance for our health and nutrition. Rich in vitamins when eaten raw. Can be grown over a long season. Plant seed in hills for planting outdoors, as early as possible. Cover lightly about  $\frac{1}{2}$  inch. Plant both early and late varieties. One person needs about 50 pounds a year. Used more often in a health diet than any other vegetable except potatoes and tomatoes.

One ounce contains about 5000 seeds. It is very economical to grow your plants, and have a few extra to sell to your neighbors. Cabbage plants are easy to start.

### EARLY CABBAGE VARIETIES

- 179 GOLDEN ACRE.** 65 days. A new variety, sure header; heads rounds and very solid, few outer leaves. Used by truckers for earliest markets. Postpaid: Pkt., 10c;  $\frac{1}{2}$  oz., 20c; oz., 35c;  $\frac{1}{4}$  lb., 75c;  $\frac{1}{2}$  lb., \$1.40; 1 lb., \$2.50.
- 176 EARLY JERSEY WAKEFIELD.** 65 days. Small compact conical heads, broad base. Few leaves permitting close planting. A favorite of market gardeners and shippers. Postpaid: Pkt., 10c;  $\frac{1}{2}$  oz., 20c; oz., 35c;  $\frac{1}{4}$  lb., 75c;  $\frac{1}{2}$  lb., \$1.40; 1 lb., \$2.50.
- 182 COPENHAGEN MARKET.** 68 days. Finest round-headed early cabbage. Heads uniform, solid, excellent quality. Few outer leaves. Short stem. Desirable likewise for early kraut. Postpaid: Pkt., 10c;  $\frac{1}{2}$  oz., 20c; oz., 35c;  $\frac{1}{4}$  lb., 75c;  $\frac{1}{2}$  lb., \$1.40; 1 lb., \$2.50.
- 181 EARLY FLAT DUTCH.** 80 days. A strain popular with market and home gardeners. Heads almost round, good solid quality, weigh about 5 lbs. Postpaid: Pkt., 10c;  $\frac{1}{2}$  oz., 20c; oz., 35c;  $\frac{1}{4}$  lb., 75c;  $\frac{1}{2}$  lb., \$1.40; 1 lb., \$2.50.
- 184 ALL SEASONS.** 90 days. Sure heading, very solid, for all purpose use. Earliest of the large cabbage. Withstands sun and dry weather. Postpaid: Pkt., 10c;  $\frac{1}{2}$  oz., 20c; oz., 35c;  $\frac{1}{4}$  lb., 75c;  $\frac{1}{2}$  lb., \$1.40; 1 lb., \$2.50.
- 194 RED ROCK.** 95 days. The largest and best red cabbage. It is fine for slaw, pickling or boiled. A sure header, an excellent keeper. Postpaid: Pkt., 10c;  $\frac{1}{2}$  oz., 30c; oz., 50c;  $\frac{1}{4}$  lb., \$1.25;  $\frac{1}{2}$  lb., \$2.00.

### CELERY OR CHINESE CABBAGE

- 175 CELERY OR CHINESE CABBAGE.** 75 days. Most popular for the home garden. Cylindrical, tapering heads. Crisp and tender. Plant during July-August. Makes fine chicken feed. Easy to grow. Postpaid: Pkt., 10c;  $\frac{1}{2}$  oz., 15c; oz., 25c;  $\frac{1}{4}$  lb., 75c;  $\frac{1}{2}$  lb., \$1.25; 1 lb., \$2.00.

Wisconsin Hollander

### YELLOWS DISEASE RESISTANT CABBAGE

The most destructive and widespread cabbage disease found in all sections east of the Rocky Mountains. "Yellows" is caused by minute organisms living in the soil indefinitely that thrive on living cabbage plants. The only control is to grow varieties that have been developed and are proven to be "Yellows Resistant."

- 174 MARION MARKET.** 80 days. Heads are almost round, very solid. Similar to Copenhagen Market but about 10 days later. Postpaid: Pkt., 10c;  $\frac{1}{2}$  oz., 30c; oz., 50c;  $\frac{1}{4}$  lb., \$1.25;  $\frac{1}{2}$  lb., \$2.00; 1 lb., \$3.50.
- 183 JERSEY QUEEN.** 55 days. Selected from Jersey Wakefield with which it remains identical in type and season. Leaves smooth and dark green. Heads pointed small and compact, permitting close planting. Postpaid: Pkt., 10c;  $\frac{1}{2}$  oz., 30c; oz., 50c;  $\frac{1}{4}$  lb., \$1.25;  $\frac{1}{2}$  lb., \$2.00; 1 lb., \$3.50.

- 190 WISCONSIN HOLLANDER.** 95 days. This strain was developed from Danish Ballhead and will produce solid heads even on "yellows" infested land. Postpaid: Pkt., 10c;  $\frac{1}{2}$  oz., 30c; oz., 50c;  $\frac{1}{4}$  lb., \$1.25;  $\frac{1}{2}$  lb., \$2.00; 1 lb., \$3.50.

### LATE CABBAGE VARIETIES

- 186 PREMIUM LATE FLAT DUTCH.** 110 days. Excellent for home and market garden use. Very solid, large, flat heads, 6 to 7 inches deep. High quality. Postpaid: Pkt., 10c;  $\frac{1}{2}$  oz., 20c; oz., 30c;  $\frac{1}{4}$  lb., 75c;  $\frac{1}{2}$  lb., \$1.40; 1 lb., \$2.50.
- 187 DRUMHEAD SAVOY.** 90 days. Popular for its tasty flavor. Sweeter than ordinary cabbage. Has crinkled leaves. An excellent keeper. Postpaid: Pkt., 10c;  $\frac{1}{2}$  oz., 20c; oz., 35c;  $\frac{1}{4}$  lb., \$1.00;  $\frac{1}{2}$  lb., \$1.75; 1 lb., \$3.00.
- 191 DANISH BALLHEAD.** 105 days. A superior variety, one of the finest late cabbages. 8 to 9 inches across. Desirable for shipping, storage, and kraut. Postpaid: Pkt., 10c;  $\frac{1}{2}$  oz., 20c; oz., 35c;  $\frac{1}{4}$  lb., \$1.00;  $\frac{1}{2}$  lb., \$1.75; 1 lb., \$3.00.

## CARROTS for Summer and Winter

### HIGH QUALITY TABLE CARROTS

Carrots are vital to health. Rich in Vitamin A, also B-1 and C. They have a wide variety of uses in meal plannings. Make rows not less than 15 inches apart and sow seed thinly about  $\frac{1}{4}$  inch deep.

- 203 IMPERATOR.** 77 days. An unusually fine variety. An All American Selection that does particularly well where soil is deep sandy loam. Roots are smooth slightly tapering to a stump-rooted tip, smooth, rich orange color, very little core, crisp, and of fine sweet flavor. Exceptionally attractive for bunching. Postpaid: Pkt., 10c; oz., 25c;  $\frac{1}{4}$  lb., 75c;  $\frac{1}{2}$  lb., \$1.40; 1 lb., \$2.50.
- 201 ONHEART.** 75 days. A short thick variety, best for heavy soil where it can be easily lifted. Roots orange-scarlet, about five inches in length; very heavy yielder. Postpaid: Pkt., 10c; oz., 25c;  $\frac{1}{4}$  lb., 75c;  $\frac{1}{2}$  lb., \$1.40; 1 lb., \$2.50.
- 201 DANVERS HALF LONG.** 75 days. None better for home gardens or market. Flesh bright orange in color and very tender. Grows six to seven inches long, tapered. Very productive. Postpaid: Pkt., 10c; oz., 25c;  $\frac{1}{4}$  lb., 75c;  $\frac{1}{2}$  lb., \$1.40; 1 lb., \$2.50.
- 205 NEW CHANTENAY.** 68 days. A fine sort for bunching, market or home gardens. About 6 inches long, stump rooted, deep orange in color. A heavy yielder. Postpaid: Pkt., 10c; oz., 25c;  $\frac{1}{4}$  lb., 75c;  $\frac{1}{2}$  lb., \$1.40; 1 lb., \$2.50.
- 212 NEW CORELESS CARROT.** 65 days. The greatest improvement made on any vegetable in years. Fine flavor, tender, and sweet. Early uniform size. Postpaid: Pkt., 10c; oz., 30c;  $\frac{1}{4}$  lb., 95c;  $\frac{1}{2}$  lb., \$1.75; 1 lb., \$3.00.

### HEAVY YIELDING STOCK CARROT

- 206 LONG ORANGE.** 100 days. Suitable for stock or table use. Roots red-orange, tapered to a point. A good winter keeper. Oz., 17c;  $\frac{1}{4}$  lb., 52c;  $\frac{1}{2}$  lb., 95c; 1 lb., \$1.75.
- 208 WHITE BELGIUM.** 95 days. One of the best stock feeding carrots. Oz., 17c;  $\frac{1}{4}$  lb., 52c;  $\frac{1}{2}$  lb., 95c; 1 lb., \$1.75.

### EGG PLANT

**CULTURE:** Start plants in house or hot bed. Transplant after all frost danger is past. Set plants 18 to 24 inches apart in rows 3 feet apart.

#### 310 IMPROVED NEW YORK PURPLE.

83 days. Our strain of this leading market variety, is unsurpassed. Skin glossy black purple, flesh white. Postpaid: Pkt., 10c;  $\frac{1}{2}$  oz., 35c; oz., 60c;  $\frac{1}{4}$  lb., \$2.00;  $\frac{1}{2}$  lb., \$3.75.

#### 312 BLACK BEAUTY.

80 days. Valuable to home gardeners and truckers for market. Ten days earlier than New York. Entirely spineless, sets fruit freely. Fruits are smooth, holding well after picking.

New York Purple

Postpaid: Pkt., 10c;  $\frac{1}{2}$  oz., 35c; oz., 60c;  $\frac{1}{4}$  lb., \$2.00;  $\frac{1}{2}$  lb., \$3.75.

Black Seeded Simpson

**338 OAK LEAF.** 43 days. The leaves are deeply lobed to resemble the oak leaf. A new favorite for the home garden. The dark green leaves are thick and tender. The quality and flavor of this distinct type lettuce is tops. Try this variety in your garden this season. Postpaid: Pkt. 10c; oz. 30c; ¼ lb. \$1.00.

## COOL CRISP CUCUMBERS

Improved Long Green

**238x WOODRUFF HYBRID.** 62 days. A recent introduction. It is a great shipper and a fine cucumber for the home gardens. Tender flesh, rich dark green in color. Postpaid: Pkt. 10c; oz. 40c; ¼ lb. \$1.40; ½ lb. \$2.50.

**226 NATIONAL PICKLING.** 56 days. The finest early pickling type. Uniformly smooth. Rounded ends. Flesh thick. Postpaid: Pkt. 5c; oz. 20c; ¼ lb. 60c; ½ lb. \$1.10; 1 lb. \$2.00.

**228 CHICAGO PICKLE.** 59 days. One of the most popular pickling varieties; also good for slicing. Mid-season. Fruits medium green, uniform in size. Postpaid: Pkt. 5c; oz. 20c; ¼ lb. 60c; ½ lb. \$1.10; 1 lb. \$2.00.

**233 BOSTON PICKLER.** 56 days. Very early and prolific; uniform size, slightly tapered, weigh about 1½ lbs. Dark green. Fine for tables. Postpaid: Pkt. 5c; oz. 20c; ¼ lb. 60c; ½ lb. \$1.05; 1 lb. \$2.00.

**234 IMPROVED WHITE SPINE.** 65 days. Vigorous and productive, fruit uniform, seven to nine inches long, very showy. Postpaid: Pkt. 5c; oz. 20c; ¼ lb. 60c; ½ lb. \$1.05; 1 lb. \$2.00.

**239 STRAIGHT 8.** 66 days. The highest award winner of the All-American trials in 1935. The best new cucumber. Fruits are of excellent quality, uniform size, dark green color. About 8 inches long, 2 inches wide. Vines vigorous and productive. Ideal for the home garden, local market, or shipping. Postpaid: Pkt. 5c; oz. 25c; ¼ lb. 75c; ½ lb. \$1.30; 1 lb. \$2.50.

**236 IMPROVED LONG GREEN.** 67 days. Standard late variety. Splendid for slicing, excellent quality. Fruits dark green, weigh 3 to 3½ lbs., flesh white, firm and crisp. Postpaid: Pkt. 5c; oz. 25c; ¼ lb. 75c; ½ lb. \$1.30; 1 lb. \$2.50.

### BERRY'S PICKLING AND SLICING CUCUMBER COLLECTION

Here are the finest pickles you ever had. Assorted for size, also for season, being early, medium and late. Plant this collection of 3 best varieties.

No. 240—1 Pkt. Early Green Cluster  
1 Pkt. National Pickling  
1 Pkt. Improved Long Green

Regular 15c catalog value.

**12¢**  
Postpaid

**CULTURE:** Plant as early in spring as ground can be worked, light frost does not harm this crop. Sow seed sparingly in rows not less than 15 inches apart covering seed ½ inch deep. In leaf varieties plants should be thinned to 3 or 4 inches. For best head lettuce start in a cold frame or hot bed and set out as early as possible. For a later supply sow in drills, when up a few inches thin out plants 10 to 12 inches for heading varieties and 3 to 4 inches for loose leaved. A packet will plant a 50 foot row.

## VITAMIN RICH HEADING VARIETIES

**339 GREAT LAKES.** 74 days. All American Winner. New York Imperial type that will really produce hard heads in hot weather. Attractive deep green of good size with thick crisp leaves. Resistant to tipburn. Postpaid: Pkt. 15c; oz. 50c.

**332 IMPROVED HANSON.** 80 days. An old favorite for home and market gardens. A sure heading, hardy type. Large, compact, tender, sweet heads. Postpaid: Pkt. 5c; oz. 20c; ¼ lb. 70c; ½ lb. \$1.25; 1 lb. \$2.25.

**333 BIG BOSTON.** 75 days. A popular butter-head variety for forcing and outside culture. Will not stand hot weather. A medium sized, compact head with creamy yellow heart. Leaves smooth glossy tinged with reddish brown. Postpaid: Pkt. 5c; oz. \$1.25; 1 lb. \$2.25.

**336 ICEBERG.** 84 days. A large late variety. Conical shaped heads—interior, white, sweet and crisp. Outer leaves light green tinged with brown. A home garden variety. Postpaid: Pkt. 5c; oz. 25c; ¼ lb. 75c; ½ lb. \$1.40; 1 lb. \$2.50.

**337 NEW YORK WONDERFUL #12.** 77 days. Earlier than regular New York, but with all the good qualities of the older type. The outstanding shipping variety. Best for market gardens. Large solid heads, crisp and of excellent quality and fine flavor. Pictured below. Postpaid: Pkt. 5c; oz. 33c; ¼ lb. 92c; ½ lb. \$1.65; 1 lb. \$3.10.

New York Wonderful

## Delicious ENDIVE

**315 GREEN CURLED ENDIVE.** 96 days. A delicious variety with finely curled compact heart. Very desirable for salads. Postpaid: Pkt. 10c; oz. 20c; ¼ lb. 50c.

**317 BROAD LEAVED BATAVIAN OR FULL HEART.** 86 days. A medium large plant with a very compact, full heart. The leaves are broad and well blanchied. Handsome in appearance, superbly flavored. Postpaid: Pkt. 10c; oz. 20c; ¼ lb. 55c; ½ lb. 95c; 1 lb. \$1.75.

## PEPPY POP-CORN

**305 WHITE GIANT.** Here is something new and different in popcorn. Everyone who likes popcorn should be sure to grow some of it. Kernels as big or bigger than the South American but white instead of yellow in color. Postpaid: ¼ lb. 12c; ½ lb. 20c; 1 lb. 35c.

**303 WHITE HULL-LESS.** 90 days. Dwarf grower, small ears. Kernels hull-less snowy white when popped; fine flavor. Postpaid: ¼ lb. 12c; ½ lb. 18c; 1 lb. 30c.

**304 SOUTH AMERICAN.** 110 days. (Dynamite.) Kernels are yellow, pop to immense size. Stalks grow large with two or three ears on a stalk. Popped corn has a rich cream color, flavor is excellent. Postpaid: ¼ lb. 12c; ½ lb. 18c; 1 lb. 30c.

### HYBRID POPCORN

**306x SOUTH AMERICAN HYBRID.** 110 days. A great improvement over the open pollinated type. Larger ears, disease resistant. Can be picked with mechanical picker. Postpaid: ¼ lb. 20c; ½ lb. 38c; 1 lb. 70c.

**302x WHITE HULL-LESS HYBRID.** 95 days. New Minihybrid 250 White Hull-less is the variety to grow this year. Gives you bigger yields, earlier maturity, better quality and a premium price. Postpaid: ¼ lb. 20c; ½ lb. 38c; 1 lb. 70c.

**307x IOWA POP.** 95 days. This new Hybrid is rapidly becoming the most widely grown of the Japanese Hull-less type. It is a white popcorn with excellent plant and popping quality. Postpaid: ¼ lb. 20c; ½ lb. 38c; 1 lb. 70c.

White Hull-less Hybrid

# Tested ONION SEED AND SETS

## NEW CROP—HIGH GERMINATION

Grow your yearly supply of Onions from seed. A profitable crop for your own use or for sale. Yields of from 500 to 600 bushels per acre are possible. This crop can be grown in any state. Write to your State Horticulture Department for best growing instructions. Buy your seed from Berry's and get New Crop High Germinating Seed in the varieties best suited to your region. Sow  $2\frac{1}{2}$  to 3 lbs. per acre or 1 oz. per 100 feet of row.

### YELLOW ONION

**435 YELLOW GLOBE DANERS.** 105 days. A splendid variety for home gardens and market. Nearly globe shaped with pure yellow skin, white flesh, and mild flavor. Very productive with fine keeping qualities. Postpaid: Pkt., 10c; oz., 30c;  $\frac{1}{4}$  lb., 80c;  $\frac{1}{2}$  lb., \$1.55; 1 lb., \$3.00.

**436 SOUTHPORT YELLOW GLOBE.** 115 days. Usually grown for commercial purposes. A large, mild, white fleshed type with rich yellow onion (pictured at left of page). Postpaid: Pkt., 10c; oz., 30c;  $\frac{1}{4}$  lb., 80c;  $\frac{1}{2}$  lb., \$1.55; 1 lb., \$3.00.

**435 YELLOW SWEET SPANISH.** 110 days. The most popular onion grown. Golden yellow, extra large and mild, very pleasant flavored white flesh. An unusually heavy yielder. Postpaid: Pkt., 10c; oz., 40c;  $\frac{1}{4}$  lb., \$1.40;  $\frac{1}{2}$  lb., \$2.25; 1 lb., \$4.25.

### RED VARIETIES

**432 SOUTHPORT RED GLOBE.** 110 days. The finest of the red onion. Good for sets or storage. Uniform in size, handsome perfect globe shaped. An excellent keeper. Skin glossy red, flesh white, fine grained and tender. Postpaid: Pkt., 10c; oz., 35c;  $\frac{1}{4}$  lb., 90c;  $\frac{1}{2}$  lb., \$1.75; 1 lb., \$3.25.

**426 RED WETHERSFIELD.** 100 days. Large flattened bulbs with purplish red skin, flesh white with pink tinge, very firm. One of the best keepers, an excellent commercial variety. Postpaid: Pkt., 10c; oz., 35c;  $\frac{1}{4}$  lb., 90c;  $\frac{1}{2}$  lb., \$1.75; 1 lb., \$3.25.

### WHITE ONION

Onion is an important vegetable to good health. We suggest raising some onions from plants and sets. Sets are best for early green onions, plants produce the later milder varieties.

**434 WHITE SWEET SPANISH.** 110 days. The largest and mildest of all onions. Globe shaped, pure white flesh, very firm and mild. An unusual producer. Postpaid: Pkt., 10c; oz., 40c;  $\frac{1}{4}$  lb., \$1.40;  $\frac{1}{2}$  lb., \$2.25; 1 lb., \$4.25.

**440 WHITE BERMUDA OR CRYSTAL WAX.** 93 days. Clear white, mild, delicate flavored large flat onion of superior quality. You can grow Bermudas from seed. Postpaid: Pkt., 10c; oz., 30c;  $\frac{1}{4}$  lb., 80c;  $\frac{1}{2}$  lb., \$1.55; 1 lb., \$3.00.

**433 SOUTHPORT WHITE GLOBE.** 110 days. A splendid commercial onion, attractive in color, size and shape. A smooth globe type, flesh mild, fine grained and tender. A very heavy producer. Postpaid: Pkt., 10c; oz., 40c;  $\frac{1}{4}$  lb., \$1.25;  $\frac{1}{2}$  lb., \$2.40; 1 lb., \$4.50.

**441 WHITE PORTUGAL OR SILVER SKIN.** 100 days. The most widely used white onion. This all purpose variety can be used for sets, pickling, green bunching or storage. Bulbs are medium size, flat, clear white, hard, fine grained, and of pleasing flavor. At pickling stage bulbs are small, smooth and round. Raise your own this year. Postpaid: Pkt., 10c; oz., 40c;  $\frac{1}{4}$  lb., \$1.25;  $\frac{1}{2}$  lb., \$2.40; 1 lb., \$4.50.

### ONION and GARLIC SETS

#### PRODUCE LARGER ONIONS OF HIGHEST QUALITY

Our onion sets are small sets. This means they are produced under the most ideal conditions. Berry's sets are long keepers, uniform in size and of finest quality. We guarantee delivery of your set order free from sprouts.

**444 YELLOW.** Postpaid:  $\frac{1}{2}$  gal., 40c; 1 gal., 75c. Not Prepaid:  $\frac{1}{2}$  bu., \$1.60; 1 bu., \$3.00.

Onion sets will be available from Feb. 15th until supply is exhausted. We cannot ship onion sets after Apr. 15th.

Quality Onion Plants. See Page 52.

#### GARLIC SETS

**448 GARLIC SETS.** A bulbous root of the onion type, easily grown, used for flavoring. When leaves turn yellow, dig and dry in shade. Postpaid:  $\frac{1}{2}$  lb., 30c; 1 lb., 50c.

## A Wonderful Selection of PEPPERS

**513 KING OF THE NORTH.** 65 days. A sweet pepper like Ruby King but earlier. 65-70 days from time of setting out until fruit is ready to use. Plants 22-26" tall, erect, very heavy yielding and hardy. Postpaid: Pkt., 10c;  $\frac{1}{2}$  oz., 30c; oz., 50c;  $\frac{1}{4}$  lb., \$1.80;  $\frac{1}{2}$  lb., \$3.50; 1 lb., \$6.75.

**511 LARGE BELL OR BULL NOSE.** 75 days. Plants small, erect, prolific, early. Large fruits bell shaped, deep green turning to scarlet, mild and sweet in flavor. Postpaid: Pkt., 10c;  $\frac{1}{2}$  oz., 25c; oz., 45c;  $\frac{1}{4}$  lb., \$1.75;  $\frac{1}{2}$  lb., \$2.75; 1 lb., \$5.25.

**515 RUBY KING.** 70 days. Excellent for home and market garden and shipping. Plants medium dwarf, erect, productive. Fruits dark green turning to ruby red. Flesh thick, mild and sweet. Used for mangoes. Postpaid: Pkt., 10c;  $\frac{1}{2}$  oz., 30c; oz., 50c;  $\frac{1}{4}$  lb., \$1.80;  $\frac{1}{2}$  lb., \$3.50; 1 lb., \$6.75.

**518 CALIFORNIA WONDER.** 75 days. One of the finest mild sweet flavored peppers, with thicker flesh than other varieties. Upright, prolific, vigorous grower. Very attractive, smooth, uniform and deep green. Excellent for shipping home or market gardening. Postpaid: Pkt., 10c;  $\frac{1}{2}$  oz., 35c; oz., 60c;  $\frac{1}{4}$  lb., \$2.00;  $\frac{1}{2}$  lb., \$3.75; 1 lb., \$7.00.

**509 CHINESE GIANT.** 80 days. An extremely large, sweet pepper for home and market garden. Plants are short and stocky. Fruits are deep green changing to deep scarlet. Postpaid: Pkt., 10c;  $\frac{1}{2}$  oz., 35c; oz., 60c;  $\frac{1}{4}$  lb., \$2.00;  $\frac{1}{2}$  lb., \$3.75; 1 lb., \$7.00.

**520 SUNNYBROOK.** 73 days. A home garden variety with unusual flavor. Fruits are tomato shaped, smooth with thick mild flesh. Deep green turning to deep red. Postpaid: Pkt., 10c;  $\frac{1}{2}$  oz., 30c; oz., 50c;  $\frac{1}{4}$  lb., \$1.80;  $\frac{1}{2}$  lb., \$3.50; 1 lb., \$6.75.

**514 GOLDEN QUEEN.** 78 days. A large yellow variety with sweet and mild flavor. Resembles Ruby King in size and shape. A deep green turning to attractive yellow. Postpaid: Pkt., 10c;  $\frac{1}{2}$  oz., 35c; oz., 60c;  $\frac{1}{4}$  lb., \$2.00;  $\frac{1}{2}$  lb., \$3.75; 1 lb., \$7.25.

**517 PIMIENTO.** 85 days. A good canning variety. Fruits heart shaped and very smooth; color dark green changing to crimson. Flesh thick, sweet and mild. Postpaid: Pkt., 10c;  $\frac{1}{2}$  oz., 30c; oz., 50c;  $\frac{1}{4}$  lb., \$1.80;  $\frac{1}{2}$  lb., \$3.50; 1 lb., \$6.50.

**521 HUNGARIAN YELLOW WAX.** 65 days. Peppers pungent and measuring 5 to 6 inches in length, rather slender but meaty, and tapering to a somewhat twisted point. They are waxy canary yellow in color, presenting a handsome appearance, and turn to a beautiful crimson at maturity. Very prolific and desirable. Also known as Bulgarian Yellow Wax. Postpaid: Pkt., 10c;  $\frac{1}{2}$  oz., 35c; oz., 60c;  $\frac{1}{4}$  lb., \$2.00;  $\frac{1}{2}$  lb., \$3.75; 1 lb., \$7.25.

**512 CAYENNE.** 70 days. A favorite hot variety used largely for canning, pickles and drying. Plants large and productive. Fruits long, tapering; deep green changing to brilliant red. Postpaid: Pkt., 10c;  $\frac{1}{2}$  oz., 30c; oz., 50c;  $\frac{1}{4}$  lb., \$1.80;  $\frac{1}{2}$  lb., \$3.50; 1 lb., \$6.75.

**519 CHILI.** 80 days. Used for canning and drying. Fruits long and tapering, deep green changing to bright scarlet; extremely hot. Postpaid: Pkt., 10c;  $\frac{1}{2}$  oz., 30c; oz., 50c;  $\frac{1}{4}$  lb., \$1.80;  $\frac{1}{2}$  lb., \$3.40; 1 lb., \$6.50.

## Grow PEANUTS

Shell before planting. Plant in rows  $2\frac{1}{2}$  to 3 ft. apart, 10 inches apart in the row. Cover one to two inches. A sandy soil is best.

**621 NEW MAMMOTH VIRGINIA.** Of upright growth. Large pods and kernels. Always yield less imperfect pods than any other variety. Vines good for stock. Postpaid:  $\frac{1}{2}$  lb., 25c; 1 lb., 45c; 3 lbs., \$1.10.

**622 IMPROVED SPANISH.** Bunch type. Early maturing with 2 white nuts in each pod. Plant 6 inches apart in 18 inch rows. Postpaid:  $\frac{1}{2}$  lb., 20c; 1 lb., 35c; 3 lbs., \$1.00.

### PARSNIPS

**502 IMPROVED HOLLOW CROWN.** 95 days. Roots long, white and smooth; hollow crowned. Tender and of excellent flavor. A good keeper. Grows 10 to 12 inch roots. Many gardeners prefer to leave parsnips in the ground over winter. Freezing is not harmful to this vegetable and improves the flavor. Postpaid: Pkt., 5c; oz., 15c;  $\frac{1}{4}$  lb., 35c;  $\frac{1}{2}$  lb., 65c; 1 lb., \$1.20.

Hollow Crown Parsnip

### USE BERRY'S BUG DUST

Red Globe

Ruby King Pepper

# All VEGETABLE SEED

*Guaranteed to Grow*

## Choicest Radishes

## PUMPKINS

Sow seed as early as ground can be worked in rows about 15 inches apart. Cover with  $\frac{1}{2}$  inch of fine soil firmly pressed down. Sow the winter varieties in the late summer or early fall. Like the turnip they make their growth in the autumn.

**530 EARLY WHITE TURNIP.** 24 days. This popular radish is the earliest white radish and ready for the table in 23 days. Pure white crisp and tender. Postpaid: Pkt. 5c; oz. 15c;  $\frac{1}{4}$  lb. 50c;  $\frac{1}{2}$  lb. 80c; 1 lb. \$1.50.

**526 CRIMSON GIANT.** 28 days. The largest early radish. Will still be crisp and tender after growing to a huge size. We have had radishes two inches in diameter that were still sweet and crisp. The best all season radish in our trials. Postpaid: Pkt. 5c; oz. 10c;  $\frac{1}{4}$  lb. 30c;  $\frac{1}{2}$  lb. 55c; 1 lb. \$1.00.

**525 SPARKLER OR SCARLET TURNIP WHITE TIP.** 26 days. The best of the white tip radishes from our observation. A very solid, tender, sweet, flavored radish second only to crimson giant in ability to withstand pithiness. A most attractive variety, the Scarlet Top contrasts with the white bottom producing a showy product. Very popular with market gardeners as well as home gardeners. Postpaid: Pkt. 5c; oz. 10c;  $\frac{1}{4}$  lb. 30c;  $\frac{1}{2}$  lb. 55c; 1 lb. \$1.00.

**528 EARLY SCARLET TURNIP.** 25 days. An early maturing variety. Roots small, round, with red skin. Flesh very white, mild and crisp. Postpaid: Pkt. 5c; oz. 10c;  $\frac{1}{4}$  lb. 30c;  $\frac{1}{2}$  lb. 55c; 1 lb. \$1.00.

**533 FRENCH BREAKFAST.** 25 days. A popular variety for forcing or early outdoor planting. Gets hollow in warm weather. Medium sized, olive shaped. Scarlet with white tip. Postpaid: Pkt. 5c; oz. 10c;  $\frac{1}{4}$  lb. 30c;  $\frac{1}{2}$  lb. 55c; 1 lb. \$1.00.

**541 ICICLE.** 27 days. The most popular white radish. Grows long and slender, free from side roots. Flesh clear white, brittle, mild flavored. Postpaid: Pkt. 5c; oz. 10c;  $\frac{1}{4}$  lb. 30c;  $\frac{1}{2}$  lb. 55c; 1 lb. \$1.00.

**540 MIXED RADISHES.** We offer a mixture of the best varieties of radishes. Postpaid: Pkt., 5c; oz., 10c;  $\frac{1}{4}$  lb., 30c;  $\frac{1}{2}$  lb. 55c; 1 lb., \$1.00.

**542—CHINA ROSE WINTER.** 52 days. Bright rose-red in color, 4 to 6 inches long, two inches in diameter, cylindrical shape. Flesh white, crisp, and mild flavored. Postpaid: Pkt., 5c; oz., 12c;  $\frac{1}{4}$  lb., 40c;  $\frac{1}{2}$  lb., 75c; 1 lb., \$1.25.

**543 LONG BLACK SPANISH.** 50 days. One of the hardest and best winter keeping varieties. Large, firm, jet black skin, flesh snow white. Solid crisp and pungent. Postpaid: Pkt., 5c; oz., 12c;  $\frac{1}{4}$  lb., 40c;  $\frac{1}{2}$  lb., 75c; 1 lb., \$1.25.

### 3 DELICIOUS SNAPPY RADISHES

The three best radishes for the home garden. Extra early, tender, snappy, delicious. Each one a superior variety. No. 539—25c Value at 19c. Postpaid.

1 Pkt. Cherry Belle  
1 Pkt. Crimson Giant  
1 Pkt. White Icicle **19c** Postpaid

Sparkler

Connecticut Field Pumpkin

**481 MAMMOTH PRIZE.** 115 days. The largest of all Pumpkins. Valuable for stock feeding, but is also fine for pies. Flesh is thick, of a beautiful bright yellow, fine grained, solid and tender. Postpaid: Pkt., 5c; oz., 20c;  $\frac{1}{4}$  lb., 70c;  $\frac{1}{2}$  lb., \$1.35; 1 lb., \$2.50.

**483 SWEET, OR SUGAR PIE.** 105 days. Standard variety for pies. Flesh thick, dry and sweet, orange-yellow, and of superior quality. Fruits weigh 6 to 8 lbs., keep well. Will make pies that will melt in your mouth. Postpaid: Pkt., 5c; oz., 15c;  $\frac{1}{4}$  lb., 40c;  $\frac{1}{2}$  lb., 80c; 1 lb., \$1.50.

**485 KENTUCKY FIELD.** 115 days. Used largely for canning. Grow large, flat, weigh 10 to 15 lbs. Flesh deep yellow; coarse, thick and nutritious, and of good flavor. Also used for stock feeding. Postpaid: Pkt., 5c; oz., 15c;  $\frac{1}{4}$  lb. 40c;  $\frac{1}{2}$  lb., 80c; 1 lb., \$1.50.

**486 CONNECTICUT FIELD.** 115 days. (Picture above.) The standard cornfield pumpkin. Fruits grow large, weigh 15 to 25 lbs. Smooth, hard, orange-red skin; flesh orange-yellow, thick, coarse, and sweet. Fine for pies, canning, or feeding to stock. Postpaid: Pkt., 5c; oz., 15c;  $\frac{1}{4}$  lb., 40c;  $\frac{1}{2}$  lb., 80c; 1 lb. \$1.50.

**484 CUSHAW OR CROCKNECK.** 110 days. Very popular variety. Very large, often 2 ft. long, crock-neck shape. Creamy white shell; flesh yellow, solid, sweet. Excellent for pies; used also for stock feeding. Postpaid: Pkt., 5c; oz., 15c;  $\frac{1}{4}$  lb., 40c;  $\frac{1}{2}$  lb., 80c; 1 lb., \$1.50.

**487 GREEN STRIPED CUSHAW.** 110 days. Cream with dark green stripe. 16-20" long, weight 12 to 16 lbs. Yellow flesh. Postpaid: Pkt., 5c; oz., 15c;  $\frac{1}{4}$  lb., 40c;  $\frac{1}{2}$  lb., 80c; 1 lb., \$1.50.

Purple Top White Globe

**USE BERRY'S BUG-DUST**

Don't wait until the pests have destroyed your garden, order Berry's Bug Dust with your seed. 1 lb., 35c; 3 lbs., \$1.00; 5 lbs., \$1.60. Postpaid.

Icicle Radish

Crimson Giant

## TURNIPS for Summer & Winter

One ounce will plant 100 feet of row. Drill seed about 2 inches apart—cover very lightly.

**601 PURPLE TOP STRAP LEAF.** 46 days. An early, very productive variety. One of the most extensive grown kinds for home or market gardens. Postpaid: Pkt. 5c; oz. 15c;  $\frac{1}{4}$  lb. 35c;  $\frac{1}{2}$  lb. 60c; 1 lb. \$1.00.

**607 PURPLE TOP WHITE GLOBE.** 57 days. The most popular home and market garden variety. A good shipper. Very attractive appearance, fine in quality. Postpaid: Pkt. 5c; oz. 15c;  $\frac{1}{4}$  lb. 35c;  $\frac{1}{2}$  lb. 60c; 1 lb. \$1.00.

**606 SEVEN TOP.** 45 days. Grown for the tops which are excellent for greens and stock grazing. The roots are fibrous and of poor quality. May be left standing in the open ground during the winter, except in the extremely northern states. Extensively cultivated in the South. Postpaid: Pkt. 5c; oz. 10c;  $\frac{1}{4}$  lb. 30c;  $\frac{1}{2}$  lb. 50c; 1 lb. 95c.

**604 SNOWBALL.** 75 days. A late white variety grown largely in the South. Tops are large with cut leaves. Postpaid: Pkt. 5c; oz. 15c;  $\frac{1}{4}$  lb. 35c;  $\frac{1}{2}$  lb. 60c; 1 lb. \$1.00.

**603 SHOGGIN.** 30 days. The most popular foliage turnip. Grown for early greens and small roots. Tops 18 to 20 inches tall, erect, bright green, strap leaved. Roots round, white, tender and mild. The fastest grower of all. Postpaid: Pkt. 5c; oz. 10c;  $\frac{1}{4}$  lb. 35c;  $\frac{1}{2}$  lb. 50c; 1 lb. 95c.

**609 COWHORN.** 70 days. A stock feeding turnip. Roots 12 to 15 inches long, tapering. Flesh is sweet and tender. A good keeper. Postpaid: Pkt. 5c; oz. 15c;  $\frac{1}{4}$  lb. 35c;  $\frac{1}{2}$  lb. 60c; 1 lb. \$1.00.

**610 MIXED TURNIPS.** A mixture of all sorts, giving a variety of turnip roots and tops at one planting. Postpaid: Pkt. 5c; oz. 12c;  $\frac{1}{4}$  lb. 35c;  $\frac{1}{2}$  lb. 50c; 1 lb. 80c.

**612 RUTABAGA, AMERICAN PURPLE TOP.** 90 days. A dependable variety for home or market garden. Roots are large, round, yellow with purple top; flesh is light yellow, firm, sweet and tender. Postpaid: Pkt. 5c; oz. 15c;  $\frac{1}{4}$  lb. 35c;  $\frac{1}{2}$  lb. 60c; 1 lb. \$1.00.

# GROW A VARIETY of *Health Giving* FOODS

## WINTER SQUASH

Winter Squash, particularly yellow fleshed varieties, is an excellent source of Vitamin A. Squash is also easily kept in dry storage. A family should have 50 pounds a year. We recommend 1 oz. of Summer Squash and 2 oz. of winter varieties. Plant in hills, summer types about 4 feet apart, winter about 8 feet apart.

**552 GOLDEN HUBBARD.** 100 days. Earlier than improved Hubbard. Fruits 8 to 10 pounds with a hard warty orange skin. Thick, yellow, fine grained, dry flesh; excellent quality for canning and freezing. A good keeper. Postpaid: Pkt. 5c; oz. 25c; ¼ lb. 70c; ½ lb. \$1.35; 1 lb. \$2.40.

**554 IMPROVED HUBBARD.** 100 days. Standard winter variety for home and market gardens. The best shipper. Our strain is very early. Dark Bronze-green, rind hard and tough, slightly warted.

Improved Hubbard Squash

Fruits weigh about 12 pounds, flesh very thick; orange-yellow, fine grained, sweet and dry. Postpaid: Pkt. 5c; oz. 25c; ¼ lb. 70c; ½ lb. \$1.35; 1 lb. \$2.40.

**558 BUTTERNUT.** 100 days. An ideal home garden baking type, of highest quality. Flesh dry, light yellow with nutty flavor. Postpaid: Pkt. 5c; oz. 20c; ¼ lb. 55c.

**556 BUTTER CUP.** 100 days. A new introduction just the right size for baking. Grows exceptionally well in the Great Plains region. Of excellent quality, flavor is similar to sweet potatoes. Flesh dry, deep rich orange, texture and keeping qualities the best. Postpaid: Pkt. 5c; oz. 20c; ¼ lb. 55c; ½ lb. 90c; 1 lb. \$1.75.

**557 TABLE QUEEN OR DES MOINES.** 58 days. Individual size squash. Desirable for home or market garden; also a good shipper. Fruits acorn-shaped, smooth, thin shelled, dark green. Six inches long, 3 inches diameter. Flesh light yellow, with sweet flavor. Makes splendid pies, bakes well. Postpaid: Pkt. 5c; oz. 20c; ¼ lb. 55c; ½ lb. 90c; 1 lb. \$1.75.

## DELICIOUS SUMMER SQUASH

**561 MAMMOTH WHITE BUSH SCALLOP.** 56 days. A favorite with all our trade. An early maturing round flat squash, largest of the summer varieties. Fruit is clear white, and excellent for stewing. Postpaid: Pkt. 5c; oz. 20c; ¼ lb. 55c; ½ lb. 90c; 1 lb. \$1.75.

**553 GIANT GOLDEN STRAIGHTNECK.** 55 days. A new variety selected from the crookneck. The straight neck permits easy packing and handling. Fruits 18 to 20 inches long, heavily warted, deep orange color. Thick and meaty flesh. Postpaid: Pkt. 5c; oz. 20c; ¼ lb. 55c; ½ lb. 90c; 1 lb. \$1.75.

**560 CASERTA.** 50 days. All American Selections Gold Medal Winner. Earliest of all squash. Fruits 15 to 18 inches long, 4 to 5 inches wide. Attractive color, excellent flavor. Postpaid: Pkt. 10c; oz. 30c; ¼ lb. 90c.

Golden Straightneck

**551 BLACK ZUCCHINI.** 60 days. Fruits very nearly cylindrical, straight, smooth, dark green-black. Flesh greenish white at eating stage, very good flavor. Postpaid: Pkt. 5c; oz. 20c; ¼ lb. 55c; ½ lb. 90c; 1 lb. \$1.75.

## SALSIFY

**571 MAMMOTH SANDWICH ISLAND.** Vegetable Oyster. An improved variety with roots 6 to 8 inches long, thick, tapering, smooth. Decided oyster-like flavor. Fine for soups, etc. Postpaid: Pkt. 10c; ½ oz. 20c; oz. 35c; ¼ lb. \$1.30; ½ lb. \$2.55; 1 lb. \$4.90.

## TOBACCO

Postpaid prices on each of the following four varieties: Pkt. 10c; oz. 65c; ¼ lb. \$2.15.

**726 CONNECTICUT SEED LEAF.**

**727 HAVANA.** An early variety used largely for cigar wrappers on account of thinness, and fine quality.

**728 WHITE BURLEY.** Very popular.

**729 JUDY'S PRIDE.** Broad attractive leaves. Easy to cure. Used for fillers and wrappers; smoking or chewing.

Vegetable Oyster Salsify

## SPINACH

**581 NEW ZEALAND.** 70 days. It thrives in hot, dry weather, and almost any soil. May be cut throughout the summer, but can not stand frost. Leaves small, broad and pointed, while plants are large and spreading. Postpaid: Pkt. 5c; oz. 15c; ¼ lb. 45c; ½ lb. 80c; 1 lb. \$1.50.

50

## HERBS

- 681 ANISE.** Annual. . . . . Pkt. 10c; Postpaid  
**682 BORAGE.** Annual. . . . . Pkt. 10c; Postpaid  
**683 CARAWAY.** Biennial. . . . . Pkt. 10c; Postpaid  
**685 DILL.** Annual. . . . . Pkt. 10c; oz. 15c; Postpaid  
**686 FLORENCE FENNEL.** Annual. . . . . Pkt. 10c; Postpaid  
**687 SAGE.** Perennial. . . . . Pkt. 10c; Postpaid  
**688 SWEET BASIL.** Annual. . . . . Pkt. 10c; Postpaid  
**693 SWEET MARJORAM.** Annual. . . . . Pkt. 10c; Postpaid  
**692 SUMMER SAVORY.** Annual. . . . . Pkt. 10c; Postpaid

## MISCELLANEOUS

**690 KALE, DWARF GREEN CURLED SCOTCH.** 55 days. A member of the cabbage family, used for greens. Leaves large and crimped. Postpaid: Pkt. 10c; oz. 15c; ¼ lb. 45c; ½ lb. 85c; 1 lb. \$1.60.

**695 KOHLRABI, WHITE VIENNA.** 62 days. Dwarf variety, excellent for home and market gardens. Bulbs 2 to 3 inches. Postpaid: Pkt. 10c; oz. 35c; ¼ lb. \$1.20; ½ lb. \$2.00.

**720 OKRA, LONG GREEN PODDED.** 55 days. Plants dwarf and very productive. Valuable for soups and stews. Postpaid: Pkt. 5c; oz. 10c; ¼ lb. 30c; ½ lb. 55c; 1 lb. \$1.00.

**721 OKRA, WHITE VELVET.** 60 days. Early, prolific, with creamy white pods. Meaty, tender, smooth, very attractive. Postpaid: Pkt. 5c; oz. 10c; ¼ lb. 30c; ½ lb. 55c; 1 lb. \$1.00.

**706 BROCCOLI, ITALIAN GREEN SPROUTING.** 70 days. Forms large head consisting of a cluster of small heads. Both heads and stems are cooked and served like cauliflower but is easier to raise and has more delicate flavor. Postpaid: Pkt. 10c; ½ oz. 20c; oz. 35c; ¼ lb. \$1.15; ½ lb. \$2.00; 1 lb. \$3.50.

**705 COLLARDS, GEORGIA.** 80 days. A good substitute for cabbage which succeeds on poor soil, grown especially in the South. Can be boiled like cabbage or used as cole slaw. Postpaid: Pkt. 5c; oz. 10c; ¼ lb. 25c; ½ lb. 45c; 1 lb. 75c.

**676 BRUSSELL SPROUTS, LONG ISLAND IMPROVED.** 90 days. One of the best varieties for home gardens. The plants are dwarf and compact about 20 inches tall, producing solid round cabbage like balls. Excellent for freezing. Postpaid: Pkt. 10c; oz. 50c.

**702 LEEK, LONDON FLAG.** 115 days. Stems become very long, thick, white and tender. Used in soups and stews for its onion like flavor. Postpaid: Pkt. 10c.

**495 PARSLEY, MOSS CURLED.** 70 days. Dark green finely cut and curled leaves. Very desirable for garnishing and decorating. Postpaid: Pkt. 10c; oz. 20c; ¼ lb. 50c.

## MAMMOTH SUNFLOWER

**MAMMOTH SUNFLOWER.** Has a high feeding value and is easily grown. ¼ lb. 15c; ½ lb. 25c; 1 lb. 40c.

## TAMPULA

**501** A delicious green vegetable the leaves of which are cooked, prepared and served like spinach. Postpaid: Pkt. 10c; oz. 70c.

## MUSTARD

**712 TENDERGREEN OR SPINACH MUSTARD.** 50 days. A quick growing variety that does not go to seed as soon as other varieties. Resistant to heat and drought. Distinctive superior flavor. Rich in vitamins and iron. Postpaid: Pkt. 5c; oz. 15c; ¼ lb. 30c; ½ lb. 50c; 1 lb. 80c.

**713 SOUTHERN GIANT CURLED.** 65 days. The most popular and best known mustard for greens. Leaves long, wide, light green, heavily crumpled and curled at the edges. Best known in the South. Postpaid: Pkt. 5c; oz. 15c; ¼ lb. 30c; ½ lb. 50c; 1 lb. 80c.

**711 FLORIDA BROAD LEAF.** 55 days. A large upright plant with unusually large, thick, bright green, smooth leaves. A popular variety. Postpaid: Pkt. 5c; oz. 15c; ¼ lb. 30c; ½ lb. 50c; 1 lb. 80c.

Southern Giant

Broad Leaf

Tendergreen

## SPINACH

Bloomsdale Savoy Spinach

**585 NOBLE GIANT.** 45 days. Easy to wash. Leaves medium thick, green, very large, broad and smooth, with slight crumpling. Very good quality. The best of the large smooth leaved type. A long standing variety. Postpaid: Pkt. 5c; oz. 10c; ¼ lb. 30c; ½ lb. 50c; 1 lb. 85c.

**583 BLOOMSDALE SAVOY.** 40 days. An early variety. Popular for local and long distance markets, for canning, and home use. A long keeper after cutting. Leaves medium size, crumpled, glossy dark green. Postpaid: Pkt. 5c; oz. 10c; ¼ lb. 30c; ½ lb. 50c; 1 lb. 85c.

**582 LONG STANDING.** 45 days. A quick growing, long bearing variety for mid-summer use. Plants grow low and spreading, with pointed dark green leaves. Postpaid: Pkt. 5c; oz. 10c; ¼ lb. 30c; ½ lb. 50c; 1 lb. 85c. (See opposite lower corner for New Zealand Spinach.)

# Berry's

# LAWN

# Seed

## SEEDING THE LAWN

Remember that a lawn properly planned and planted is cheaper than a "scatter seed and rake it in lawn." Berry's Supreme Lawn Mixture is unsurpassed for normal seedings such as sunny to semi-shaded areas. For shady areas use Berry's Shady Lawn Mixture.

The best time to sow the lawn is in early spring. However, beautiful lawns can be obtained from early fall seedings. If the seed is to be sown by hand it should be divided into two equal amounts. Sow one part East to West about six feet in width, and the second part North to South covering the same distance. This method assures equal distribution of seed and prevents patchy uneven lawns. After seeding the lawn, rake it lightly and roll with a light roller. Keep the entire area moist for about twelve to fifteen days.

1 lb. sows 200 square feet 10x20  
5 lbs. sows 1000 square feet 20x50

## BERRY'S SUPREME LAWN SEED

This makes a fine smooth lawn in the northern half of the United States. Contains chiefly Blue Grass, Red Top, White Dutch Clover and Rye Grasses. The quicker growing grasses provide a nice green stand while the slower kinds are coming on. It is our most popular mixture, because it gives such wonderful satisfaction. Postpaid Price: 1 lb. 75c; 3 lbs. \$2.65; 5 lbs. \$4.15; 10 lbs. \$7.95.

## SHUR-GROW GRASS MIXTURE

Though less expensive than our Supreme Lawn Seed, this mixture gives very good results. It will produce a quick cover of green grasses. This mixture contains some White Dutch Clover. High germinating and free from chaff. Postpaid: 1 lb. 75c; 3 lbs. \$2.10; 5 lbs. \$3.25; 10 lbs. \$5.95.

There is nothing that will enhance the attractiveness, and add to the value of a home more than a well planned and well kept lawn.

## BERRY'S SYLVAN FOR SHADY AREAS

This contains grasses naturally adapted to growing in shade, such as Chewings Fescue and Poa Trivialis. Fine for grounds shaded by trees or buildings. In heavy shade a light application of lime in addition to fertilizer will improve results. This is a dandy mixture. Postpaid: 1 lb. \$1.00; 3 lbs. \$2.70; 5 lbs. \$4.25; 10 lbs. \$8.00.

## WHITE DUTCH LAWN CLOVER

The small white clover so popular for lawns. This may be mixed with any lawn grass you have on hand or sown on an old lawn in the early spring. Very drought resistant. Helps soil fertility. Seed is very small. A pound sows 1,000 or more square feet, depending on how heavy percentage of clover is desired. Postpaid: 1 lb. \$1.60; 3 lbs. \$4.35; 5 lbs. \$6.75; 10 lbs. \$13.00.

## EXTRA FANCY KENTUCKY BLUE GRASS See also page 18

Most satisfactory all purpose lawn grass for the U. S. from Nebraska and Kansas east to coast and from Canada south to Tennessee. Stands drought. Makes excellent turf. Grows from early spring to late fall. Postpaid: 1 lb. \$1.00; 3 lbs. \$2.70; 5 lbs. \$4.25; 10 lbs. \$7.75.

### OTHER GRASSES FOR LAWN

**CHEWINGS FESCUE.** Does well on any kind of soil. Produces a fine firm matted turf. Plant spreads by a development of new shoots and a single plant often covers an area several feet in diameter. Sow 1 lb. to 200 square feet. Postpaid: 1 lb. \$1.35; 3 lbs. \$3.70; 5 lbs. \$5.50.

**CREeping RED FESCUE.** Fine round bladed grass, and has a deep green color. This grass thrives on all types of soil. It maintains its color the year round and is excellent for shady places. Can withstand wear and will not winter kill. Ideal for lawns and playgrounds. Very hardy, slightly red at the base. Sow 1 lb. to 150 square feet. Postpaid: 1 lb. \$1.40; 3 lbs. \$3.75; 5 lbs. \$5.75.

**ILLAHEE FESCUE.** A new strain of creeping red, spreading from the roots, creeping under the ground. The texture is fine and the color delightful green. This strain is desirable for areas subject to heavy wear. Should be sown with a nurse crop. Postpaid: 1 lb. \$1.35; 3 lbs. \$3.70; 5 lbs. \$5.50.

**COLONIAL BENT.** A popular grass for golf courses. Also used as a lawn grass. Makes a beautiful lawn. Rain will not wash ditches in your terrace, or your sidewalk will not be covered with dirt if you use bent grass. Sow 1 lb. to 200 square feet. Postpaid: 1 lb. \$1.35; 3 lbs. \$3.90; 5 lbs. \$6.25.

**RED TOP.** A fine blade grass that succeeds on most any soil. Does best under moist conditions. Used in almost all lawn mixtures. Sow 1 lb. to 200 square feet. Postpaid: 1 lb. 75c; 3 lbs. \$1.80; 5 lbs. \$2.75.

**RYE GRASS.** Provides green growth while other grasses are getting started. Used in most lawn mixtures as a nurse crop and thrives well in most any soil. Sow 1 lb. to 200 square feet. Postpaid: 1 lb. 35c; 3 lbs. 90c; 5 lbs. \$1.25.

**BERMUDA GRASS.** Most valuable grass for the South. Will withstand drought and the hot summer heat. Makes a beautiful lawn and gives quick results. Unhulled only. Sow 1 lb. to 500 square feet. Postpaid: 1 lb. 65c; 3 lbs. \$1.75; 5 lbs. \$2.50.

## SPRAY FOR BETTER CROPS

### HUDSON CLIMAX

High pressure and ample capacity adapt it to all classes of spray work. Can be used with any agricultural insecticide, whitewash, etc. Embodies strength, safety, ease of operation. Galvanized tank capacity 3½ gallon. Open top. Automatic shut-off valve, 2 foot extension rod. Weight 10 lbs. Each \$9.80 Postpaid.

SEE PAGES  
40 & 52  
FOR DUSTS  
AND SPRAYS

### WEEDONE CRAB GRASS KILLER

Non-poisonous to humans or animals. A new herbicide for eliminating crab grass and mouse-ear chickweed from lawns without killing clover, bluegrass, fescue or other deep-rooted perennial grasses. Easy to use. Can be applied with regular garden sprayer, Weedone Sprayer or sprinkling can. Very soluble in water and easily washed from the sprayer.

5 oz. can. Will cover 1000 sq. ft. \$1.00 Postpaid.  
20 oz. can. Will cover 4000 sq. ft. \$3.00 Postpaid.

**HUDSON MERCURY.** Adapted for any spray from fog to solid stream. Handle securely reinforced. Can not pull off or work loose. Tank: 4½ inches diameter, 4½ inches long. Capacity one full quart. Lock seamed and soldered throughout. Large filler can. Each \$1.25 Postpaid.

**HUDSON SIGNAL.** The Hudson Signal is a favorite for use about the home in war on roaches, ants, waterbugs, and other crawling insects. Handles all insecticides in powder form efficiently. Each 60c Postpaid.

**HUDSON FOG.** Hudson Fog is the recognized sprayer for all household use. Big new action pump and full pint container makes it a real value. Each 60c Postpaid.

**HUDSON ADMIRAL.** Duster will efficiently apply any powder-insecticide. Volume of discharge ranges from a very fine to a heavy cloud. 2½x6 inches. Large filler screw cap permits easy filling, emptying or cleaning. 24 inch extension tube with nozzle instantly adjustable for straight or angle discharge. Each \$1.55 Postpaid.

# PLANTS For Early VEGETABLES

Our plants are fresh pulled and shipped the same day by our southern grower. They will produce a better crop.

## BERRY'S ONION PLANTS

Southern grown onion plants will grow large sweet onions early and are good keepers. Ready for delivery October 1st to June 1st. 100 plants to bundle.

**YELLOW BERMUDA.** 88 days. Flat shaped and sweet.

**CRYSTAL WHITE WAX.** 93 days. White and waxy.

**YELLOW SWEET SPANISH.** 98 days. Very large, mild.

**WHITE SWEET SPANISH.** 110 days. Mild flavor.

Postpaid: 200 for 74c; 300 for \$1.00; 500 for \$1.40; 1000 for \$2.65; 2000 for \$4.65.

Express Collect F.O.B. Southern Grower: 6000 plants, weight 35 lbs. for \$6.98 100 of a variety minimum.

## PEPPER PLANTS

Our plants are field grown. Ready April, May, June. Pepper plants are easy to grow and produce big crops until heavy frost.

**CALIFORNIA WONDER.** Sweet, 75 days, from plants. The outstanding variety for market gardeners and shipping.

**RUBY KING.** 70 days from plants. An outstanding sweet pepper excellent for stuffing and salads.

Postpaid: 25 for 52c; 50 for 90c; 100 for \$1.50; 200 for \$2.49; 500 for \$4.59; 1000 for \$5.69.

Express Collect F.O.B. Southern Grower: 2000 plants, weight 20 lbs. for \$7.98 25 of a variety minimum.

We cannot ship plants to California

If you do not specify the date

you want your plants shipped, we will ship at the proper plant-

ing time for your territory. Plants are guaranteed to arrive in perfect condition for transplanting or we will replace plants or refund your money. Days listed after each variety indicates the time it takes for your plants to produce a crop.

Plants often bleach to a yellowish-green or wilt when shipped. This does not hurt the plants and they will resume their natural green soon after transplanting. Complete planting instructions sent with your order.

## CERTIFIED TOMATO PLANTS

They have proved to be the most satisfactory for large canning factory and home gardeners. Ready April, May, June.

6000 plants, weight 84 lbs. for \$19.95

## DUST VEGETABLES For Biggest Yields

### SPERGON Seed Protectant

A powder to be applied to seed before planting to prevent seed decay and "Damping-off," particularly in cold wet weather. Recommended for Peas, Beans, Lima Beans, Corn and other seeds, it is easy to apply to the seed and noninjurious to the user. **NONTOXIC.** Postpaid: 1 oz. envelope 25c; 5 oz. container \$1.00; 1 lb. container \$2.25.

\$1.00 SPECIAL!

A 2½ lb. carton of this famous Bug-Dust-O-Cide together with a duster. Full directions given. Ideal for the average gardener. Price is postpaid. If you do not have dusting equipment be sure to try this \$1.00 special.

### Berry's "BUG DUST"

Kills Bugs and Insects

This is a powerful combination of Rotenone Lethane Cuproicide and Nicotine. It has a triple action on insects, as a stomach poison, a contact poison, and as a repellent. It is non-poisonous to humans and domestic animals.

Berry's Bug Dust controls aphids, bean beetles, flea beetles, leaf hoppers, cabbage worms, cucumber beetles, potato beetles and certain other insects. 1 lb. Bag postpaid 35c; 3 lb. Bag postpaid \$1.00; 5 lb. Bag postpaid \$1.60.

## Set Plants Out Earlier

with **HOT CAPS**

Glastex Translucent paper enables healthful warmth and light of the sun to penetrate, fends off excessive heat. It sheds water, doesn't get "soggy." Protects against too much moisture, and dry weather. Hotcaps can be ventilated to provide air. Rain, hail, sleet, and sand storms won't bash them down. And they're streamlined to offer least resistance to wind. Flange holds them secure.

You can use hotcaps with nearly any crop that needs protection, any crop you want to get to market earlier. Experience has indicated hotcaps are especially suited to growing requirements of: Tomatoes, Cabbages, Cucumbers, Strawberries, Lima Beans, Pumpkin, Peppers, Melons, Watermelons, Egg Plant, etc.

25 Pkg. Complete 85c Postpaid  
100 Pkg. Complete \$3.00 Postpaid  
250 Pkg. Complete \$5.65 Postpaid

NOT PREPAID

1000 Pkg. Complete \$17.35

### "KALITE" Bug Duster

A Rotenone impregnated dust. Gives 4-way action. Kills chewing and sucking insects by contact, as a stomach poison, by leg paralysis and repels other insects that might attack plants.

The economical package illustrated makes possible a very low price. Contains one pound. Cost only 40c postpaid.

1394 **ZINNIA.** Lilliput Mixed. (A) A dwarf type of zinnia just like dahlia zinnias, with the same range of colors and shape of flowers. Pkt. 10c.

# It's Easy To Plan YOUR FLOWER GARDEN

## PLANT PERENNIALS TOO

In addition to the beauty you can get from flower seed you should set out some perennial plants as described and priced on page 55. You can transform your yard into a place of great beauty with a variety of flowers. The cost is not high and the enjoyment these flowers bring can hardly be measured in dollars.

Perennial flowers are the easiest to grow. They are hardy and live for years. We ship you the plants in good growing condition. They will usually bloom the first season if they are planted early. Then next year they will start early in the spring and give you a world of beauty. Just keep them clean of weeds.

Bulbs too are easy to grow. Some like Peonies, will last for years without replanting. Others like Gladiolus, Cannas, etc. have to be taken up in the fall and replanted next spring. That makes a little extra work but they never disappoint you in returning much beauty for little effort.

Antirrhinum

Zinnia

## ROCK GARDENS

### Borders and Edges

We have carefully selected a group of annuals and perennials best suited for planting rock gardens, borders, and edgings. These plants range in height from 2 inches to one foot. These smaller plants take much less garden space than other varieties.

**1514 PERENNIALS FOR ROCK GARDENS.** A mixture of low growing plants that will start early and bloom throughout the growing season. They grow from the old roots each spring, save replanting every year. Pkt. 15c.

**1320 ANNUALS FOR ROCK GARDENS.** A carefully prepared mixture of low growing, many colored, free flowering annuals which will supply color in your rock garden all summer. Pkt. 10c.

**1110 AGERATUM, BLUE BEDDING.** (A) Blooms profusely. Splendid for pot culture, rock gardens, and bedding. Pkt. 10c.

**1112 ALYSSUM, VIOLET QUEEN.** (A) A beautiful shade of violet. Does not fade in hot weather. Pkt. 10c.

**1111 ALYSSUM, BASKET OF GOLD.** (P) Produces a mass of golden yellow flowers very early. Pkt. 10c.

**1115 ALYSSUM, CARPET OF SNOW.** (P) Pkt. 10c.

**1116 CANDY TUFT IBERIS,** Gibraltar, White Flushed Lilac, Early. (P) Pkt. 10c.

**1295 MARIGOLD, MINIATURE MIXED.** (A) 9". A delightful mixture. Pkt. 10c.

**1327 PANSY, TRIMARDEAU MIXED.** (A) Beautiful range of colors. Pkt. 15c.

**1328 PANSY, SWISS GIANTS.** (A) This mixture many charming colors. Pkt. 25c.

**1316 PHLOX (Drummondii)** Mixed. (A) 1 ft. large early blooming. Will last until frost. Pkt. 10c.

**1315 PHLOX, GIGANTEA RED GLORY.** (A) Brilliant Red with a creamy white eye. Pkt. 10c.

**1310 PORTULACA (Moss Rose).** (A) Single. Dainty little flowers which thrive on poor soil, bloom even in hottest weather. Pkt. 10c.

**1311 PORTULACA (Moss Rose).** (A)

Phlox

Double. Grow like single, but have double flowers. Pkt. 15c.

**1341 SALVIA, SPLENDENS.** (A) One of the most stunning and brilliantly colored of all garden flowers. Pkt. 15c.

**1370 SWEET WILLIAM.** Single. (P) Mixed. 1 ft. Excellent for borders. Pkt. 10c.

**1380 VERBENA, Mixed.** (A) Will thrive anywhere. Many glorious colors in our mixture. Pkt. 10c.

### PETUNIA HYBRID (HA) 18 Inches

**1317 Gen Dodds, Blood Red.** (A) Pkt. 10c.

**1318 Howards Starr, Purple, White Star.** (A) Pkt. 10c.

**1322 Blue Bee, Blue.** (A) Pkt. 10c.

**1321 Mixed, Many Varieties, All Colors.** (A) Pkt. 10c.

### PETUNIA NANA COMPACTA (HA) 12 Inches

Catalog Value 35c—Price 25c, Postpaid.

Alyssum

## VINES and CLIMBERS

**1256 ORNAMENTAL GOURDS, MIXED.** A mixture of many odd shapes and colors. The vines will grow on a fence or trellis. Pkt. 10c; oz. 15c.

**1437 BEAN, SCARLET RUNNER.** (A) 10 ft. Brilliant sprays of scarlet peashaped blossoms. The beans can be used for food. Pkt. 10c.

**1415 CARDINAL CLIMBER.** (A) 25 ft. Attractive fern-like leaves. Cardinal-red flowers borne in clusters from mid-summer to frost. Pkt. 10c.

**1430 CYPRESS VINE.** (A) 10 ft. Star shaped white and scarlet blossoms. Beautiful feathery foliage. Pkt. 10c.

## MORNING GLORY DARLING

It is the most colorful of all Morning Glories. The flowers are large, up to four inches in diameter, of a brilliant rose-cerise in startling bicolor contrast to a throat that is just as white as snow. The entire flower is lit up, aglow. Darling has proven to be a good climber. In this regard it is in a class with Heavenly Blue. No. 1451—Pkt. 15c.

**1459 MORNING GLORY, GIANT CORNELL.** (A) Carnelian red with snow white border. Grows rapid and flowers come early. Pkt. 10c.

**1458 MORNING GLORY, SCARLET O'HARA.** (A) Red. As large and beautiful flowers as Heavenly Blue. Easy to grow. Pkt. 10c.

**1456 MORNING GLORY, HEAVENLY BLUE.** (A) Early blooming, vigorous. One of our most beautiful and popular flowers. Easy to grow. Exquisite blue color. Pkt. 10c.

**1335 PEAS, EVERLASTING.** (P) Sometimes called perennial sweet peas. Not fragrant. Pkt. 10c.

**1163 CACTUS MIXED.** These interesting desert plants assume a great variety of characteristic forms, spiny and leafless. Pkt. 10c, postpaid.

## For Backgrounds and Tall Border

This group of plants has been selected for hardiness, and easy culture. Most of these varieties will do well on most soils, and under a wide range of climatic conditions.

**1154 AQUILEGIA.** (A) Long Spurred Mixed. Flowers of enormous size. Brilliant colors. For shade. Pkt. 15c.

**1264 HOLLYHOCK.** (A) Indian Spring. Free blooming, semi-double, rose and pink shades. Pkt. 15c.

**1125 BALSAM (Lady Slipper).** (A) A double flowered tall variety with large showy flowers in crimson, rose, scarlet and white. Pkt. 10c.

**1172 CASTOR BEANS MIXED.** (A) Beautiful ornamental foliage adapted for border backgrounds and screen plantings. Tall and easy to grow. Pkt. 10c.

**1188 CHINESE WOOLFLOWER.** (A) Large globular woolly flower heads of bright red. Plants grow 2 to 3 feet; bloom continuously. Pkt. 10c.

**1203 COSMOS, RADIANCE.** (A) Deep rose petals overlaid with rich crimson rose. Pkt. 10c.

**1118 CUP AND SAUCER (Campanula).** (P) Grows about 2 feet tall. Flowers bell shaped. Pkt. 10c.

**1178 CENTAURY, DUSTY MILLER.** (P) Silvery foliage plant used for background plantings. Pkt. 10c.

**1230 FOUR O'CLOCKS.** (A) This old-fashioned flower bears profusely flowers of white, yellow, crimson and pink. Use it for hedges, for foundation plantings, and large beds for public places. Pkt. 10c.

**1270 JOBS TEARS.** (A) Curious ornamental grass, cornlike leaves. Seed used for beads. Pkt. 10c.

**1120 AMARANTHUS, JOSEPH COAT.** (A) Mottled leaves of red, yellow and green. A beautiful foliage plant. Easy to grow. Pkt. 10c.

Ruffled Petunia

Pansy

**Annuals for Window or Porch Box**  
Large Mixed Packet 15c

A charming selection of quick growing annuals which make a bright spot and interesting display.

**STRAWBERRY SEED**  
**NEW BARON VON SOLEMACHER,** new selected strain bearing edible red fruit as large as ordinary commercial varieties, with a wonderful flavor. Plants bush form, no runners. If planted early will bear in August and on until frost. Pro-lific cropper.  
No. 1443—Pkt. 15c.

# Berry's QUALITY NURSERY STOCK is Guaranteed

**All NURSERY PRICES ARE PREPAID Save an Extra 20%**

Berry's guaranteed nursery stock is grown by experts, wherever possible in northern sections for extra-hardiness. Transplanted, pruned and root pruned, to insure sturdy, well rooted, well branched plants that will thrive anywhere. Do not be misled by claims of superior quality—we offer high quality at very low prices.

If you can not plant your stock when you receive it, dig a shallow trench or hole, lay the plants in this, covering the roots with earth. When planting be sure the holes are plenty large to allow full spread of the roots. Sprinkle fine top soil around the roots, water thoroughly, then rake some dry soil over the top. Keep moist but not water-logged until growing.

Berry's send you complete instructions for planting your nursery stock. These are included in the package. Read them carefully and you will succeed.

**LIBERAL GUARANTEE**  
Berry's guarantee their nursery stock to be exactly as represented and to be delivered to you in good planting condition. If not, we will replace it free of charge but you must notify us within 45 days after you receive it.  
If any nursery stock is proven not true to name, we will, upon proper proof, replace all such stock or refund the exact amount paid, but, in no case, shall we be liable for any sum greater than the amount originally received for said nursery stock.  
If any Berry's nursery stock fails to grow with proper care, we will replace it at half price, if you notify us within 90 days after you receive it.

# VINES for PORCHES, ARBORS, and TRELLIS

## VIGOROUS GROWING 2 YEAR OLD PLANTS

**No. 5532—SILVER LACE VINE.** The fastest growing, most beautiful hardy vine. Often grows 20 ft. per year. Glossy green foliage covered with snowy white flowers. Each 79c; 3 for \$2.20.

**No. 5525—HONEYSUCKLE, GOLD FLAME.** New, everblooming honeysuckle. Masses of deep scarlet trumpets lined with gold from early summer until frost. Attractive blue green foliage. Plants are vigorous, hardy and disease resistant. Each 98c; 3 for \$2.75.

**No. 5542—WISTERIA, PURPLE.** The most magnificent of all vines—lasting for generations and increasing in beauty each year. Long clusters of lilac flowers in summer. Requires some protection in severe climates. Each 55c; 3 for \$1.50.

**No. 5538—BOSTON IVY.** Best clinging vine for brick, stone, cement or stucco. Each 75c; 3 for \$2.10.

**No. 5537—ORIENTAL BITTERSWEET.** Better than the American because it produces many more lovely red berries for winter bouquets. A sex plant that requires cross-pollination—always plant from 4 to 6 nearby. Each 50c; 3 for \$1.35.

**No. 5539—HONEYSUCKLE, HALL'S.** A very hardy, rapid growing vine covered with creamy white flowers in season. Fine for porch, arbor or fence. Best vine for ground cover in shady places, on steep banks or terraces. Each 50c; 3 for \$1.35.

## LARGE FLOWERING CLEMATIS.

Beautiful perennial vines with masses of large, rich colored blooms. Considered the most beautiful vine for trellis. Requires protection in severe climates.

**No. 2610—CLEMATIS JACKMANI—Purple**

**No. 2612—CLEMATIS M. E. ANDRE—Wine Red**

**No. 2611—CLEMATIS RAMONA—Lavender Blue**

Prices for above Clematis 95c each; 3 for \$2.75.

**No. 2616—COLLECTION OF 1 EACH OF ABOVE**

3 for \$2.65 Postpaid

The cost is reasonable and when you consider the many years of enjoyment they can give, they are surely economical.

**Berry's Guarantee Satisfaction at Money Saving Prepaid Prices**

No. 5305—**ALTHEA, RED, ROSE OF SHARON.** (8 to 10 ft.) Has double rose-like flowers in Fall when most shrubs are gone. 2/3 ft. size only.

No. 5306—**ALTHEA, PINK ROSE OF SHARON.** (8 to 10 ft.) Beautiful pink double rose-like flowers in Fall. 2/3 ft. size only.

No. 5312—**CORAL BARK DOGWOOD (RED).** (8 to 10 ft.) Hardy anywhere. Spreading habit. Brilliant red in winter.

No. 5313—**FORSYTHIA, GOLDEN BELL.** (6 to 8 ft.) A very hardy upright grower with brilliant yellow flowers before the leaves.

No. 5315—**HONEYSUCKLE BUSH RED.** (10 to 12 ft.) Beautiful brilliant rose-red fragrant blossoms. Foliage deep green. Red Berries in Fall. Excellent for foundations if pruned severely.

No. 5319—**LILAC, PURPLE.** (8 to 10 ft.) Fragrant, deep reddish purple flowers. Strong, upright grower. Fine for general home planting. Easy to grow. Will stand severe pruning.

No. 5321—**MOCK ORANGE—CORONARIUS.** (6 to 8 ft.) Old favorite shrub covered with single, fragrant white flowers in late spring.

No. 5322—**QUINCE, RED FLOWERING.** (3 to 4 ft.) Brilliant orange scarlet blooms with first leaves, glossy dark green foliage. Hardy, spreading. Fine for foundations.

No. 5324—**TAMARIX, SILVER FOLIAGE.** Graceful arching branches. Dainty pink flowers on rich silvery green foliage.

No. 5325—**WEIGELA, ROSEA, PINK.** (5 to 7 ft.) Hardy upright grower. Lovely pink bell-shaped flowers in May and June.

No. 5410—**PUSSY WILLOW.** (10 to 12 ft.) Large, beautiful silver-pink pussykins appear early in Spring before the leaves. Can be cut in February for forcing indoors. 2/3 ft. size only.

No. 5330—**DEUTZIA LEMOINE.** (5 ft.) Large white showy flowers in May. A good semi-dwarf shrub for specimen or foundation plantings. Available in 18/24 in. size only.

No. 5468—**BUTTERFLY BUSH, ROYAL RED.** (4 to 5 ft.) A brilliant purplish-red. The nearest true red Butterfly Bush. Beautiful, large spikes on long stems. Excellent for bouquets, compact, well rounded bush. 18 to 24 inch size only.

**CRAPE MYRTLE**—Blossoms in late summer and fall. 5 ft. Large clusters of colorful blooms. Attractive foliage. Requires protection in severe climates, but comes up from roots if top branches are frozen. 18 to 24 inch size only.

No. 5472—Purple

No. 5473—Red

No. 5474—Pink

No. 5479—Collection of above, 3 for \$1.45.

## EXTRA SPECIAL SHRUBS

Prepaid Prices	Each	3
Medium Grade 18/24"	\$0.90	\$2.50
Large Grade 2/3'	1.10	3.00

No. 5404—**ALMOND, DOUBLE PINK FLOWERING.** (4 ft.) In early spring a mass of flowers. The beauty spot in any garden. One of the most prolific bloomers of all shrubs, bearing small pink flowers.

No. 5432—**HYDRANGEA A.G., HILLS OF SNOW.** Best shrub for shade, thrives anywhere. Masses of large round white bloom in early summer. Very good!

No. 5433—**HYDRANGEA, PEE GEE.** Magnificent large conical shaped white bloom in summer, with pinkish cast in fall. Thrives anywhere, very popular.

No. 5450—**SNOWBALL, OLD FASHIONED.** (6 to 10 ft.) Another old favorite that thrives anywhere. Loaded with pure white flower balls in early summer.

No. 5455—**FRENCH LILAC, CHARLES JOLY.** (8 to 10 ft.) Large, double, deep burgundy purple blooms. A hardy, upright grower of medium size and height. Usually blooms in second season. One of the best of the double French Lilacs. 18 to 24 inch size only.

No. 5477—**MOCK ORANGE, SYRINGA VIRGINAL.** (4 to 6 ft.) Unusually large, double, very fragrant white flowers in June and all summer.

### HANSON BUSH CHERRY

Bears fruit in one year. Dwarf grower. Absolutely hardy.

A dwarf growing, highly ornamental, hardy shrub. It is used widely for making jams and jellies. Fruit is good to eat and it will bear by second year. For a low bushy fruiting hedge plant 18 to 24 inches apart. In the garden or orchard plant 3 ft. apart. Try it this year at Berry's low prices.

No. 6852—18 to 24 inch size.  
45c each; 3 for \$1.20 postpaid

**BERRY Catalog Pictures Are Not Expensive, but Quality Is Tops and Prices Lower**

ALL ITEMS ON THIS PAGE CAN BE ORDERED EITHER IN SPRING OR FALL

No. 5383—**DOUBLE FLOWERING KERRIA.** Grows 4 to 6 ft. tall. Blooms in spring. Slender branches are covered with beautiful deep yellow blossoms resembling small roses. Branches stay green in winter and are very attractive when foliage drops. 12 to 18 inch size. Each \$1.25; 3 for \$3.60.

No. 5431—**BLUE HYDRANGEA.** Large compact flowers of intense azure blue. Most unusual of any shrub. To be sure of getting the blue color we include a package of special material plus directions on mixing with soil. Field grown plants. Each \$1.35; 3 for \$3.75.

### ROSEZALEAS

Grows to 10 feet tall. A solid mass of color in the spring. Every branch covered with hundreds of one inch blossoms, as fragrant as a Rose, as beautiful as an Azalea. Makes a handsome compact, upright shrub, with rich green foliage. So thickly covered at blooming time that all you can see are the blossoms. In the fall, the branches are laden with bright little red apples. You'll get pecks of these firm, tart, crisp, edible fruits that are fine for jelly. Extra hardy and easy to grow. Thrives in almost any soil or climate. 3 to 4 ft. size only.

No. 5430—Pink  
Postpaid \$1.25 each; 3 for \$3.60

No. 5426—Red

No. 5429—Collection of 2,  
1 each of above for \$2.25

## Beautiful Easy-to-Grow Spirea

Note: America's most popular family of Shrubs! Spireas succeed anywhere, are absolutely hardy, drought resistant and bloom freely, even under adverse conditions.

No. 5436—**ANTHONY WATERER.** Dwarf. 2 to 3 ft. Bright red flowers all summer. Very useful dwarf. 15 to 18 inch size. Each 70c; 3 for \$1.95. Postpaid.

No. 5438—**BILLARDI.** 4 to 6 ft. One of the better flowering shrubs. Countless spikes of pink flowers all summer. 2/3 ft. size. 65c each; 3 for \$1.90. Postpaid.

No. 5444—**BRIDAL WREATH (V.H.).** Grows to 6 foot. Our best seller. Graceful, arching branches loaded with dainty white flowers. The old favorite of all the Spireas. Requires little care. Lovely in mixed shrubs, foundation plantings, or for screens and hedges. Very hardy.

# Fast Growing HEDGES

For Beauty  
and Protection

## Trimmed and Natural LOW HEDGES

New **LOW**  
PREPAID PRICES  
Save You **20%**  
ON YOUR COST

## TALL HEDGES

FOR SCREENS OR  
WIND BREAKS

**IMPORTANT:** Your hedge will never be tight, close to the ground unless you prune it severely immediately after planting. Always prune off at least 1/2 of the top branches. Smaller sizes should be left only about 4 to 6 inches taller than ground—larger sizes about 10 to 12 inches.

**No. 5503—PRIVET, CALIFORNIA.** Has shiny green foliage. Fine for formal hedges, upright, quick growing and easily sheared to any height. Not as hardy as Amoor River Privet in Northern States.

	10 for	25 for	50 for
18 to 24 in. ....	\$1.90	\$4.00	\$7.50
12 to 18 in. ....	1.25	2.50	4.65

**No. 5506—PRIVET, AMOOR RIVER NORTH.** Most popular hedge plant—Hardy Russian Privet. Dense, glossy green foliage on numerous upstanding branches. Can be kept pruned down to a thick Hedge only 2 feet high or will grow over 4 feet if not pruned.

	10 for	25 for	50 for
18 to 24 in. ....	\$2.25	\$4.75	\$9.00
12 to 18 in. ....	1.55	3.25	5.75

**No. 5505—BARBERRY—GREEN.** A very compact, dense growing thorny, protective Hedge. Can be kept pruned to 2 feet or allowed to grow to 4 feet. In Fall, the leaves turn red and bright red berries appear.

	10 for	25 for	50 for
18 to 24 in. ....	\$2.50	\$5.50	\$9.95
12 to 18 in. ....	1.90	4.00	7.50

**No. 5502—BARBERRY—RED.** Like green but with brilliant red foliage when planted in full sun.

	5 for	10 for	25 for
15 to 18 in. ....	\$1.50	\$2.80	\$6.25
12 to 15 in. ....	1.30	2.40	5.00

**No. 5511—SPIREA V.H., BRIDAL WREATH.** One of the most beautiful Hedges—in the spring, its graceful arching branches are a mass of lovely white bloom. Very hardy—grows to 4 to 6 ft. high. Prune very severely when planted, but after the first year, prune out only the dead wood.

	10 for	25 for	50 for
18 to 24 in. ....	\$2.45	\$5.35	\$9.50
12 to 18 in. ....	1.95	4.15	7.75

**No. 5508—HONEYSUCKLE, BUSH.** (12 to 15 ft.) One of the most attractive of the taller hedges. Perfectly hardy, vigorous grower, beautiful flowers followed by bright red berries. The ideal screen. Plant 2 to 3 ft. apart.

	10 for	25 for	50 for
18 to 24 in. ....	\$2.45	\$5.35	\$9.50
12 to 18 in. ....	1.95	4.15	7.75

**No. 5608—RUSSIAN MULBERRY.** A very useful variety, for both hedge or screen. Quick growing and absolutely hardy. Can be kept pruned down to 4/5 ft. (when planted 15/18 inches apart), or allowed to grow to 12/16 ft. high (when planted 3/5 ft. apart).

	10 for	25 for	50 for
18 to 24 in. ....	\$ .90	\$1.70	\$3.00
12 to 18 in. ....	.65	1.30	2.25

**No. 5512—CHINESE ELM.** Another very useful, inexpensive variety. When planted 15 to 18 inches apart, it makes a good tight hedge, kept pruned down to 6 to 8 ft. high. For effective screen, plant it 3 to 5 ft. apart and it will grow 13 to 18 ft. tall.

	10 for	25 for	50 for
18 to 24 in. ....	\$ .80	\$1.45	\$2.65
12 to 18 in. ....	.60	1.15	2.00

## SHADE Trees

## SEEDLING TREES FOR WINDBREAKS

These are more rapid growing than Evergreens so should be used in combination with Evergreens as they are not nearly so permanent as Evergreens.

For just a few dollars you can now plant several hundred Tree Seedlings: to protect your home, farm buildings, and feed lots from sweeping winds in winter and summer. Nearly every farm has some waste land that will grow fence posts, wood to burn and also prevent soil erosion. A fine investment needed on every farm at such low cost.

Our tree seedlings are well rooted, hardy and vigorous. They are easy to start, planting instructions being furnished. We ship prepaid at proper planting time early in the Spring and guarantee satisfaction.

We suggest planting all sizes of tree seedlings in rows where it is convenient to cultivate them often the first two or three years—rows about 36 inches apart with the seedlings 12 to 24 inches apart in the row—they grow more bushy when planted 24 inches apart. After 2 years, when the trees are well rooted and about 5 feet tall, transplant into permanent location.

## LOW PREPAID PRICES ON SEEDLINGS

All items on this page can be shipped in Spring or Fall.

# Line EVERGREENS at LOW COST

## LARGE EVERGREENS FOR WINDBREAK

Our special value for this season. We make this offer only on the 4 varieties listed below. These twice transplanted evergreens are an ideal size for windbreak. Large, well branched, 1 foot trees. May be planted in their permanent location, 8 to 12 foot apart.

WHEN ORDERING IN QUANTITIES OVER 10 PLEASE GIVE US YOUR NEAREST EXPRESS STATION

**RED CEDAR**

**PONDEROSA PINE**

**SCOTCH PINE**

**NORWAY SPRUCE**

One of the oldest and best known evergreens. Very hardy. Dark green foliage. Can be trimmed to any shape.

A hardy long needed tree that will do well where many evergreens fail. Excellent for poor soil.

A very rapid grower under favorable conditions and will grow on rocky poor soils and dry conditions.

The aristocrat of evergreens. Popular for windbreak plantings. The most rapid grower of any spruce.

Red Cedar

Norway Spruce

## 1 Foot Size EVERGREENS

Big transplants to be set in permanent location as low as \$10 each. Fine for either landscaping or a windbreak planting.

## EVERGREENS for Lawn Planting

**POSTPAID: Your Choice** 1 of any variety \$1.35  
2 of any variety 2.40  
4 of any variety 4.10

**PFITZERS JUNIPER.** Exceptionally beautiful, graceful and hardy in shade or sun. Spreading branches 3 to 4 feet at maturity. 12 to 15 inch size.

**SAVIN JUNIPER.** An excellent creeping dwarf variety. The foliage is fine in texture. Average height of 2 foot with a spread of 6 to 8 foot when full grown. A very vigorous grower, forming a compact and perfect mat of bluish or gray-green. Grows very dense and never changes in color. Widely used for foreground and foundation planting. Very Hardy. 12 to 15 inch size.

**EUROPEAN LARCH.** The Larch never fails to attract attention with its beautiful new growth coming out in early Spring Again in the Autumn as its needles turn a golden color before falling, for this tree, unlike most of the conifers, is deciduous after the first year. 18 to 24 inch size.

**JUNIPERUS VIRGINIANA.** We are fortunate in being able to offer you this variety at the above prices. In general appearance it has a bright green foliage. Very hardy, growing 15 to 20 feet, and stands almost any amount of trimming. The origin of this tree is not definitely established but it is thought to have originated in one of the European nurseries. 12 to 18 inch size.

**GLOBE ARBOR VITAE.** A hardy bright green globe type round bushy and compact tree. An old well known favorite always in demand for foreground planting. Contrasts well with Pfitzers Juniper. 10 to 12 inch size.

Blackhill Spruce

Mugho Pine

Savin Juniper

## A DOORWAY Planting

3 FOR \$2.49

A pyramidal type for the background, intermediate type such as Pfitzers or Savin Juniper at side and in front either Globe Arbor-Vitae or Mugho Pine. Start landscaping your home now.

Order 2, one for each side of door. No. 726. Three trees 1 of each, 1-1½ ft. size. \$2.49 Postpaid. Two Collections for \$3.98.

## Favorite Colorado Blue Spruce

Now you can have America's favorite of all ornamental evergreens in your lawn—famous Colorado Blue Spruce. These 4 year old transplants 6-10 inches tall can be set in permanent location. If you have room for a larger planting order 2 or more collections. No. 725—4 for only \$1.70. Postpaid.

## 100 EVERGREEN SEEDLINGS

Our favorite collection containing two best Spruce and Pine varieties, an ideal combination for any windbreak. These seedlings are easy to start, cost only 4c each. 25 each: Norway Spruce, Red Cedar, Colorado Blue Spruce, Ponderosa Pine. No. 722—ALL 100—3-6" ONLY \$4.25. POSTPAID.

## AMERICAN Highbush CRANBERRY

In the spring it is covered with showy white cymes of flowers; then in the fall and long into the winter the shrub makes itself known by its scarlet, translucent fruit. It is edible and makes very good jelly alone or with other less tart fruits such as apples or peaches. It also makes a very good addition in preserves.

It is a tall shrub, growing to twelve feet so it will have to be used as accent at the corners of the house or as a backer in the shrub border. Will grow in all types of soils and will do well in either sun or shade. 3/6 in. seedlings: 10 for \$1.05; 25 for \$1.75; 50 for \$3.15; 100 for \$5.10. Postpaid.

## 8 LOVELY Ornamentals 2 of Each Kind \$4.10

### AN IDEAL ORNAMENTAL EVERGREEN GROUP

These are fine heavy trees. The varieties are as follows: Norway Pine, Colorado Blue Spruce, Red Cedar and American Arbor Vitae. All are 12 to 15 inches tall except Colorado Blue Spruce which are 8 to 12 inches. This is a matchless value in fine evergreens. Less than 50c each for fine sturdy trees. Supply Limited. Please order early. Order No. 700.

### SPECIAL

Grow Your Own Windbreak Stock  
100 American Arbor Vitae 2 yr. 3/6 in. size, for \$3.85 postpaid. Order No. 750.

## HARD Sugar MAPLE

While these trees are rather slow growing, the years go by pretty fast. You'll be surprised how quickly they make a nice showing. Plant waste spaces to sugar maples. These trees last for years and make a living monument to our foresight. Extremely hardy. Adapted to a wide range of soil and climate. A tree of rare beauty. At this special very low introductory price you can get out a lot of them. Plant them in lawns, along streets and roads. All prices are prepaid.

### MAPLE TREE PRICES

1 to 1½ ft. size. 10 for \$1.25; 25 for \$2.65  
50 for \$4.25; 100 for \$7.50

**SPECIAL OFFER:** 10 American Arbor Vitae, 5 Colorado Blue Spruce, 5 Red Cedar, 20 Trees all Northern Growth, 3 to 6 in. seedlings. A great value. Collection No. 745—\$1.00. Postpaid.

## EVERGREEN SEEDLINGS

Evergreen Seedlings should be planted in beds and cultivated like garden plants. Rows may be 18-24 inches apart with the Evergreens 10-15 inches apart in the row. Provide some shade for the first year. A covering of lath spaced about 1½ inches apart with slats running north and south is good. When 18-24 inches high, transplant into permanent location. For further planting instructions and windbreak ideas ask for our Free Circular giving a full description of all varieties.

## BABY GIANTS

These sturdy three year old seedlings set out together will make a beautiful windbreak. 10 each Norway Spruce, American Arbor Vitae, Red Cedar. No. 724—ALL 30—6-9" ONLY \$1.55. POSTPAID.

## ROSA MULTIFLORA

The Multiflora Rosa now seems to offer the solution for the high cost of farm fencing. This thorny shrub is easy to establish yet not difficult to eradicate when no longer needed. Crops may be planted right up to the hedge as it does not compete seriously for soil moisture. Requires no pruning. Has ornamental foliage. Fruits and flowers an excellent cover for wild life. 1 year plants 8 to 12 inch: 25 for \$1.75; 50 for \$2.75; 100 for \$4.00. Postpaid.

# Berry's QUALITY FRUITS ARE ALL Prepaid

## FINEST QUALITY

Our enviable reputation is built on high quality at low prices—superior values. We have developed the largest business of its kind in the country on this sound policy.

These same high standards prevail in our nursery department. Each and every item is carefully tested before Berry's will put their name behind it. You can order our nursery stock with full confidence that it is accurately and honestly described, that the quality is of the highest and the prices the lowest.

In the fall, we can supply all nursery stock except Cannas, Dahlias, and Gladiolus Bulbs, Peaches, Sweet Cherries, Apricots and Roses. Most kinds of nursery stock can be very successfully planted in the Fall, even in severe climates.

## WHEN WE SHIP

In the spring, we study the weather reports and ship at the proper planting time in your locality. Don't be alarmed if your shipment is not received on the first warm day, for you may be sure your order is having careful attention.

When spring opens up all over the Central States, we are not always able to ship as promptly as we would like because of the manpower problem. As your order will be shipped as soon as possible, it is not necessary to write us. You may be sure that even in the rush season, your order will be received in time for successful planting.

Strawberries, Cannas, Dahlias, Peonies, Gladiolus and Perennials are shipped separately and not included in the same package with Fruits, Shrubs, etc.

## GIANT FRUIT TREES

These are larger than regular sizes. Have grown at least 3 yrs. in the nursery, making them extra well rooted and branched. Will bear 2 to 3 yrs. quicker than regular size.

## DWARF FRUIT TREES

Low growing compact trees. Fine for limited space, growing only 8 to 10 ft. tall. Same fruit as larger growing trees. ½ ft. tall. ½ inch trunk diameter.

## Delicious STRAWBERRIES FOR YOUR GARDEN

### SURE CROP

**No. 4004—BLAKEMORE.** New early market berry. Extra vigorous grower, heavy bearer, very drought resistant, healthy and good plant maker. Recommended for Northern States. Mild flavor, beautiful color, early maturity. For market or home. Postpaid: 25 for \$5; 100 for \$2.35; 500 for \$9.00.  
**No. 4005—SENATOR DUNLAP.** Old reliable favorite for home or market. Strong, extra hardy grower—heaviest yielder of big, solid, red berries. Mid-season. Postpaid: 25 for 75c; 100 for \$2.20; 500 for \$8.50.

Have a big Strawberry Patch of your own for less than you would pay for one crate of berries at the store. Each plant costs you only a few cents, but will give up to two quarts of strawberries per plant. Grow your own delicious berries for eating fresh, or shortcakes and preserves. Our Sure-Crop and Thoro-Bred varieties will yield large crops every spring and our Everbearing variety will bear both spring and fall. Order now, and our healthy, hardy plants will be shipped to you at the proper time for planting in your locality. Strawberries cannot be shipped in the fall. Do not order after May 1st.

### EVERBEARING

"All Everbearers Start Fruiting 90 Days After Planting"

**No. 4030—STREAMLINER.** Large sweet flavored rich, solid red berries. Hardy vigorous plants which begin to bear 60 to 90 days after planting. Heavy bearer, self pollinizing. Postpaid: 25 for \$1.75; 100 for \$4.50; 500 for \$19.50.

**No. 4000—GEM.** Considered by many the best of the Everbearers. Year in and year out under various soils, climate, and growing conditions it will produce more fruits and plants than any other. The fruit is large and of delicious quality. Postpaid: 25 for \$1.25; 100 for \$4.00; 500 for \$17.00.

**No. 4013 — EVERBEARING STRAWBERRY GARDEN.** 50 Gem and 50 Streamliner—100 for \$3.50. Prepaid.

### THORO-BREDS

**No. 4006—FAIRFAX.** Large, firm berries. Bright red color. An extra heavy producer of fine flavored berries. Excellent shipper. It wins because of its greatly superior flavor and astonishing yields. Postpaid: 25 for \$1.10; 100 for \$3.25; 500 for \$12.50.

**No. 4007—PREMIER.** Famous for flavor and huge crops in any soil or climate. Berry's plants are true early strain—heavy bearers, big red berries. Postpaid: 25 for \$1.10; 100 for \$3.25; 500 for \$12.50.

**No. 4012—SPRING STRAWBERRY GARDEN**—100 for \$2.25, 25 Blakemore, 25 Dunlap, 25 Fairfax, 25 Premier.

## RHUBARB

Order in  
Spring or Fall

**No. 6562—MCDONALD SEEDLESS.** The best flavored new Rhubarb that never goes to seed. Berry's send you strong divisions (part of a root with eyes) that develop into big, strong hardy plants. Each 75c; 5 for \$3.25; 10 for \$6.00; 25 for \$14.00. Postpaid.

**No. 6564—CANADA RED RHUBARB.** Newest and best of all Rhubarb! Extra large, tall stalks of juicy, very sweet, red meated Rhubarb. Best for sauce, canning, or pies. Requires practically no sugar! Each \$1.00; 5 for \$4.50; 10 for \$8.00; 25 for \$18.50. Postpaid.

**No. 6565—QUICK CROP VICTORIA.** Whole roots—almost twice as big as No. 6561. 5 for 25c; 10 for \$1.50; 25 for \$3.50. Postpaid.

### RHUBARB GARDEN

3 Victoria, 1 Ruby Red, 1 Canada Red  
No. 6568—5 plants for \$1.45. Postpaid.

## BOYSENBERRY

**No. 6500—REGULAR BOYSENBERRIES.** The finest and most profitable fruit ever developed. The largest of all with the most delicious juicy, richly flavored fruit yet known. The plant is a vigorous grower, fruiting in early summer and bearing 8 to 10 weeks. No. 1 plants will bear the next season after planting. Postpaid: No. 1 tips, 10 for \$1.50; 25 for \$3.25; 100 for \$12.00.

**No. 6501—THORNLESS BOYSENBERRIES.** Has the same wonderful qualities of the regular Boysenberry, but with thornless canes. Plant is a vigorous grower. Hardy anywhere but requires protection in severe climates. No. 1 tips: 10 for \$1.75; 25 for \$3.75; 100 for \$13.50. Postpaid.

## BLACKBERRIES

Order in  
Spring or Fall

**No. 6515—ALFRED.** The largest most hardy, best flavored of all Blackberries. Earlier than Eldorado. Highly recommended for home gardens. No. 1 R. C.—10 for \$1.35; 25 for \$3.25; 100 for \$11.00. Prepaid.

### ASPARAGUS

**No. 6570—WASHINGTON.** Rust Proof Strain. Large, tender stocks. Hardier, more disease resistant than most varieties. Fine for canning. 2 yr. plants—25 for \$1.35; 50 for \$2.25; 100 for \$3.75. Prepaid.

**No. 6571—PARADISE.** A new rust proof variety; produces extra large tips, yields more than other varieties. 2 yr. plants—25 for \$1.65; 50 for \$3.00; 100 for \$5.00. Prepaid.

### QUICK CROP ASPARAGUS

Three-year size, larger, more mature roots. Yields a crop sooner. Shipped prepaid.

**No. 6572—WASHINGTON QUICK CROP.** 10 for 90c; 25 for \$2.00; 100 for \$6.50.

**No. 6560—HORSE RADISH CUTTINGS**  
10 for 75c; 25 for \$1.50; 100 for \$5.00

**BERRIES THAT GIVE BIG CASH CROPS QUICK!**

# Strawberries

**PLANT BERRIES THIS YEAR, PICK BIG FRUIT CROPS NEXT YEAR**  
**No. 4031—SUPERFECTION**

One of the best new Everbearing Strawberries. Large, firm berries that are dark red all the way through. Very fine, sweet flavor. Hardy vigorous plants that will bear 60 to 90 days after planting and will continue to bear until first heavy frost. Superfection is a heavy yielder, with a longer fruiting period than other varieties. Try some of these wonderful new berries in your garden this Spring.

No. 4031—25 for \$2.40; 50 for \$4.15; 100 for \$7.25; 500 for \$30.00.

## No. 4011—All Season Strawberry Garden

**150 plants for \$4.00, Postpaid**

50 each, Gem, Premier, and Dunlap. A special money saving collection designed for families who enjoy strawberries all summer. Saves you \$1.45 from regular catalog prices.

Do not Order any Strawberries after May 1st.

Every variety offered on these pages (60 and 61) will start producing big crops next year—crops to eat, can or sell. Order now—Harvest fruit, asparagus, and rhubarb next year when your needs will be greatest.

**ALL ITEMS ON THIS PAGE EXCEPT BLUEBERRIES AND STRAWBERRIES CAN BE ORDERED IN SPRING OR FALL**

# BLUEBERRIES

You can now grow these large, sweet, tasty and cultivated Blueberries in your own garden. Have plenty of luscious berries for your table, for pies, muffins, etc. Do best in a moist, acid soil. If your soil is sweet you can easily acidify it by the use of peat moss or partially rotted vegetable matter around the plants. The bushes grow 3 to 4 ft. high and should be planted 4 ft. apart in the home garden. Plant at least two varieties for the best fruiting.

**2 FOR \$2.40 POSTPAID**

**No. 6820—JERSEY.** Extra large, firm, sweet berries. Make delicious blueberry pies. Midseason. 2 year plants, 2 for \$2.40; 6 for \$6.60. 3 yr. plants, 2 for \$2.95; 6 for \$8.40.

**No. 6824—STANLEY.** Huge, dark Blueberries in large, dense clusters. Delicious flavor. Ripens late. 2 yr. plants, 2 for \$2.40; 6 for \$6.60. 3 yr. plants, 2 for \$2.95; 6 for \$8.40.

**No. 6818—RANCOCAS.** A good producer of large berries that are sweet and tender. Early to midseason. 2 yr. plants, 2 for \$2.40; 6 for \$6.60. 3 yr. plants, 2 for \$2.95; 6 for \$8.40.

**Blueberry Garden:** 1 each Jersey, Stanley and Rancocas.

**No. 6837—2 year plants, 3 for \$3.15.**  
**No. 6838—3 year plants, 3 for \$4.00.**

# GOOSEBERRIES

Delicious for pies, sauce, jelly or canning. Lots of fruit with no work. Extremely hardy. Bear every year. Sturdy, well rooted 2 yr. No. 1 plants.

**Prepaid Prices all Gooseberries... Each 50c \$2.50**

**No. 6841—DOWNING.** Very large, light green, juicy berries of extra quality. Strong, vigorous, hardy. Commercial variety.

**No. 6839—HOUGHTON.** Best red gooseberry. Bears big crops of juicy berries in large bunches. Vigorous and hardy.

## No. 6845—GOOSEBERRY GARDEN

**2 Downing and 1 Houghton  
3 for \$1.40**

## PREPAID PARCEL POST

We ship nursery stock by prepaid parcel post whenever possible. Some trees are too large for Parcel Post. Be sure to give your nearest Express office address when ordering large sizes.

## Quick Crop Berries

These Quick Crop Berry bushes are larger, more mature plants than our regular size. Extra well rooted, husky bushes that will bear quicker for you. Ideal for the home owner.

**No. 6710—LATHAM RASPBERRY.** 5 for \$1.35; 10 for \$2.50; 25 for \$5.50.  
**No. 6711—CUMBERLAND RASPBERRY.** 5 for \$1.45; 10 for \$2.70; 25 for \$6.00.

**No. 6817—ELDORADO BLACKBERRY.** 5 for 95c; 10 for \$1.60; 25 for \$3.50.

**No. 6834—RED LAKE CURRANT.** 55c each; 5 for \$3.75.

**No. 6847—DOWNING GOOSEBERRY.** 90c each; 5 for \$3.95.

# CURRANTS

Extremely hardy, easy to grow. 2 yr. No. 1 plants that will bear quickly for you. Rich, delicious flavor, makes fine jelly or jam.

**Each 50c \$2.15**

**No. 6831—PERFECTION.** Largest of the reds. Long stems. Beautiful bright red berries. Favorite commercial variety.

**No. 6830—RED LAKE.** The best Red Currant in all climates. The bushes are absolutely hardy, highly productive, and exceedingly vigorous. The extra large red berries are borne on big, well filled clusters, on extra long stems for easy picking. Excellent flavor. Mid-season, but holds on late. Best of all Currants.

## No. 6833—CURRANT GARDEN

**2 Red Lake and 1 Perfection  
3 for \$1.20**

We prepay all nursery stock. This saves you at least 20%. We do not ship nursery stock to Arizona, California, Florida, Idaho, Nevada, Oregon and Washington.

# Raspberries

**No. 6706—CUMBERLAND.** The "Ace" of the Blacks! Yields more fruit, larger and firmer. Bush extra hardy, very vigorous

—resists drought and disease. Top grade plants. 10 for \$1.49; 25 for \$2.75; 100 for \$9.95.

**No. 6712—SODUS.** The newest and best of the Purple Raspberries. Fruit reddish purple, firm, and of extra fine flavor. Plants are vigorous, hardy, disease resistant and consistent, heavy bearers, early in the season. 10 for \$1.90; 25 for \$3.75; 100 for \$13.00.

**No. 6704—LATHAM RED.** Hardy—thrives in any climate. Largest, reddest, best flavored—very productive. Most popular of the Reds. Recommended for home and commercial use. 10 for \$1.75; 25 for \$3.75; 100 for \$13.00.

**No. 6703—CHIEF, RED**—Excellent flavor, yields large crops, very hardy. Ripens two weeks earlier than Latham. Fine texture and quality. Highly recommended for freezing. 10 for \$1.65; 25 for \$3.50; 100 for \$12.00.

**No. 6714—BRISTOL.** An exceptionally good Black Raspberry. Large, firm, attractive berries of excellent quality. Bushes are hardy, vigorous and heavy bearers. Recommended for both market and home use. 10 for \$2.10; 25 for \$4.25; 100 for \$14.50.

**No. 6705—INDIAN SUMMER—RED.** (See Picture.) A new, almost everbearing Raspberry, producing two good crops each season. First crop earlier than Latham. Fall crop usually lasts until frost. Fruit is extra large red, firm and of excellent quality. Very hardy. 10 for \$2.00; 25 for \$4.00; 100 for \$14.00.

**No. 6702—MORRISON.** The largest Black Raspberry ever produced — fruits often measure 1 inch in diameter. Bigger berries, fewer seeds, more juice, better flavor—all these super qualities on a vigorous, more hardy bush. 10 for \$2.10; 25 for \$4.25; 100 for \$14.50.

**BERRY'S PREPAID NURSERY PRICES Save You Money!**

# Peaches

## THE BIG MONEY CROP

Bear well third year after planting! Should be planted early in the spring and not in fall. Berry's prepaid prices save you at least 20%! The 4/6' and 5/7 ft. sizes are usually shipped by prepaid express. Be sure to give name of most convenient express station.

### PREPAID PEACH PRICES

Description of Grades below	1-3	4-7	8 or more
Economy 2/3', 5/16"	\$0.65	\$0.55	\$0.50
Commercial 3/5', 3/16"	.90	.80	.75
Home Orchard 4/6', 5/16"	1.20	1.05	.95
Giant Size 5/7', 1 1/16"	1.50	1.30	

Giant size available in 3 varieties only: Elberta No. 6460; J. H. Hale No. 6461; Golden Jubilee

No. 6464.

No. 6402—**EARLY ELBERTA**. Freestone. Large golden yellow with red cheek. Yellow flesh, firm.

juicy, luscious flavor. Earlier than Elberta.

No. 6403—**ELBERTA**. Best known freestone, commercial variety. Yellow with reddish cheek. Excellent for canning.

GIANT No. 6460.

No. 6405—**GOLDEN JUBILEE**. Yellow freestone. Firm, juicy. 15 to 20 days earlier than Elberta. GIANT No. 6464.

No. 6406—**HALE HAVEN**. Best early freestone. Strong grower, very hardy—heavy bearer of fine flavored yellow peaches.

No. 6407—**J. H. Hale**. Earlier and larger than Elberta. Unusually fine flavor. Good yellow with red blush. Good

keeper. Plant with other varieties. GIANT No. 6461.

No. 6413—**POLLY**. A very fine, white freestone peach. The fruit is large, blushed and ripens just before Elberta. The

flesh is juicy white, but firm. Rich, delicious flavor. It bears young and is a heavy, consistent bearer. An excellent peach

for all-around home use and for local markets. A self pollinizer. One of the hardest Peaches!

No. 6415—**RED HAVEN**. The peach with all the "extras"—extra early, extra hardy, extra juicy, extra red, and extra

heavy bearer. New and highly recommended.

### NECTARINE

No. 6992—Some-times called Fuzz-less Peach. Smooth skinned, juicy fruit with a delicious, different flavor. 3 to 4 ft. size, 3/16"; Each \$1.10; 4 or more \$1.00 Each.

**50¢ Each**  
**IN LOTS OF 8 OR MORE**

## APRICOTS

### Prepaid Prices

	1-3	4-7	8 or more

Commercial 3/5', 3/16"			
Home Orchard 4/6', 5/16"	1.25	1.15	1.10

No. 6430—**CHINESE EARLY GOLDEN**. Favorite Commercial variety in many sec-

tions. Large, delicious heavy bearer.

No. 6431—**MOORPARK**. It is considered

to be the best flavored, best quality of all

apricots. Fruit is extra large, round, deep

orange in color.

No. 6432—**SCOUT**. An extremely hardy

Canadian variety. Fruit is large, golden-

yellow, with an attractive reddish blush.

Delicious flavor. Bears young.

# FRUITS THAT WILL BRING PLEASURE and PROFITS!

## Pears

Pears are one of the easiest fruits to grow and thrive in any climate where other fruit grows. Plant at least 2 varieties for good cross-pollination. Douglas, Kieffer, and Parker are blight resistant. Pears can be ordered in Spring or Fall.

Description of Grades below	1-3	4-7	8 or more
Commercial 3/5'			
Home Orchard 4/6'	\$0.95	\$0.90	\$0.85
Quick Crop 5/7'	1.30	1.20	1.15
Giant Size 5/7'	1.65	1.50	1.40
Dwarf Size 3/4'	2.15	1.95	
	2.50	2.40	

**No. 6201—BARTLETT.** Favorite commercial variety. Heavy bearer of large, juicy, high flavored fruit. Strong growing tree—fairly hardy. **GIANT No. 6260. DWARF No. 6215.**

**No. 6202—DOUGLAS.** Best for Middle West. Vigorous and hardy. Often bears second year. Considered blight proof. Fruit large, golden yellow with blush. Fine texture and flavor.

**No. 6203—KIEFFER.** Large golden yellow, meaty pear for canning. Tree is extra hardy, blight resistant and bears young. **GIANT No. 6261.**

**No. 6209—PARKER.** Fruit is medium to large size. Yellow with a distinct blush. Fine and tender, sweet, juicy, and full of flavor. Heavy producer. Blight resistant. Extremely hardy, excellent for colder climates.

### HOME PEAR ORCHARD

A choice selection for eating, canning, or pickles. Regular grade trees, Commercial and Quick Crop size. One each—Douglas, Bartlett, and Kieffer. **No. 6270—3/4', 3 trees.....\$2.50**

## Cherries

EVERY HOME SHOULD HAVE SOME

### SWEET CHERRIES

These varieties are deliciously sweet, and especially adapted for eastern states. Not as hardy as Sour Cherries, so not recommended for severe climates. **Order in Spring only.**

Prepaid Prices	1-3	4-7	8 or more
Commercial 3/5', 1/16"	\$1.40	\$1.30	\$1.25
Home Orchard 4/6', 1/16"	1.70	1.60	1.55
Quick Crop 5/7', 1/16"	1.95	1.80	1.70

**No. 6301—BLACK TARTARIAN.** Very large, purplish-black cherries of finest flavor. Rich, juicy. Excellent for eating fresh. Popular in the East.

**No. 6303—SCHMIDT'S BIG.** New attractive sweet cherry, rich mahogany in color. Grows in clusters. Yields an abundant crop.

**No. 6304—YELLOW GLASS.** Hardest of all sweet cherries. Golden yellow fruit is juicy and well flavored.

**No. 6307—BING.** Unusually large, heart-shaped, dark maroon fruit that is extremely attractive for market. Flesh is firm and juicy, full of rich, delicious flavor. Vigorous grower. Ripens in late June.

### SOOR CHERRIES

These varieties are hardy anywhere and bear young. A big profit crop used for eating, canning, preserves and pies. **Order in Spring or Fall.**

Prepaid Prices	1-3	4-7	8 or more
Commercial 3/4', 1/16"	\$1.25	\$1.15	\$1.10
Home Orchard 4/4 1/2', 1/16"	1.50	1.40	1.35
Quick Crop 4 1/2/5', 1/16"	1.85	1.70	1.60
Giant size 5/5 1/2', 1/16"	2.25	2.00	

**No. 6308—EARLY RICHMOND.** The favorite early cherry. The fruit is bright red, juicy and of delicious flavor. Hardy, prolific grower, heavy producer. **GIANT No. 6360.**

**No. 6309—ENGLISH MORELLO.** Best late, dark red, hardy cherry. Low growing trees are always loaded with large, juicy, well flavored tart cherries. Later than Montmorency.

**No. 6310—LARGE MONTMORENCY.** Does well everywhere. Extra hardy, it bears large crops regularly ripening 10 days after Early Richmond. Very large fruit, firm flesh and finest flavor. **GIANT No. 6361.**

**3 TO 5 FT. Each**

ORDER ALL PLUMS IN SPRING OR FALL

### Hardy American Varieties

**No. 6500—SUPERIOR.** Qualities of California Plums, extra hardy, will quickly bear large crops. The huge dark red plums have juicy, full flavored tender yellow meat. Best for eating fresh, canning, or plum butter. **Giant No. 6566.**

**No. 6501—RED WING.** An unusually large, dull red Plum developed in Minnesota. Flesh is rich, yellow, firm, juicy and sweet. Fine for eating or canning.

**No. 6502—UNDERWOOD.** Freestone. Extra large, deep red fruit. Ripens early and bears large crops. Very hardy.

**No. 6504—TOKA.** Highly recommended as a pollinizer for other Plums. Fruit is quite large and freestone. Apricot color with firm yellow, rich flavored flesh. Very hardy.

### European and Japanese Group

These favorite varieties are not as hardy as American varieties so they are especially suited for states east of Illinois. Fine for eating or market. Plant at least 2 for proper cross pollination.

**No. 6506—ITALIAN BLUE PRUNE.** The old favorite Italian dark blue Prune Plum. Juicy and very well flavored. Excellent for eating fresh or canning. Not used for jelly.

**No. 6507—GREEN GAGE.** Large sweet yellowish green fruit. Juicy and tasty for eating fresh or canning. One of the best late Plums. Stemmy cling stone.

### PREPAID PRICES ON ALL PLUMS

## All Apples Can Be Shipped in Spring or Fall

The Apples that can be furnished in Dwarf or Giant size have the lot number shown in descriptions below. See opposite column and page 60 for information on these special sizes.

## WINTER APPLES

**No. 6107—DELICIOUS YELLOW. GIANT NO. 6169.** Considered even better than Red Delicious. Superior in flavor, texture, and keeping qualities. The very best golden apple.

**No. 6108—DELICIOUS NEW RED. GIANT NO. 6160, DWARF NO. 6145.** America's Sweetheart! Supreme in flavor and keeping qualities. Young bearing. Thrive anywhere.

**No. 6104—MCINTOSH, RED. DWARF NO. 6147. GIANT NO. 6165.** Extra hardy, strong long lived trees. Fruit uniformly well shaped and colored. Juicy, full flavored. Especially recommended for Northern States.

**No. 6112—STAYMAN'S WINESAP. GIANT NO. 6166.** The extra large, hardy Winesap. Fine for eating or cooking. Good keeper.

**No. 6118—NORTHWEST GREENING.** Keeps until spring. Excellent for eating or cooking after Xmas. Bears young.

**No. 6116—JONATHAN—DARK RED. DWARF NO. 6149.** Most profitable apple in many localities. Heavy, consistent bearer of rich, juicy, tart, good keeping apples.

**No. 6106—CORTLAND.** A winter apple. An improved late McIntosh. Large red apples, with firm juicy flesh. Hardy, productive trees that come into bearing at an early age.

**No. 6111—RED ROME BEAUTY.** Large, juicy, pleasantly flavored red winter apple. Excellent for eating or cooking. Good keeper. Vigorous, hardy, and a heavy yielder. Bears young.

**No. 6101—CRIMSON WINESAP.** Large, very dark red, full flavored. Excellent for eating or cooking. Best for late storage. Best Winesap for home or commercial orchards.

**No. 6103—GRIMES GOLDEN.** Golden yellow apple with firm, white flesh, and sparkling, cidery flavor. Not recommended in severe climates.

## FALL APPLES

**No. 6105—WEALTHY.** The favorite Red Fall Apple—delicious flavor, extra juicy. Very hardy, excellent keeper.

**No. 6113—YELLOW TRANSPARENT. GIANT NO. 6164.** Bears very young. Big crops, juicy, full flavored apples in early fall.

## QUINTUPLET APPLE TREES

5 Varieties—all in one vigorous extra strong tree. Have an apple orchard in your own back yard. If you have room for only one or two trees, here is an opportunity to have 5 different kinds of apples ripening at different times, all on one tree. Red and yellow apples. Fall and Winter apples. **No. 6126—Trees are 4 to 5 feet tall. \$2.95 each. Express or Parcel Post Prepaid.**

## SUMMER APPLES

**No. 6102—DUCHESS.** Best and hardiest red summer apple. Tart. Fine for cooking, sauce, pies, apple butter, etc.

**No. 6119—ANOKA.** An extra hardy variety, bears young. Bright yellow fruit striped with red. Excellent for cooking. Often bears 2 or 3 years after planting.

## CRAB TREES

**No. 6124—WHITNEY.** A wonderful large early crab for eating, canning or pickling. Tree very hardy, bears very young.

## BERRY TREE SIZES

**COMMERCIAL SIZE.** Being lower priced, usually preferred for large Orchard planting. 3/5 ft. tall,  $\frac{1}{8}$  to  $\frac{1}{4}$  in. diameter. Extra value at Berry's prepaid prices that save you at least 20%.

**HOME ORCHARD SIZE.** Strong  $\frac{3}{8}$  to  $\frac{1}{2}$  inch diameter—4/6 ft. tall. Very well branched and well rooted.

**QUICK CROP SIZE.** 5/7 ft. tall— $\frac{1}{4}$  to 1 inch diameter—extra heavily branched and well rooted. Plant this size for better results.

**GIANT SIZE.** 5/7 ft. tall.  $\frac{3}{4}$  to 1 inch diameter. These extra large, sturdy trees will bear crops quicker.

**DWARF SIZE.** 3/4 ft. tall.  $\frac{5}{8}$  inch diameter. Grow only 8 to 10 ft. tall. Fine for limited space.

See Page 60 for further description on Giant and Dwarf size trees.
